Query builder

Welcome to the Query Builder. This tool allows you to find the answers to your own questions, drawing on information in the matched Taking Stock data sets. You can create a report that shows total releases and transfers by state/province, for example, or find out what were the top 10 chemicals sent for recycling in North America in 1998. Or you can generate reports that look at facilities, industry sectors or geographic regions.

If you are looking for a particular facility, you may use the quick search box at the left.

1 Choose the type of report you would like to create:

Interest: [\[Facility\]](#) [\[Industry sector\]](#) [\[Country\]](#) [\[State/province\]](#) [\[Chemical\]](#)

Number of results to be displayed:

2 Select criteria to narrow the scope of your query:

Show results for this geographic area only:

Note: [Mexico data not available.](#)

Take into account all chemicals, a specific chemical or a chemical category:

Take into account data for the following industrial sector(s):

3 Select a single year or a range of years*:

1995 1996 1997 1998

* If you select 1998 only, your query will access the 1998 data set, which includes the newly reporting sectors and transfers to recycling and energy recovery. If you select other years, or 1998 in combination with other year(s), your query will access the 1995-98 data set, which covers manufacturing sectors only and does not include data on recycling/energy recovery.

4 Select the media you want to be included in the report:

Use "" to select on or more categories. The default is "Total reported amounts of releases and transfers".

Use "" to select ONE category by which you want the results to be sorted. The default is "Total reported amounts of releases and transfers".

RELEASES

- On-site releases**
- On-site air emissions
- On-site surface water discharges
- On-site underground injection
- On-site land releases
- Off-site releases**
- Transfers to disposal(except metals)
- Transfers to disposal of metals
- Total releases (On-Site and Off-Site)**

TRANSFERS

- Off-site transfers to recycling (1998 only)**
- Transfers to recycling of metals (1998 only)
- Transfers to recycling (except metals)(1998 only)
- Other off-site transfers for further management**
- Treatment (except metals)
- Sewage/to POTWs (except metals)
- Energy recovery (except metals)(1998 only)

RELEASES AND TRANSFERS

- Total reported amounts of releases and transfers**

 Run the query
