

United States Department of Agriculture

Animal and Plant Health Inspection Service

Plant Protection and Quarantine

Canadian Border Agricultural Clearance Manual

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Mention of companies or commercial products does not imply recommendation or endorsement by the U.S. Department of Agriculture over others not mentioned. USDA neither guarantees nor warrants the standard of any product mentioned. Product names are mentioned solely to report factually on available data and to provide specific information.

This publication reports research involving pesticides. All uses of pesticides must be registered by appropriate State and/or Federal agencies before they can be recommended.

CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, fish, or other wildlife—if they are not handled or applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.

Introduction

How to Use This Manual

New Edition

This manual supersedes the second edition issued October 1991 and all updates. Destroy the 1991 edition and any earlier obsolete editions!

Users

This manual is for those Federal officers of (U. S. Customs and Border Protection, Food and Drug Administration, U. S. Citizenship and Immigration Services, and Fish and Wildlife Service) authorized to act for Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture (PPQ, APHIS, USDA) at ports of entry along the Canadian border.

Purposes

One purpose of this manual is to enable Federal officers to regulate (determine admissibility of) agricultural articles in the absence of U. S. Customs and Border Protection Agriculture Inspection (CBP AI). Regulate means to:

- ◆ **Prohibit entry** to those articles that pose a threat to the agriculture of the United States.
- ◆ **Release** those articles that this manual authorizes you to release.
- ◆ **Contact CBP AI** on those articles that require extensive inspection, testing, or treatment—or where the cooperator is uncertain as to the likelihood that an article might be carrying pests and/or diseases.

A second purpose of this manual is to provide directions for taking limited action in the absence of CBP AI. U. S. Customs and Border Protection along the Canadian border has agreed to:

- ◆ **Sample** certain agricultural and vegetable seed
- ♦ **Board** aircraft and ships in specified instances
- ◆ **Inspect** horsemeat to make sure it is unfit for human consumption

Authorized Actions Defined

PROHIBIT ENTRY means don't let the article into the United States. You may:

- ♦ Allow the article to be returned to Canada—if this is practicable.
- ◆ Refer the article to CBP AI for a decision if you are uncomfortable about prohibiting entry.
- ◆ Seize the article for destruction if there is immediate likelihood that an article might spread pests. If you decide to seize an article—give the importer or traveler a copy of "Notice to Arriving Traveler."

Use your best professional judgement in selecting the appropriate action to prevent the entry of plant pests and animal diseases.

RELEASE means to admit those articles that pose no pest risk to American agriculture.

CONTACT CBP AI means to consult with a Customs and Border Protection Agriculture Specialist on those articles you're unsure of or where the article requires extensive inspection, testing, or treatment. **Appendix C** is a directory of CBP AI contacts along the Canadian border. Use this directory to contact the appropriate office.

AUTHORIZE MOVEMENT means to allow to go forward under a Custom's bond or a USDA seal.

Where to Go for Help After Hours

If your local CBP AI is unavailable because it's after hours, then contact an officer at John F. Kennedy International Airport, New York:

Passenger (24/7)

Telephone: 718-553-1659, 1660 Fax: 718-553-0294, 0183

Cargo (0800 - 0000, 7 days/week)

Telephone: 718-487-5281

Fax: 718-487-5287

What to Do If You Disagree with Policy

If you disagree with policy in this manual, then contact your local CBP AI port. Your contact may decide to refer the issue to CBP AI Headquarters.

How to Report Errors or Suggest Enhancements

If you want to report an error in this manual, or want to make a suggestion for its improvement, then contact your local CBP AI port or send them the comment sheet in the back of this manual. Your contact will forward your comments or suggestions to the appropriate office for action.

How to Use this Manual to Determine Admissibility

- **1.** Look up the article in the Index. After you locate the article in the Index, go to the appropriate .
- **2.** If the article cannot be found in the Index, then locate its category using the pink, green, or brown tab. Articles are broadly divided into three categories:
 - Animal and animal products (pink)
 - Plant and plant products (green)
 - **♦ Miscellaneous** (brown)

Note that each article may be further divided into subcategories (product categories). The products may then be divided into "origin" categories:

- Canadian origin
- Foreign origin other than Canada
- U.S. products returned

For example, if a Canadian houseplant were presented for entry, you'd go to the section behind the green **Plant** tab. There you'd find the section for **Live Plants**. Finally you'd go to the page that specifies **Canadian Origin**.

- **3.** Use the decision table referred to; either releasing, prohibiting entry to, or referring the article to CBP AI.
- **4.** If you can't locate the article by using the Index or tabs, then contact CBP AI for assistance.

A Caution in Determining Origin

Agricultural products that were grown and harvested in other countries can enter Canadian commerce and be identified to you as Canadian in origin. Obviously, tropical fruits and vegetables like citrus, mangoes, and avocados, cannot have a Canadian origin. Likewise, if fruits like apples, grapes, nectarines, peaches, pears, plums, and sand pears are presented for entry in the dead of winter—their origin is probably somewhere like Chile, not Canada.

If at anytime you are suspicious of origin or hesitant about an agricultural product's origin, contact CBP AI.

Permits, Certificates, and Other Forms

You can find examples of all forms cited in the manual in **Appendix A**.

Procedures

Refer to **Table 1-1** for examples of where to find information in this manual.

