Requirements for an RFP

An RFP may address one or more of the following areas: planning activities and documents, software development, quality assurance, equipment, operations, maintenance, training, and other services. This section uses the term "system" to refer to all of the above products and services.

The RFP shall comply with Federal regulations that require "to the maximum extent practicable, open and free competition." The State agency shall submit RFPs for FNS approval that contains the following items, as applicable to the scope of the proposal. (Note: Additional items may be required by individual State procurement laws and regulations.)

Introduction and Overview

The Introduction and Overview shall present the purpose and scope of the proposed system.

- _____ Definition and background information to orient the reader
- _____ Reference/include pertinent documentation re: the proposed system
- Organizational responsibilities
- _____ Agency(s)/Program(s) that will use the system
- _____ Relationship(s) of proposed system to agency function and to other systems and organizations
- _____ Major objectives of the proposed system (e.g. improved service delivery, accountability, operational efficiency)

Expected useful life of the proposed system

Type of contract anticipated (e.g. fixed price, cost reimbursement)

- Preferred method of payment for equipment (rental, lease, purchase)
 - Procurement Schedule (not the anticipated *project* schedule) with realistic time frames for pre-proposal conferences, Q&As, proposal deadline, benchmarking, evaluation, date of award, contract negotiations and initiation of work.
 - _ Qualifications how vendors are qualified to do business with the State agency

Current Processing Environment

The RFP shall briefly describe the current IS.

- _____ Current data processing organization
- Existing methods, procedures, systems, applications that the proposed system will support, supplement, change or replace
- _____ Existing hardware configurations and components
- _____ Operating system(s), system utility routines, database management, applications development, and other software currently in use
- Portions of current system environment that are expected to remain in place and interface with the new system, and portions that will be replaced

Workload Data

The RFP shall briefly analyze current and projected workload statistics.

- _____ Statistics for such workload types as:
 - Timesharing sessions or connections
 - Online transactions
 - Batch jobs
 - Demand jobs

Indicate volumes in terms of:

- Regular and peak loads
- Daily, weekly and monthly processing schedules
- Production vs. development environments, if applicable

Provide an incremental growth forecast for various workload data over the expected life of the system

New System Environment

The RFP should describe State agency's expectations of the new IS and detail all of the requirements identified under General System Design. If a general system design was developed for the IAPD, it may be attached in the RFP.

 Itemize improvements that the agency expects to gainNew capabilities
 New capabilities Upgraded existing capabilities
Elimination of deficiencies
 Illustrate proposed data flow and overall view of planned capabilities
 Functions required in qualitative and quantitative terms
 Requirements for interfaces with the operating environment (equipment, communications network, software)
 Itemized equipment required (and statement that any equipment prices offered must be equal to or lower than those currently available to the state from the same vendor under other contracts.)
 Relationship of proposed equipment with other systems
 Proposed integration of new equipment with currently installed equipment state expects to retain
 Requirements for provision of operating software, performance of operating software, and implementation of operating software modifications and revisions
 Database management requirements
 Security and privacy requirements
 Safeguards against fraud, waste, and abuse
 Performance requirements
• Data and accuracy standards (mathematical, logical, legal, transmission)
Data validationTiming (response time and processing time)
 Flexibility in design to provide interfaces with other software and hardware and allow for future growth, changes and improvements
Requirements of the system for:
 Throughput requirements

 Transaction, input/output volumes, frequency Telecommunications transmission rates Data or processing sequencing requirements Timing or turnaround restrictions
 Other performance requirements (stated to assure open competition)
 Commitment to OSI standards to minimize negative effects of proprietary systems
 Constraints and limitations in terms of program requirements, organization, and cost
 Offered solutions should use tried and tested state-of-the-art technology (unless a unique, untested option is specifically sought)
 Clearly delineate between mandatory requirements and optional features sought
 Bidders must disclose any proprietary tools needed to read or modify system code
 Bidders must disclose cost history/trend of licensing fee changes for any products proposed which involve such fees, such as Oracle
 Bidders library (& cost of copying/right to photocopy)

Solicitation Instructions and Conditions

The RFP shall describe specific procurement processes and requirements related to the submission of proposals and itemize all conditions that will be imposed in the resulting contract.

