**Subject:** Re: Children's Health & 1.1 Assessing Impact at Congested Border Crossings

I am swamped with end of March reporting, but I wanted to let you know that I am very interested in the Children's Health 'Asthma' initiative 1.1 ...congested border crossings

I have already spoken with someone from the Bicycle and Pedestrian Advisory Committee from Whatcom county and we agree that this would be a great opportunity to train High School Students from White Rock BC and Blaine Washington to do some of the monitoring. The American guy is so gung-ho that he's already got a meeting with the Blaine Principal.

Now of course this is just our suggestion, but it may be the catalyst for them to get our off ramp program into their county. (I was supposed to give a talk at the Bellingham library last October - but was not allowed across the border without a work permit....)

I am also interested in the video project, 6.1 - it also can connect with our work in high schools