TABLE 1-1: Examples of Where to Find Information

If you need to:	Then:
Clear a commercial shipment of beef from Canada	GO to "Meat, Eggs, Milk, and Other Animal Products" on page 2-7 of Chapter 2 behind the pink ANIMAL tab
Clear a commercial shipment of apples from British Columbia	GO to "Fruits, Vegetables, and Herbs" on page 3-17 of Chapter 3 behind the green PLANT tab
Clear a commercial shipment of sand from Ontario	GO to "Quarry Products" on page 4-5 of Chapter 4 behind the brown MISCELLANEOUS tab
Sample agricultural or vegetable seed	GO to "Sampling Seed" on page 5-41 of Chapter 5 behind the white PROCEDURES tab
Board an aircraft or ship	GO to "Boarding Aircraft" on page 5-49 or "Boarding Ships" on page 5-51 of Chapter 5 behind the white PROCEDURES tab

Keeping Your Manual Current

To maintain a manual, a systematic procedure is a must. Here then is a description of how this manual will be supported and maintained:

Transmittals

This manual and its subsequent revisions will be accompanied by transmittal memos. These will be numbered consecutively—allowing you to know if you've missed something.

Knowing What's Revised

Except for changes to the Index, revisions will be marked with arrows or change bars (vertical lines). Deleted material will be marked with angle brackets.

Your Responsibilities

- **1.** Read all revisions when you receive them.
- **2.** Add or replace the revisions to your manual the day you receive them.
- **3.** File the transmittals in the pocket behind the front cover—this is so you'll know if you've missed something.
- **4.** If you've missed a transmittal, let your CBP AI contact know. This contact will send you what you need.
- **5.** Use the comment sheet to let us know if something is wrong or unworkable.

TABLE 2-1: Earthworms, Insects (Including Bees), and Similar Organisms

If:	And:	And from:	And:	And:	Then:
Preserved					RELEASE
A live organism	Earthworms	Canada	In soil	From an area infested with Potato Cyst Nematodes (PCN) ¹	PROHIBIT ENTRY
				From an area free from PCN	RELEASE ²
			No soil		
		Other than		_	REFER to the Animal
		Canada			Product Manual
	Bees			-	GO to Table 2-2
	Plant pests (for example snails and various		-	Accompanied by a permit (PPQ Red and White Label) issued by the USDA ³	RELEASE
	baits)			Lacking a permit	PROHIBIT ENTRY
	Animal			>	REFER to
	disease vectors (for example, sand flies or biting gnats)				the Animal Product Manual

- 1 The areas of Canada regulated for PCN by the Canadian Food Inspection Agency (CFIA) are the following:
 - Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
 - British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
 - ♦ Newfoundland and Labrador: The entire island of Newfoundland
 - Quebec: The Municipality of Saint-Amable
- 2 Because live specimens are perishable, expedite shipments that you are authorized to release.
- 3 This permit may be in the form of a tag or label. If the permit has expired or if the package is torn or open, CONTACT CBP Agriculture Specialist (CBP AS). Because live specimens are perishable, expedite shipments that you are authorized to release.

TABLE 2-2: Bees from All Origins

If from:	And:	Then:
Canada	Accompanied by an export certificate from CFIA dated no more than 10 days prior to shipping and declaring the bees ^{1, 2} to be of Canadian origin from parental livestock produced in Canada	 Verify the export certificate from CFIA. Verify that the packaging is sufficient to prevent the escape of any bee. Verify that the species manifested is one of the six species listed in footnote 1 below. For species other than honey bees, verify that contaminants are not present. For honey bees, the whole hive is not allowed—only packages of bees or queens with attendant workers. Notify APHIS-PPQ Headquarters of the clearance of these regulated organisms³ RELEASE
	Lack an export certificate	PROHIBIT ENTRY
Australia or New Zealand (must be direct flight unless through Honolulu, HI)	Accompanied by an export certificate from AQIS or MAF dated no more than 10 days prior to shipping	 Verify the export certificate from AQIS or MAF. Verify that the packaging is sufficient to prevent the escape of any bee or bee pest (mesh opening must not exceed 1 mm for New Zealand and 2 mm for Australia). Verify that the species manifested is Apis mellifera mellifera. For honey bees, the whole hive is not allowed—only packages of bees or queens with attendant workers. No wax, comb, or honey. Notify APHIS-PPQ Headquarters of the clearance of these regulated organisms³ RELEASE
	Lack an export certificate	PROHIBIT ENTRY
A country other than Canada, Australia, or New Zealand	Accompanied by national government export documents and a valid PPQ Form 526 (Plant Pest Permit)	FORWARD to address on PPQ Form 599 (Red and White Label) for Inspection Station clearance
	Lack export documents and Plant Pest Permit	PROHIBIT ENTRY

- 1 The following bee species can be imported from Canada without a PPQ Form 526, Plant Pest Permit:
 - ◆ Apis mellifera (Honey bee)
 - ♦ Bombus impatiens (Bumble bee)
 - ♦ Bombus occidentalis (Bumble bee)
 - ◆ Megachile rotundata (Alfalfa leafcutter bee)
 - Osmia lignaria (Blue orchard bee)
 - ◆ Osmia cornifrons (Horn-faced bee)

All other species require a PPQ Form 526, Plant Pest Permit.

