# School Characteristics and Climate Poverty Concentration in Public Schools by Locale and Race/Ethnicity 

Larger percentages of Black, Hispanic, and American Indian/Alaska Native students attended high-poverty schools than White or Asian/Pacific Islander students in 2005-06.

${ }^{1}$ Private school students are excluded because large proportions of private schools do not participate in the free or reduced-price lunch program.

NOTE: Figure represents percentages of students in public schools with more than 75 percent of students eligible for free or reduced-price lunch. The National School Lunch Program is a federally assisted meal program. To be eligible, a student must be from a household with an income at or below 130 percent of the poverty threshold for free lunch or between 130 percent and 185 percent of the poverty threshold for reduced-price lunch. Approximately 10,745 public schools (or 11 percent) did not report information on the number of students eligible for free or reducedprice school lunch. For details on Census-defined areas and poverty thresholds, see supplemental note 1. Race categories exclude persons of Hispanic ethnicity.

NCES 2007-040

The percentage of students eligible for the free or reduced-price lunch program provides a proxy measure for the concentration of low-income students within a school. For the purpose of this indicator, high-poverty schools are defined as public schools with more than 75 percent of students eligible for free or reducedprice lunch. ${ }^{1}$ In 2005-06, approximately 15 percent of all elementary and secondary public school students (or 7.1 million students) attended high-poverty schools (see supplemental table 29-1).

Nationally, larger percentages of Black, Hispanic, and American Indian/Alaska Native students attended high-poverty schools than did White or Asian/Pacific Islander students in 2005-06, and higher percentages of Asian/ Pacific Islander than White students attended these schools. Some 32 percent of Black, 34 percent of Hispanic, and 24 percent of American Indian/Alaska Native students were enrolled in high-poverty schools, compared with 4 percent of White and 10 percent of Asian/Pacific Islander students. In contrast, nationally, larger percentages of White (19 percent) and Asian/

Pacific Islander (24 percent) students attended low-poverty schools (public schools with 10 percent or less of students eligible for free or reduced-price lunch) than did Black (4 percent), Hispanic (7 percent), and American Indian/ Alaska Native (5 percent) students.

Overall, a similar pattern existed among racial/ ethnic groups within different school locales. In each locale (cities, suburban areas, towns, and rural areas), higher percentages of Black, Hispanic, and American Indian/Alaska Native students attended high-poverty schools than did their White and Asian/Pacific Islander peers in 2005-06. Among students attending city schools, for example, 44 percent of Blacks, 46 percent of Hispanics, and 27 percent of American Indians/Alaska Natives attended high-poverty schools, compared with 9 percent of Whites and 17 percent of Asians/Pacific Islanders. In rural areas, higher percentages of Black ( 25 percent), Hispanic ( 21 percent), and American Indian/Alaska Native ( 33 percent) students attended high-poverty schools than did their White and Asian/Pacific Islander (4 percent for both) peers.

POVERTY CONCENTRATION: Percentage of public elementary and secondary school students in high-poverty schools, by race/ethnicity and locale:School year 2005-06

## Poverty Concentration in Public Schools by Locale and Race/Ethnicity

Table 29-1. Number and percentage distribution of public elementary and secondary students, by percentage of students in school eligible for free or reduced-price lunch, locale, and race/ethnicity: School year 2005-06

| Locale and race/ethnicity | Number eligible for free or reducedprice lunch | 10 percent or less | $\begin{array}{r} 11-25 \\ \text { percent } \\ \hline \end{array}$ | $\begin{array}{r} 26-50 \\ \text { percent } \\ \hline \end{array}$ | 51-75 <br> percent | More than 75 percent |
