INDICATOR 5

Racial/Ethnic Distribution of Public School Students

The indicator and corresponding tables are taken directly from *The Condition of Education 2008*. Therefore, the page numbers may not be sequential.

Additional information about the survey data and supplementary notes can be found in the full report. For a copy of *The Condition of Education 2008*, visit the NCES website (http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2008031) or contact ED PUBs at 1-877-4ED-PUBS.

Elementary/Secondary Education

Racial/Ethnic Distribution of Public School Students

The percentage of racial/ethnic minority students enrolled in the nation's public schools increased between 1986 and 2006, primarily due to an increase in the proportion of Hispanic students.

The shifting racial and ethnic distribution of public school students enrolled in kindergarten through 12th grade is one aspect of change in the composition of school enrollment. The percentage of public school students who were considered to be part of a racial or ethnic minority group increased from 22 percent in 1972 to 31 percent in 1986 to 43 percent in 2006 (see supplemental table 5-1). Between 1972 and 2006, the percentage of public school students who were White decreased from 78 to 57 percent. The minority increase largely reflected the growth in the proportion of students who were Hispanic. In 2006, Hispanic students represented 20 percent of public school enrollment, up from 6 percent in 1972 and 11 percent in 1986. Since 1986, the proportion of public school students who were Hispanic has increased more than the proportion who were Black or members of other minority groups. For example, in 2006, Black students made up 16 percent of public school enrollment, compared with 17 percent in 1986. Hispanic enrollment measurably surpassed Black enrollment for the first time in 2002. Together, Asian

(3.8 percent), Pacific Islander (0.2 percent), and American Indian/Alaskan Native (0.7 percent) students and students of more than one race (2.7 percent) made up about 7.3 percent of public school enrollment in 2006.

The distribution of minority students in public schools differed by region, though minority enrollment generally grew in all regions between 1986 and 2006 and during the broader period of 1972 and 2006 (see supplemental table 5-2). Between 1972 and 2006, the South and West had larger minority enrollments than the Northeast and Midwest, and the Midwest had the smallest minority enrollment of any region. In the West, beginning in 2003, minority enrollment exceeded White enrollment, and by 2006, minority students made up 55 percent of public school enrollment, compared with 45 percent for White students. In 2006, as in all years since 1972, the percentage of Hispanic students exceeded the percentage of Black students in the West, while in the South and Midwest, the percentage of Black enrollment continued to exceed that of Hispanic enrollment.

¹"Other" includes all students who did not identify themselves as White, Black, or Hispanic.

NOTE:Race categories exclude persons of Hispanic ethnicity. Estimates include all public school students enrolled in kindergarten through 12th grade. See *supplemental note 2* for more information on the Current Population Survey. See *supplemental note 1* for the states in each region.

[—] Not available.

¹ From 1989 through 2002, Asian and Pacific Islander students were not reported separately; therefore, Pacific Islander students are included with Asian students during this period.

NOTE: Estimates include all public school students enrolled in kindergarten through 12th grade. Race categories exclude persons of Hispanic ethnicity. Over time, the Current Population Survey (CPS) has had different response options for race/ethnicity. In 1994, the survey methodology for the CPS was changed and weights were adjusted. In 1996, the Census revised procedures for editing and allocating the race variable to offset an underestimation of Asians/Pacific Islanders. One should use caution when making comparisons between data for 1995 and earlier and data for 1996 and later. See supplemental note 2 for more information on the CPS. Detail may not sum to totals because of rounding.

⁻⁻⁻ Not available.

NOTE: Figures include all public school students enrolled in kindergarten through 12th grade. Race categories exclude persons of Hispanic ethnicity. Over time, the Current Population Survey (CPS) has had different response options for race/ethnicity. In 1994, the survey methodology for the CPS was changed and weights were adjusted. In 1996, the Census revised procedures for editing and allocating the race variable to offset an underestimation of Asians/Pacific Islanders. One should use caution when making comparisons between data for 1995 and earlier and data for 1996 and later. See supplemental note 2 for more information on the CPS. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October Supplement, selected years, 1972—2006.

[!] Interpret data with caution (estimates are unstable).

[‡] Reporting standards not met (too few cases).

¹ From 1989 through 2002, Asian and Pacific Islander students were not reported separately; therefore, Pacific Islander students are included with Asian students during this period.