- 2 New and used bee boards of Canadian origin imported with bee species other than Apis mellifera must meet the entry requirements for wood products.
- 3 Use any one of the following three methods for notification:

By mail to this address:

Bee Imports PPQ, APHIS 4700 River Road, Unit 133 Riverdale, MD 20737-1236

By fax at 301-734-8700

By e-mail to Notification@usda.gov

Other than potato tubers	GO to Table 3-3

TABLE 3-2: Potato Tubers (Seed Potatoes)

If from:	And:	Then:
All provinces of Canada other than	Accompanied by a Canadian Phytosanitary Certificate with appropriate additional declaration ²	RELEASE
Alberta ¹	Lack a Canadian Phytosanitary Certificate with appropriate additional declaration	PROHIBIT ENTRY
The province of Alberta ^{1, 3}	-	
A country other than Canada	-	

- 1 Commercial shipments of seed potatoes, including potato tuber samples for laboratory testing, from any province in Canada are allowed to transit the U.S. to Mexico with a valid PPQ issued T&E Permit and a Canadian Phytosanitary Certificate. Refer to the Manual for Agricultural Clearance for further guidance.
- 2 The Canadian Food Inspection Agency (CFIA) will provide one of the following additional declarations stating that the shipment is free from Potato Cyst Nematodes (PCN):
 - "Field(s) used to produce the seed potato lot(s) in this shipment were surveyed and tested according to the current agreed-upon protocol and Potato Cyst Nematodes (Globodera rostochiensis and Globodera pallida) were not detected." or,
 - "The articles in this shipment were grown in a PCN-free place of production and in a manner to prevent infestation by Potato Cyst Nematodes (Globodera rostochiensis and Globodera pallida)."

For specific requirements related to the establishment of Pest Free Places of Production or Pest Free Production Sites within regulated areas, please see Section 7.0 of the Guidelines on Surveillance and Phytosanitary Actions for the Potato Cyst Nematodes: *Globodera rostochiensis* and *Globodera pallida*, Version 13 dated May 4, 2008.

The areas of Canada regulated for PCN by CFIA are the following:

- Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- ♦ British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- ♦ Newfoundland and Labrador: The entire island of Newfoundland
- Quebec: The municipality of Saint-Amable
- 3 Shipments of seed potatoes from Alberta are suspended pending completion of mutually approved surveys in accordance with the bilateral protocol.

Cut Flowers and Greenery

Canadian Origin

TABLE 3-5: Canadian Origin Cut Flowers and Greenery

If:	Then:
Conifer ¹ Christmas trees or branches	GO to Table 3-6
Commercially produced wreaths or garlands	RELEASE
Other than a commodity listed in the three cells above	GO to Table 3-13

¹ The term *conifer* refers to cone-bearing trees. Common examples include pine, fir, spruce, hemlock, and Douglas fir.

TABLE 3-6: Cut Christmas Trees or Branches

If:	Then:
A pine species (for example, white pine, Scotch or Scots pine)	GO to Table 3-7
Not a pine species (for example, fir, spruce, hemlock, Douglas fir) ¹	GO to Table 3-12

¹ Conifer branches from species **other than pine** and less than 15 mm (1/2 inch) in diameter are **exempt** from gypsy moth certification requirements and may be released.

TABLE 3-7: Cut Pine Christmas Trees or Branches¹

If from:	And:	Then:
New Brunswick or Nova Scotia		GO to Table 3-8
Ontario or Quebec		GO to Table 3-10
A province other than those listed above	 All of the following requirements are met: The trees are accompanied by a certification of origin² stating that they were produced in an area of Canada where gypsy moth is not known to occur³ The trees are accompanied by a statement of origin and movement⁴ that specifies the Canadian province where the trees originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that: The trees originated in and were moved only through areas of Canada not considered to be infested with pine shoot beetle, as determined by the Canadian Food Inspection Agency (CFIA)³, or The trees originated from a province not quarantined for pine shoot beetle and are moved through a province that is infested with pine shoot beetle during October, November, or December, or when ambient air temperature is below 10°C (50°F) (the shipment does not have to be covered or in an enclosed container). The U.S. destination (including county and State) is plainly indicated on the trees or on the outer covering or container 	RELEASE ⁵
	Lacks the documents and indication of destination described above	REFER to CBP AS

- 1 Cut pine Christmas trees or branches of Canadian origin are subject to requirements for both gypsy moth and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., determine the requirements for gypsy moth first, then determine the requirements for pine shoot beetle.
- 2 The certification of origin for gypsy moth is a signed, accurate statement certifying the area in which the trees were grown. The statement may be provided directly on the documents accompanying the tree shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement.
- 3 See Appendix G.
- 4 The statement of origin and movement for pine shoot beetle may be printed directly on the documentation accompanying the shipment, or may be provided on a separate document. The certification does **not** require the signature of a CFIA inspector; exporters may sign the document.
- 5 If the trees are to be moved through an area of the U.S. quarantined for pine shoot beetle (Appendix G), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the trees must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

TABLE 3-8: Cut PINE Christmas Trees or Branches from New Brunswick or Nova Scotia – Gypsy Moth Requirements

Other than a plant listed above	For personal use	REFER to CBP AS
	Commercial	INSPECT 5% of all cut flower shipments following directions in the Cut Flowers and Greenery Import Manual ^{1, 2}
		RELEASE other shipments ³

- 1 Cut flowers grown in Canada may enter the United States during all CBP hours of coverage.
- 2 Flower shipments selected for the required 5% inspection rate (the 5% inspection rate translates to approximately every 20th shipment) must be inspected and released by a CBP AS.
- Outside of CBP AS hours of coverage the following criteria **must** be met:
 - On a yearly basis, provide CBP AS personnel, in each port of entry utilized, one of the following: a current copy of the NAFTA certificate of origin or a signed affidavit certifying cut flower shipments are of Canadian origin. Any updates/changes in the supplier list must be provided to CBP ASs as the changes occur.
 - For each shipment, provide CBP AS personnel advance notification. This advance notice must be provided on company fax letterhead and during the regular staffed hours of CBP AS. The advance notification must also provide the following information: estimated time of arrival, origin, and description of cut flower varieties (the description can be attached and may be in the form of an invoice).

Note: These requirements will allow the CBP AS to select shipments, entering outside of CBP AS regular staffed hours, in advance for inspection as needed. The CBP AS will also provide access to this information to local CBP officers so that CBP officers can determine if the importer has met the conditions listed above.