Issuing office and agency manager responsible for procurement

_____ Submission requirements, such as

- Time and date proposals due
- Office to which proposals must be sent

Storage capacity

- Number of copies required
- How proposals must be separated and sealed

Details on additional events and processes, such as

- Pre-proposal conference
- Presentations/demonstrations
- How questions may be submitted, when and how State will respond
- Access to system documentation / bidders library

 Limitations/stipulations imposed on all bidders, such as
Data disclosure and confidentialityCost of preparing proposals
Rejection of proposals
Late proposalsPeriod of validity for proposals
Period of validity for proposals
 Standards for Subcontractors; stipulation that subs are the responsibility of the prime
 Contract termination provisions/procedures (both parties)
 Performance bond requirements
 Penalties for failure to deliver any required products
 "State and FNS reserve royalty-free, nonexclusive and irrevocable license to reproduce, publish, or otherwise use and authorize others to use for Federal Government purposes, the copyright in any software and associated documentation developed under the resulting contract."
 Contract must assure FNS access to the system during design, development, and operation and to pertinent cost records of contractors and subs as FNS considers necessary
 Contractor must sign contract w/ clause prohibiting discrimination against employees on the basis of race, color, sex, religion, age, and national origin.
 No Federal funds may be used for lobbying
 Copeland "Anti-kickback Act", Clean Air Act, Clean Water Act, Debarment Act
 State's standard procurement clauses (see "other" below)
 Any additional conditions applicable to the selected bidder
 Contract period
 Turnover provision or non-transferability
 EEO provisions
 Notice to Cure
 Hold harmless
 Force Majeure

 Procedure to resolve disputes
 Governing law/jurisdiction
 Taxes
 Modification and renewal clause
 Whole RFP may be canceled
 Subject to availability of Federal funds
 Right to waive technicalities
 Precedence of documents (RFP outranks proposal)
 Bidder may not publicize
 Insurance
 State may contact secondary references
 Conflict of Interest
 Confidentiality
 Contractor must disclose if they've ever been terminated (for "cause" or for "convenience")
 Any tasks that must be done on site vs. at contractor's offices
 Alternative proposals allowed or not allowed
 State's right to negotiate "best and final"
 Bidders prohibited from contacting state staff other than procurement office
 Other system contractors or providers with whom bidder must agree to cooperate

Proposal Structure and Content

The RFP shall provide a description of the format and organization for the technical and business proposals.

Require a statement, including personnel background and experience information, of the contractor's proposed project staff.

Require a statement of corporate financial resources, a history of prior involvement in similar projects, and information regarding pending litigation, debarment or suspension

Require bidders to provide a line-item cost statement, covering both development and operational costs, for the expected life of the system

Provide details on general proposal appearance and organization

Include a listing and description of all attachments, supplements, and other supporting documentation required

Provide copies of all specific forms, charts, and worksheets that the bidder is required to submit for both the technical and business proposals

- _____ Headings and Titles (do not construe content)
 - _____ Organization and flow
 - _____ Does the document demonstrate an understanding of FNS requirements?
- References match within the document
- _____ Do dates and dollar figures in text coincide with schedule or budget?
- _____ Do text references to figures and appendices coincide with their titles?
- _____ Have inconsistencies been eliminated?

Integrity of technical information (Have needs been sufficiently articulated?) *Personnel Requirements*

Key project personnel (contractor) clause

- State gets to decide who is "key"
- State's right to approve replacements
- Requirement that bidder disclose all other project assignments and their timeframes of any staff proposed for this project
- State can reserve the right to apply liquidated damages if key personnel remain with the contractor but are not assigned to this project after they are proposed
- State cannot prevent termination of employees by the contractor, but can have stipulations on replacements
- Replacements must meet or exceed qualifications of proposed staff

Contractor personnel résumés

Statement of Work

Remember that the Implementation RFP requires additional information than the Planning RFP.

