

Dairy Products for Human Consumption Export to New Zealand

- The Manufacturer's Declaration must be completed by someone with knowledge about the product, including its ingredients and how it was processed.
- Information in the Certificate, including the Manufacturer's Declaration, should be typed, not hand written.
- In Section I.1 of the Manufacturer's Declaration, a line should be drawn through the non-applicable portions.
- For Section 2 of the Manufacturer's Declaration, the exporter must provide documentation from a competent public health agency verifying that the manufacturing facility is regulated/licensed/ and/or inspected as so stated. This supporting documentation must be provided on an annual basis.
- Both pages of the export certificate should be officially sealed by the endorsing VS office.