Foreign Origin Other than Canada

TABLE 3-14: Cut Flowers and Greenery from a Foreign Country OTHER THAN Canada (Including Christmas Trees, Branches, Commercially Produced Wreaths, and Garlands)

Verified Canadian Origin

TABLE 3-15: Verified Canadian Origin Fruits, Vegetables, or Herbs

If:	Then:
Fresh fruits, vegetables, or herbs ¹	GO to Table 3-16
Frozen or dried fruits, vegetables, or herbs ¹	GO to Table 3-22
Preserved or cooked fruits, vegetables, or herbs ¹	GO to Table 3-24

Origin may be verified by thoroughly reviewing the documentation and the shipping containers of shipments presented for entry. It is important to note that fruits and vegetables, which were grown and harvested in other countries, may be identified as Canadian origin. Tropical fruits and vegetables, such as citrus, mangoes and avocados are not grown in Canada and are not Canadian origin. Also, fruits such as grapes, nectarines, peaches, plums, and sand pears presented for entry during winter months may not be of Canadian origin. The origin of these types of fruit is probably a country below the equator, for instance, Chile or South Africa.

Fruits and vegetables presented as from Canada may not necessarily have originated in Canada. Commodities entering Canadian commerce can be considered a product of Canada, however, this designation does not necessarily mean the product's origin is Canadian.

TABLE 3-16: Fresh Fruits, Vegetables, or Herbs of Verified Canadian Origin¹

If:	And:	Then:
Arctostaphylos uva-ursi (bearberry) leaves, Hydrastis canadensis (goldenseal) roots, Lycopodium clavatum (clubmoss) plants, Menyanthes trifoliata (bogbean) leaves, or Panax quinquefolius (North American ginseng) roots ¹	-	REFER to CBP AS

A kind of potato ¹		GO to Table 3-21
Other than a fruit, vegetable, or herb listed in the cells above ¹	Selected for referral	REFER to CBP AS
	Not selected for referral	RELEASE

Origin may be verified by thoroughly reviewing the documentation and the shipping containers of shipments presented for entry. It is important to note that fruits and vegetables, which were grown and harvested in other countries, may be identified as Canadian origin. Tropical fruits and vegetables, such as citrus, mangoes and avocados are not grown in Canada and are not Canadian origin. Also, fruits such as grapes, nectarines, peaches, plums, and sand pears presented for entry during winter months may not be of Canadian origin. The origin of these types of fruit is probably a country below the equator, for instance, Chile or South Africa.

If: And: And: Then: Dry bulb1 Entire bulb **RELEASE** Processed bulb (peeled and chopped) Fresh bulb Entire bulb Accompanied by a phytosanitary certificate (green parts issued by the Canadian Food Inspection present) and Agency (CFIA) containing an additional other plant declaration (AD) that the shipment is free parts² from Acrolepiopsis assectella **PROHIBIT** Accompanied by a phytosanitary certificate **ENTRY** issued by the CFIA lacking the above AD Lacking the above phytosanitary certificate Processed **RELEASE** bulb (peeled and chopped)

TABLE 3-17: Canadian Origin Fresh Alliaceous Vegetables

- 1 Dry bulb refers to alliums which are harvested and then left to cure in the field and placed in storage under controlled conditions to allow the bulbs to dry completely. Dry bulb alliums have a dry, papery outer skin as distinguished from fresh alliums, which are green and soft.
 - Sprout suppressants are sometimes used to avoid sprouting of dry bulbs in storage, but in some situations sprouting might happen. These sprouts originate from storage so green parts related to sprouted dry bulbs do not require a phytosanitary certificate and can be released after inspection.
 - Dry bulb onions (*Allium cepa* var *cepa*) come in a wide range of sizes and shapes, and bulbs might be red, white or yellow. Examples of other dry bulb alliums are dried garlic (*A. sativum*) and dried shallots (*A. cepa* var *aggregatum*).
- Fresh bulb and other plant parts refer to alliums which are harvested fresh and green. They should be targeted by the Leek Moth requirements and be accompanied by a phytosanitary certificate and an additional declaration. Fresh bulb and other plant parts of alliums could be scallions or welsh onions (Allium fistulosum), leeks (A. porrum) and chives (A. schoenoprasum). Garlic (A. sativum), green bunching onions (A. cepa var cepa) and shallots (A. cepa var aggregatum) when harvested and marketed fresh and showing green parts are regulated and should be accompanied by a phytosanitary certificate and an additional declaration.

Dehydrated	Whole, sliced, or diced	Peel is present	Easily flakes off	
			Adheres , not flaking off	PROHIBIT ENTRY
		Peel is absent		RELEASE
	Flakes, granules, powder, or potato flour		-	
Cooked or canned ³			-	

¹ Potatoes that are cut, partially cooked by blanching, and then having half their moisture removed before freezing

TABLE 3-24: Canadian Origin Preserved or Cooked Fruits, Vegetables, or Herbs Sealed in Containers

RELEASE (These fruits, vegetables, or herbs may be subject to U.S. Food and Drug Administration (FDA) regulations. Refer to http://www.fda.gov/ for contact information.)