Desired Schedule

Organization and flow (Do the timetable and expected outcomes make sense?)

Contract Deliverables

The RFP shall provide a detailed summary of expectations and requirements during the life of the contract.

- Products and services the state expects contractor to deliver
- Explain project phasing and how phases relate to deliverables
- _____ Allow for incremental installation of equipment where appropriate
- Identify documentation and operation standards expected
- _____ Requirements for user training, caseload conversion, and system implementation and acceptance when applicable
- Stipulate contractor's responsibility for deliverables
- _____ Require a schedule of proposed work with defined milestones and dates or timeframes
- State the review and approval period for each deliverable
- State review and approval times for deliverables (Caution: avoid blanket statements such as "all deliverables will be reviewed within 10 days of submission"—some deliverables are huge, and sometimes several are delivered simultaneously. Look for distinctions or an escape clause to the general statement.)

Installation, Conversion, Maintenance, and Personnel Requirements

The RFP shall address specific support requirements for the startup phase, system transition, routine operations, maintenance, and system changes.

- _____ Location of the service or product to be delivered
- _____ Site conditions and limitations

Bidder must provide configuration details regarding space, weight, size, and other physical requirements for the system Who is responsible for site preparation Require a plan/schedule for orderly delivery, install and testing of equipment State's requirements for parallel processing, phased implementation, caseload conversion, and uninterrupted service to users and/or clients Requirements for data and application conversion or reprogramming Responsible party and cost for conversion or reprogramming Who provides space, facilities and system support to contractor staff? Require a conversion plan including: issues, requirements, tasks, services, facilities, equipment, and personnel Training requirements – skills to be taught, number of users, location Documentation requirements – user manuals, operating instructions, design descriptions; standards, numbers of copies Specify operational use time in terms of equipment availability and minimum downtime Requirements for on-site maintenance, on-call, and availability of replacement parts Require onsite field modification of equipment on the same basis as furnished to other customers Any need for operations or facilities management to be part of the contract? Any need for additional hardware, software, maintenance or support? Specify the period of availability for services required Specify minimum personnel and experience requirements for development, maintenance, facilities management, or other contractor staff Provide estimates of the level of effort anticipated in terms of person years or other reasonable indicators Describe resources the state will make available

Functional Requirements Document (FRD) – Defines the proposed system and documents system goals, objectives, and programmatic requirements and describes what the new system and/or hardware should do. Definitions are broken down into functional components in a logical sequence with proposed inputs, outputs, and processes.

_____ Describe how the bidder proposes to develop or meet the proposed functional requirements.

Management Plan

The RFP shall describe project oversight that will be provided by the State and the contractor reporting requirements.

State the functional title of the State Project Manager to whom the contractor will report
 Type and frequency of expected project status reports
 Plan for state review and approval of work performed
 Billing method contractor is to use to ensure identification of costs for each Federal and State program
 State vs. Contractor responsibilities

The RFP shall provide a description of the method and criteria for evaluating the technical and business proposals.

 Describe the method the State will use to evaluate proposals
 Provide details on requirements for benchmarks and system demonstrations and on how the results will be factored into the evaluation process
 Specify evaluation criteria and evaluation factor weight distribution
 Indicate not only how points will be awarded for both technical approach and total cost, but also the weight that will be given to each of the two proposal components
 Do the evaluation criteria specify geographic location? When contracting for architectural and engineering (A/E) services, geographic location may be a selection

criteria provided its application leaves an appropriate number of qualified firms to ensure free and open competition.

Contract Award Procedures

The RFP shall provide a description of the method for negotiating and awarding technical and business proposals.

Describe the general contract negotiation and award process, which includes:

- Issuing letters of intent
- Negotiating contract language, if necessary, and
- Signing the contract
