

## **Pet Food Exported to Croatia**

Only pet food meeting the requirements of Regulation (EC) 1774/2002 may be exported to Croatia from the United States. Producers must be approved by APHIS as meeting the requirements of Regulation (EC) 1774/2002 before certificates for pet food being exported to Croatia may be endorsed.

For more information on obtaining the required Regulation (EC) 1774/2002 approval, or endorsement of certificates for pet food to Croatia, please contact the APHIS-VS Area Office over the State in which the products are produced. (Export certificates may also be endorsed by the office over the State in which the exporter is located.)

The certificates included on this website are the only ones that may be endorsed by APHIS for pet food to Croatia. No additional certifications should be included.
