

IMPORT HEALTH STANDARD FOR THE IMPORTATION INTO NEW ZEALAND OF UNPROCESSED RABBIT FIBRE FROM ALL COUNTRIES

USER GUIDE

The information in MAF animal and animal product import health standards is presented in numerically ordered sections with descriptive titles. Sections are grouped into one of four parts, designated alphabetically.

Part A. GENERAL INFORMATION contains sections of general interest, including those relating to the legal basis for MAF import health standards and the general responsibilities of every importer of animals and animal products.

Part B. IMPORTATION PROCEDURE contains sections that outline the requirements to be met prior to and during importation. Whether a permit to import is required to be obtained prior to importation is noted, as are conditions of eligibility, transport and general conditions relating to documentation accompanying the consignment.

Part C. CLEARANCE PROCEDURE contains sections describing the requirements to be met at the New Zealand border and, if necessary, in a transitional facility in New Zealand prior to any consignment being given biosecurity clearance.

Part D. ZOOSANITARY CERTIFICATION contains model health certification which must be completed by the appropriate personnel as indicated in the certification and accompany the consignment to New Zealand. When MAF has accepted health certification produced by a government authority in the exporting country as meeting the requirements of the model health certification this is noted. When no health certification is required to accompany consignments Part D. will note “none required”.

PART A. GENERAL INFORMATION

1 IMPORT HEALTH STANDARD

- 1.1 Pursuant to section 22 of the Biosecurity Act 1993, this document is the import health standard for the importation into New Zealand of unprocessed rabbit fibre from all countries.
- 1.2 Obtaining biosecurity clearance for each consignment of unprocessed rabbit fibre imported into New Zealand from all countries is dependent upon the consignment meeting the requirements of this import health standard.
- 1.3 This import health standard may be reviewed, amended or revoked if there are changes in New Zealand's import policy or the animal health status of the originating country, or for any other lawful reason, at the discretion of the Director Animal Biosecurity.

2 IMPORTER'S RESPONSIBILITIES

- 2.1 The importer must obtain a permit to import prior to proceeding with importation (See PART B. IMPORTATION PROCEDURE).
- 2.2 The costs of MAF in performing functions relating to the importation of unprocessed rabbit fibre shall be recovered in accordance with the Biosecurity Act and any regulations made under that Act.
- 2.3 All costs involved with documentation, transport, storage and obtaining a biosecurity direction and/or biosecurity clearance shall be borne by the importer or agent.

3 DEFINITION OF TERMS

biosecurity clearance

As defined by the Biosecurity Act 1993.

biosecurity direction

Direction or authorisation given by an Inspector for uncleared goods to proceed to a transitional facility.

Director Animal Biosecurity

The Director Animal Biosecurity, New Zealand Ministry of Agriculture and Forestry, or any person who for the time being may lawfully exercise and perform the power and functions of the Director Animal Biosecurity.

equivalence

Acceptance by the Director Animal Biosecurity that the circumstances relating to the importation of a consignment are such that the health status of the consignment is equivalent to the health status of a consignment that complies with the requirements of the import health standard.

New Zealand Inspector

As defined by the Biosecurity Act 1993.

MAF

The New Zealand Ministry of Agriculture and Forestry.

Official Veterinarian

A civil service veterinarian or a specially appointed veterinarian, as authorised by the Veterinary Administration of the country.

permit to import

A permit issued by the Director General of MAF pursuant to section 22 1(A) of the Biosecurity Act 1993 upon an importer's demonstration that certain requirements of the import health standard have been met in advance of an importation being made, such that a transitional facility is available to accept the consignment(s). The procedure for application and the information required for a permit to import are detailed within the import health standard.

transitional facility

As defined by the Biosecurity Act 1993. Specifically a facility registered to the *MAF Regulatory Authority Standard 154.02.18 Transitional Facilities for Animal Products*.

4 EQUIVALENCE

- 4.1 It is expected that the animal product will meet the conditions of this import health standard in every respect. If the products do not comply with the requirements, an application for equivalence may be submitted to MAF for consideration. Detailed information supporting the application for equivalence must be forwarded to MAF for a decision.

PART B. IMPORTATION PROCEDURE

5 PERMIT TO IMPORT

- 5.1 An application for a permit to import shall provide the following information:
- (i) name and address of importer
 - (ii) name and address of exporter
 - (iii) description of the unprocessed rabbit fibre to be imported
 - (iv) name and address of the TRANSITIONAL FACILITY to which the consignment is to proceed following importation.
 - (v) whether a permit for multiple consignments is required; in this case a permit will be issued for a period of 12 months.

6 DOCUMENTATION ACCOMPANYING THE CONSIGNMENT

- 6.1 The consignment shall be accompanied by appropriately completed health certification which meets the requirements of PART D. ZOOSANITARY CERTIFICATION.
- 6.2 Documentation shall be in English, but may be bilingual (language of exporting country/English).
- 6.3 It is the importer's responsibility to ensure that any documentation presented in accordance with the requirements of this import health standard is original (unless otherwise specified) and clearly legible. Failure to do so may result in delays in obtaining biosecurity direction and/or clearance or rejection of consignments.

PART C. CLEARANCE PROCEDURE

7 BIOSECURITY DIRECTION

- 7.1 A biosecurity direction may be given by an Inspector under section 25 of the Biosecurity Act 1993 authorising the consignment to move to the transitional facility named in the permit to import, providing that the documentation meets all requirements noted under PART D. ZOOSANITARY CERTIFICATION.

8 TRANSITIONAL FACILITY

8.1 While in the transitional facility the consignment will be subjected to such testing, treatments or procedures required by the Director Animal Biosecurity, including:

8.1.1 Before processing, the hair must be held under secure conditions.

8.1.2 The fibre must be scoured and processed using a hot dyeing method.

8.1.2 All semi-solid and solid waste removed from the fibre during opening and processing shall be collected and disposed of by incineration or deep burial.

8.1.3 The packaging shall either be destroyed by incineration or imported under the Import Health Standard for the Importation into New Zealand of Wool Packs (Used) from All Countries.

9 BIOSECURITY CLEARANCE

9.1 On successful completion of the terms detailed under TRANSITIONAL FACILITY the consignment may, subject to sections 27 and 28 of the Biosecurity Act 1993, be given a biosecurity clearance pursuant to section 26 of the Biosecurity Act 1993.

PART D. ZOOSANITARY CERTIFICATION

10 NEGOTIATED EXPORT CERTIFICATION

10.1 The following documents are recognised by MAF as equivalent to the requirements of PART D. ZOOSANITARY CERTIFICATION, and are approved to accompany imports of unprocessed rabbit fibre into New Zealand from all countries when appropriately completed by a representative of the exporting country's competent authority:

11 MODEL ZOOSANITARY CERTIFICATION

COMMODITY: UNPROCESSED RABBIT FIBRE

CERTIFYING AUTHORITY:

Agency:

Department:

Country:

I. ORIGIN OF THE CONSIGNMENT

II. CONSIGNMENT DESCRIPTION

(i). The commodity contained in this consignment is:

III. DESTINATION OF THE CONSIGNMENT

(i). Name and address of New Zealand importer:

IV. ZOOSANITARY INFORMATION

11.1 Anthrax did not exist in the area of origin at the time the fibre was collected, and the fibre has at no time been kept with fibre from a region where anthrax has occurred.

11.2 The fibre is packed in new clean bales.

Signature of *Official Veterinarian*:

Date:

Name and address of office:

N.B. Official stamp of the government veterinary authority of the exporting country must be applied to all pages of zoosanitary certification.
