

**Animal Feeds or Animal Feed Ingredients
from States not free of Exotic Newcastle Disease (END)**

END treatment certification:

Animal feeds or animal feed ingredients containing any poultry products or by-products manufactured in States not free of END must be accompanied by a VS Form 16-4 stating:

1. “The animal feed or feed ingredient has been processed using a heat treatment to ensure the destruction of the END virus.” **AND**
2. The certificate must state the time and temperature of the heat treatment that the materials received. These parameters must equal or exceed a treatment of 60 degrees Celsius for 30 minutes.

Other certification requirements have not been determined at this time.
