

Export of Pet Food to Cuba

For export of pet food to Cuba, please use the letterhead certificate appearing in this IREG entry.

Only pet foods containing dairy, poultry, and fish ingredients are eligible for export to Cuba.

The exporter (manufacturer) is required to provide evidence of negative Salmonella test results for each shipment of products (dry, semi-moist or dehydrated pet foods).

Trade with Cuba is subject to certain restrictions and exporters are advised to review the information found at the following FAS website to be sure they understand and can meet the conditions for export: <http://www.fas.usda.gov/itp/cuba/cuba.asp>.