² For example, hash browns, French fries, mashed potatoes, oven baked potatoes, or roasted potatoes

³ Includes steamed partly processed potato screenings (peels)

Foreign Origin Other than Canada

TABLE 3-25: Fruits, Vegetables, or Herbs from a Foreign Country OTHER THAN Canada

If:	Then:
Fresh or frozen fruits, vegetables, or herbs	GO to Table 3-26
Dried fruits, vegetables, or herbs	GO to Table 3-27
Preserved fruits, vegetables, or herbs	GO to Table 3-28

TABLE 3-26: Fresh or Frozen Fruits, Vegetables, or Herbs from a Foreign Country OTHER THAN Canada

If:	And:	Then:
Bananas	From North, Central, or South America or their adjacent islands	RELEASE
	From outside the Americas	REFER to CBP AS
Cannonball fruit, carob, or tamarind bean pod		RELEASE
Cyperus corm, lily bulb,	Free from soil	
waterchestnut, or waternut	Contaminated with soil	PROHIBIT ENTRY
Ethrogs (noncommercial shipments) ¹	Inspection reveals neither insect stings nor pests ²	RELEASE
	Inspection reveals insect stings or pests	PROHIBIT ENTRY
Grapes	From an APHIS approved shipper in Canada ³	RELEASE
	From any other source	PROHIBIT ENTRY
Mushroom or truffle	Free from soil, compost, or growing material	RELEASE
	Contaminated with growing material	PROHIBIT ENTRY
Potatoes		
Other than a plant listed above		REFER to CBP AS

- 1 Only small amounts (1-3 fruits) in passenger baggage or mail qualify. Refer to CBP AS for commercial shipments.
- 2 Examine the exterior of the ethrogs for surface abnormalities and insect stings. The citrus flower moth, if present, will occur as a larva boring in the outer rind of the fruit. When inspecting for medfly, look for insect stings on the outer surface of the ethrog.
- 3 The following Canadian companies are approved by APHIS to ship fresh Chilean grapes that have met U.S. entry requirements:
 - ♦ Sun Rich Fresh Foods Inc., Richmond, British Columbia, Canada
 - ♦ Sun Rich Fresh Foods Inc., Brampton, Ontario, Canada

TABLE 3-27: Dried Fruits, Vegetables, or Herbs from a Foreign Country OTHER THAN Canada

If:	Then:
Panax quinquefolius (North American ginseng) roots	REFER to CBP AS
Citrus of any kind	PROHIBIT ENTRY
Other than North American ginseng, or citrus	RELEASE ^{1, 2}

¹ May be subject to U.S. Food and Drug Administration (FDA) regulations. Refer to http://www.fda.gov/ for contact information.

TABLE 3-28: Preserved Fruits, Vegetables, or Herbs Sealed in Containers from a Foreign Country OTHER THAN Canada

If:	And is:	Then:
Commercially preserved and sealed (sterilized)		RELEASE ¹
Homemade	Cannonball fruit, carob, <i>Cyperus</i> corm, lily bulb, mushroom, tamarind bean pod, truffle, waterchestnut, or waternut	
	Other than a fruit, vegetable, or herb listed in the cell above	PROHIBIT ENTRY

¹ May be subject to FDA regulations.

² If a garlic bulb, regulate as fresh (see **Table 3-26**).

U. S. Produce Returned

In most instances you can release fruits and vegetables if you can verify that they are of U. S. origin. Use accompanying documents on fruit and labels on containers to establish origin. If at any time you are in doubt of the produce's origin, regulate as if the produce were of foreign origin.

Fresh produce of foreign origin is often permitted to transit the United States on its way to Canada. Since the transiting produce may be prohibited entry into the United States, **don't let it back into the United States without PPQ's concurrence.** Apples, citrus, grapes, mangoes, nectarines, peaches, pears, plums, and sandpears are examples of fruits prohibited entry into the United States that may be allowed to transit.

Evidence of Origin

Evidence of origin can come from labeling, sales receipts, and answers to your questions. Most often it will be the cumulative evidence that will confirm the origin of the produce.

Citrus

In the case of citrus, **undeniable proof of origin** is an entry requirement. The only example of undeniable proof of origin is labeling declaring U.S. origin on a sealed, unopened bag of fruit.

Stickers on small quantities of non-commercial produce that provide evidence that the fruit originated in the U.S. suffices as adequate proof of origin, but only for U.S. traveler(s) returning to the U.S. after transiting Canada.

TABLE 3-29: Fresh Produce of U.S. Origin Being Returned from Canada

If you can verify that the produce originated in:	And:	Then:
Hawaii, Puerto Rico, or the U.S. Virgin Islands	Is in a sealed package bearing an official PPQ stamp impression "TREATED AND RELEASED" or "RELEASED"	RELEASE
	Is not in a sealed package or lacks the impression described above	REFER to CBP AS
Originated in the continental	Is corn	GO to Table 3-30
United States	Is other than corn	RELEASE

Plant

Timber Products

Canadian Origin

TABLE 3-36: Canadian Origin Timber Products¹

If:	And:	Then:
Firewood		GO to Table 3-37
Forest litter, mulch, sawdust, or shavings		REFER to CBP AS
Logs		GO to Table 3-38
Lumber	A pine (<i>Pinus</i>) species with pieces of bark larger than 1 inch attached	REGULATE as logs; GO to Table 3-39
	A pine species without bark or with pieces of bark 1 inch or smaller attached	RELEASE
	An ash (<i>Fraxinus</i>) species with pieces of bark attached	REGULATE as logs; GO to Table 3-45
	An ash species without bark	RELEASE
	Not a pine or ash species	
Wood chips ² , bark, or	An ash (Fraxinus) species	GO to Table 3-47
bark chips	A pine (Pinus) species	GO to Table 3-48
	Not an ash or pine species	REFER to CBP AS

- 1 Includes railroad crossties and mulch.
- No permit is required for wood chips of any size that are derived from recycled wood pallets of Canadian origin. If wood chips are accompanied by a document carrying a statement that the wood chips have been derived from pallets, then inspect and RELEASE the shipment. The statement may be affixed to any official Canadian document, a company's letterhead, or the manifest.

