Welcome to the Gull Lake Recreation Area

Brainerd, Minnesota

The Gull Lake Recreation Area is well known for its friendly staff, relaxing environs, beautiful sunsets, well-maintained campsites, clean restrooms and safe playground. We also offer a group picnic shelter, a child-friendly beach, interpretive trails and more. All this is within 15 minutes of the Brainerd-Baxter regional retail center. We hope you enjoy your visit!

Gull Lake Dam controls the runoff from 237 square miles of drainage area and the ten lakes of the Gull Lake Chain. The dam raised the lake level approximately five feet. The area around Gull Lake Dam was inhabited several times since 800 B.C. and is the site of several Aboriginal burial mounds.

Gull Lake occupies a basin formed by a receding glacier. In the early 1900s, it provided water for navigation in the Mississippi River below the Twin Cities, for floating logs to saw mills and for powering flour and lumber mills. Now, the dam is utilized for flood control and to enhance recreation and wildlife.

This pamphlet provides you with general information and park rules that will ensure a pleasant and safe visit for all. Please check bulletin boards for more information.
