Subject: Re: CEC initiative on children's health and the environment in North America

Re: 6.2 Working with Health Professionals

The Mid-Atlantic Center for Children's Health & the Environment is fully supportive of the notion of having educational materials in Spanish and working to link the PEHSUs with other children's environmental health entities into a functioning network to support the work that we do. The MACCHE has a collaborative agreement with Asociación Argentina de Médicos por el Medio Ambiente. It is for this reason that we are so interested in Spanish language educational materials. We would welcome the opportunity to collaborate with the PEHSU in Mexico, and any other interested PEHSUs, to reach this goal.

Jerry Paulson.