TABLE 3-37: Canadian Origin Firewood

If:	And the shipment is:	And:	Then:
A softwood (conifer) ¹		-	REGULATE as logs; GO to Table 3-38
A hardwood ¹	Commercial ²	Accompanied by a treatment certificate ³ declaring that the firewood was heat treated (HT) at 71.1 °C (minimal core temperature) for 75 minutes	RELEASE ⁴
		Lacks above HT certificate	PROHIBIT ENTRY
	Noncommercial ⁵	Accompanied by a treatment certificate or attached commercial treatment label declaring that the firewood was heat treated (HT) at 71.1 °C (minimal core temperature) for 75 minutes	RELEASE
		Lacks above HT certificate or label	PROHIBIT ENTRY

- 1 Refer to the Firewood Job Aid to determine whether the firewood is a softwood or a hardwood.
- 2 Commercial shipments require the above certification on or after December 15, 2008.
- 3 Refer to "Heat Treatment Certificate Using a Kiln Facility" on page A-37.
- 4 Treated firewood may still harbor pests. Inspect treated firewood periodically to monitor for pests.
- Noncommercial shipments require the above certification or treatment label on or after January 1, 2009.

TABLE 3-38: Canadian Origin Logs

If:	Then:	
A species of pine (Pinus)	GO to Table 3-39	
A species of ash (Fraxinus)	GO to Table 3-45	
A species other than pine or ash	GO to Table 3-46	

TABLE 3-39: Canadian Origin Pine Logs¹

If from:	And:	Then:
New Brunswick or Nova Scotia		GO to Table 3-40
Ontario or Quebec		GO to Table 3-41
A province other than those listed above	 All of the following requirements are met: The logs are accompanied by a certification of origin² stating that the logs were produced in an area of Canada where gypsy moth is not known to occur³ The logs are accompanied by a statement of origin and movement⁴ that specifies the Canadian province where the logs originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that the logs originated in and were moved only through areas of Canada not considered to be infested with pine shoot beetle, as determined by the CFIA³ The U.S. destination (including county and State) is plainly indicated on the logs or, if applicable, on the outer covering, packaging, or container 	RELEASE ⁵
	Lacks the documents and indication of destination described above	REFER to CBP AS

- 1 Canadian origin pine logs with bark attached are subject to requirements for both gypsy moth and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., determine the requirements for gypsy moth first, then determine the requirements for pine shoot beetle.
- 2 The certification of origin for gypsy moth is a signed, accurate statement certifying the area in which the logs originated. The statement may be provided directly on the documents accompanying the log shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement.
- 3 See Appendix G.
- 4 The statement of origin and movement for pine shoot beetle may be printed directly on the documents accompanying the shipment, or may be provided on a separate document. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement.
- 5 If the logs are to be moved through an area of the U.S. quarantined for pine shoot beetle (Appendix G), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the logs must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

TABLE 3-40: Pine Logs from New Brunswick or Nova Scotia

If from:	And destined to:	And:	Then:
A Canadian area infested with gypsy moth ¹	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth ^{1, 2}		RELEASE
	An area in the U.S. not infested with gypsy moth	Accompanied by a Canadian phytosanitary certificate with one of the following additional declarations:	
		 "The logs have been inspected and found free of gypsy moth." or 	
		 "The logs have been treated for gypsy moth in accordance with the Plant Protection and Quarantine Treatment Manual." 	
		Without the above certification	PROHIBIT ENTRY
A Canadian area not infested with gypsy moth	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth ^{1, 2}		RELEASE
	An area in the U.S. not infested with gypsy moth	Accompanied by a certification of origin ³ stating that the logs were produced in an area of Canada where gypsy moth is not known to occur	
		Without the above certification	PROHIBIT ENTRY

1 See Appendix G.

- 2 Logs destined to a gypsy moth infested area, but moving through a U.S. noninfested area (other than noninfested areas in the counties of Aroostock, Franklin, Oxford, Penobscot, Piscataquis, and Somerset, ME) must meet entry requirements for logs destined to gypsy moth noninfested areas.
- 3 The certification of origin is a signed, accurate statement certifying the area in which the logs originated, and stating that the logs were produced in an area of Canada where gypsy moth is not known to occur. The statement may be provided directly on the documents accompanying the log shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement. Oral declarations are acceptable for noncommercial shipments.

If from: And destined to: And: Then: A Canadian The States of CT, GO to area infested DE, DC, MA, MD, MI, **Table 3-42** with gypsy NH, NJ, NY, PA, RI, $moth^1$ VT, or other areas in the U.S. infested with gypsy moth^{1, 2} An area in the U.S. Accompanied by **one** of the following: **not** infested with 1. A Canadian phytosanitary gypsy moth certificate with one of the following additional declarations: ◆"The logs have been inspected and found free of gypsy moth." ◆"The logs have been treated for gypsy moth in accordance with the Plant Protection and Quarantine Treatment Manual." OR 2. A copy of an APHIS compliance agreement which is acceptable proof of destination to a specified U.S. processing plant or mill for handling or processing Without the above certification **PROHIBIT ENTRY** A Canadian The States of CT, GO to area not DE, DC, MA, MD, MI, **Table 3-42** infested with NH, NJ, NY, PA, RI, gypsy moth VT, or other areas in the U.S. infested with gypsy moth^{1, 2} An area in the U.S. Accompanied by a certification of **not** infested with origin³ stating that the logs were produced in an area of Canada where gypsy moth gypsy moth is not known to occur Without the above certification **PROHIBIT ENTRY**

TABLE 3-41: Pine Logs from Ontario or Quebec – Gypsy Moth Requirements

1 See Appendix G.

- 2 Logs destined to a gypsy moth infested area, but moving through a U.S. noninfested area (other than noninfested areas in the counties of Aroostock, Franklin, Oxford, Penobscot, Piscataquis, and Somerset, ME) must meet entry requirements for logs destined to gypsy moth noninfested areas.
- 3 The certification of origin is a signed, accurate statement certifying the area in which the logs originated, and stating that the logs were produced in an area of Canada where gypsy moth is not known to occur. The statement may be provided directly on the documents accompanying the log shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement. Oral declarations are acceptable for noncommercial shipments.

