

Existing Wetland Mitigation Bank Inventory, Spring 2000, Sponsor & Location
INSTITUTE FOR WATER RESOURCES (IWR), US ARMY CORPS OF ENGINEERS

This list includes wetland mitigation banks with some form of bank agreement. Bank information has not been verified, and some of the information has not been updated since the National Mitigation Banking Study surveys in 1992. Information sources: Corps Field Office Responses-March 1999, Other National Study Survey Information, and Miscellaneous Web-site Information. The Corps did not participate in establishment of many early banks listed in this inventory, especially those implemented prior to 1993. This list includes those early banks and may include a few in-lieu fee systems.

IWR estimates at least 230 banks have been established with some form of bank instrument (although not all have started construction) as of January 2000. If all individual bank sites within the numerous state programs are included, there are at least 370-400 banks. More than fifty percent have been implemented (i.e., signed bank instrument) since the issuance of the Federal Mitigation Banking Guidance. IWR estimates that approximately half of these banks have been developed for the general use (AKA commercial, third party banks).