TABLE 3-42: Pine Logs from Ontario or Quebec – Pine Shoot Beetle Requirements

If destined to:	And:	Then:
An area in the	Both of the following conditions are met:	RELEASE
U.S. infested with pine shoot beetle ¹	 The logs are accompanied by a statement of origin and movement² or a Canadian phytosanitary certificate³ The U.S. destination (including State and county) of the logs is plainly indicated on the logs or on the outer container (if in a container)⁴ 	
	Both of the conditions in the above cell are not met	PROHIBIT ENTRY

If from:	And from:	And:	Then:
Ontario or Quebec	Areas infested with pine shoot beetle	Moving to U.S. areas infested with pine shoot beetle	GO to Table 3-49
		Moving to or through U.S. areas not infested with pine shoot beetle	GO to Table 3-50
	Areas not infested with pine shoot beetle	Moving to U.S. areas infested with pine shoot beetle	GO to Table 3-49
		Moving to or through U.S. areas not infested with pine shoot beetle	GO to Table 3-51
A province other than Ontario or Quebec		-	GO to Table 3-52

TABLE 3-49: Pine Wood Chips, Bark, Bark Chips, or Nuggets from Ontario or Quebec Moving to U.S. Areas Infested with Pine Shoot Beetle

If:	Then:
Both of the following requirements are met:	RELEASE
 The regulated articles are accompanied by a statement of origin and movement that specifies the county or municipal regional county and province where the articles originated, and if applicable, the counties or municipal regional counties and provinces they were moved through, if different from the county or municipal regional county and province of origin, and also states that the regulated articles originated in and were moved through one or more provinces of Canada considered to be infested or partially infested with pine shoot beetle, as determined by the CFIA. The U.S. destination (including county and State) is plainly indicated on the 	
articles or, if applicable, on the outer covering, packaging, or container.	
Both of the conditions above are not met	PROHIBIT ENTRY

TABLE 3-50: Pine Wood Chips, Bark, Bark Chips, or Nuggets from Areas in Ontario or Quebec Infested with Pine Shoot Beetle Moving to U.S. Areas NOT Infested with Pine Shoot Beetle

If:	Then:
One of the following sets of conditions is met:	RELEASE ¹
 The regulated articles are accompanied by a phytosanitary certificate that specifies the county or municipal regional county and province where the articles originated, and if applicable, the counties or municipal regional counties and provinces they were moved through, if different from the county or municipal regional county and province of origin. The treatment section of the certificate must indicate that the articles have been treated with methyl bromide to kill pine shoot beetle. In addition, the U.S. destination (including county and State) must be plainly indicated on the articles or, if applicable, on the outer covering, packaging, or container. The regulated articles consist of pine bark and are accompanied by a phytosanitary certificate that specifies both the county or municipal regional county and province where the regulated articles originated and, if applicable, the counties or municipal regional counties and provinces they were moved through, if different from the the county or municipal regional county and province of origin. The additional declaration section must state, "The pine bark in this shipment has been ground into pieces less than or equal to 1 inch in diameter." In addition, the U.S. destination (including county and State) of the regulated articles must be plainly indicated on the regulated articles or, if applicable, on the outer covering, packaging, or container. 	
3. The regulated articles are shipped from a CFIA-approved facility that processes only regulated articles that originated in areas in Canada or the United States not considered to be infested with pine shoot beetle. The name and address (including the county or municipal regional county and Province) of the CFIA-approved facility that shipped the articles, as well as the U.S. destination (including county and State) must be plainly indicated on the regulated articles or, if applicable, on the outer covering, packaging, or container.	
4. The regulated articles, consisting of pine bark, are shipped from a CFIA-approved facility for use as a fuel at a cogeneration facility in the United States approved by APHIS. The pine bark must be transported by as direct a route as reasonably possible and not off-loaded en route to the U.S. cogeneration facility. The name and address (including the county or municipal regional county and Province) of the CFIA-approved facility that shipped the pine bark, as well as the name and address of the U.S. cogeneration facility receiving the shipment (including county and State) must be plainly indicated on the outer covering, packaging, or container of the pine bark.	
None of the above conditions are met	PROHIBIT ENTRY

1 If the regulated articles are to be moved through an area of the U.S. quarantined for pine shoot beetle (Appendix G), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the articles must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

TABLE 3-51: Pine Wood Chips, Bark, Bark Chips, or Nuggets from Areas in Ontario or Quebec NOT Infested with Pine Shoot Beetle Moving to U.S. Areas NOT Infested with Pine Shoot Beetle

If:	Then:
One of the following sets of conditions is met:	RELEASE ¹
1. The regulated articles are accompanied by a phytosanitary certificate that specifies the county or municipal regional county and province where the regulated articles originated and, if applicable, the counties or municipal regional counties and provinces they were moved through, if different from the county or municipal regional county and Province of origin. The certificate also must contain the following additional declaration: "These regulated articles originated in and were moved only through areas where pine shoot beetle (<i>Tomicus piniperda</i>) is not present, as determined by the CFIA." In addition, the U.S. destination (including county and State) must be plainly indicated on the regulated articles or, if applicable, on the outer covering, packaging, or container; or	
2. The regulated articles are consigned to a designated U.S. facility that operates under a compliance agreement with APHIS in accordance with § 319.40-8 for specified handling or processing of the articles. The name and address of the U.S. facility (including county and State) receiving the regulated articles must be plainly indicated on the articles or, if applicable, on the outer covering, packaging, or container.	
None of the above conditions is met	PROHIBIT ENTRY

1 If the regulated articles are to be moved through an area of the U.S. quarantined for pine shoot beetle (Appendix G), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the articles must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

TABLE 3-52: Pine Wood Chips, Bark, Bark Chips, or Nuggets from Provinces OTHER THAN Ontario or Quebec

If:	Then:
Both of the following requirements are met:	RELEASE ¹
1. The regulated articles are accompanied by a statement of origin and movement that specifies the province where the articles originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that the regulated articles originated in and were only moved through provinces of Canada not considered to be infested or partially infested with pine shoot beetle, as determined by the CFIA; and	
The U.S. destination (including county and State) is plainly indicated on the regulated articles or, if applicable, on the outer covering, packaging, or container.	
Both of the conditions above are not met	PROHIBIT ENTRY

1 If the regulated articles are to be moved through an area of the U.S. quarantined for pine shoot beetle (**Appendix G**), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the articles must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

Plant: Live Plants Canadian Origin

- 2 The term "citrus" refers to all genera, species, and varieties of the subfamilies Aurantioideae, Rutoideae, and Toddalioideae of the botanical family Rutaceae, and includes such plants as Boronia, XCitrofortunella mitis (calamondin), Calodendrum capense (cape chestnut), China flower, Citrus medica (citron), Fortunella (kumquat), Citrus X paradisi (grapefruit), Citrus limon (lemon), Citrus aurantiifolia (lime), Citrus sinensis (orange), Murraya paniculata (orange-jessamine), Ruta spp. (rue), Citrus X tangelo (tangelo), and Citrus reticulata (tangerine).
- 3 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora.
- 4 The palm family includes over 100 cultivated genera, some of which are prohibited entry into the United States. CFIA will not issue a phytosanitary certificate for prohibited plants.
- 5 The common bedding plant called a geranium is really in the genus *Pelargonium*. While plants of the genus *Geranium* are not host to *Ralstonia solanacearum* race 3 biovar 2, geraniums (*Pelargonium* sp.) plants are a separate species from *Geranium* spp. and are regulated differently due to disease risk.
- 6 The phytosanitary certificate may be CFIA Form 1327, CFIA Form 4743, or CFIA/ACIA 5378.

TABLE 3-56: Reported Hosts of Swede Midge

Scientific Name	Common Name
Armoracia rusticana	Horseradish
Brassica napus (all varieties)	Includes: Rape, Colza, Rutabaga, Swede, Swedish Turnip, Siberian Kale, Hanover Salad, etc.
Brassica oleracea (all varieties)	Includes: Wild Cabbage, Kale, Collards, Chinese Kale, Broccoli, Cauliflower, Head Cabbage, Brussels Sprouts, Kohlrabi, etc.
Brassica rapa (all varieties)	Chinese Cabbage, Rapini, Turnip
Lepidium sativum	Garden Cress
Nasturtium amphibium	Tall Nasturtium
Nasturtium officinale	Watercress
Nasturtium palustre	Marsh Watercress
Nasturtium silvestre	Creeping Watercress
Raphanus sativus (all varieties)	Chinese Radish

TABLE 3-57: Canadian Origin Hosts of Swede Midge

If from:	And:	Then:
An area of Canada infested with swede midge ¹	Produced under the Swede Midge Certification Program (SMCP) and accompanied by the SMCP sticker indicating it meets the USDA requirements for entry	GO to Table 3-62
	Lacks the above sticker	PROHIBIT ENTRY
All areas of Canada other than those listed above	Accompanied by a phytosanitary certificate that indicates origin from a non-infested area of Canada, or Produced under the Canadian Greenhouse Certification Program and accompanied by the appropriate sticker indicating the material meets USDA requirements in lieu of a phytosanitary certificate, or Produced under the SMCP and accompanied by the appropriate sticker indicating the material meets USDA requirements in lieu of a phytosanitary certificate	GO to Table 3-62
	Lacks a phytosanitary certificate or the above sticker	PROHIBIT ENTRY

- 1 The areas of Canada infested with swede midge are as follows:
 - ♦ Ontario: The city of Toronto and the counties of Brant, Dufferin, Durham, Halton, Hamilton-Wentworth, Niagara, Norfolk, Oxford, Simcoe, Victoria, Waterloo, Wellington, or York.
 - Quebec: The counties of Argenteuil, Communauté Urbaine de Montréal, Deux-Montagnes, Haut-Richelieu, Jardins-de- Napierville, Laval, La Vallée-du- Richelieu, Mirabel, Montcalm, Roussillon, Rouville, Therese-de- Blainville, or Vaudreuil- Soulanges.

TABLE 3-58: Canadian Origin CITES Regulated Plants Grown Indoors

If:	And:	And:	Then:
Grown at a greenhouse participating in the Canadian greenhouse	CITES documents ² accompany the shipment	Entering a designated port ³	REFER to PPQ or CBP AS
certification program ¹		Not entering a designated port	HAVE the importer reroute the plants to a designated port (if appropriate, safeguard under plant quarantines first). Shipping and handling charges are to be borne by the importer ⁴ .

plant (see Appendix F for a list)	Not accompanied by the above form	PROHIBIT ENTRY
Grass sod or any	Accompanied by a Canadian Phytosanitary Certificate ^{1, 2}	RELEASE
plant other than those listed above	Lacks a Canadian Phytosanitary Certificate	PROHIBIT ENTRY

1 If the article is from a Potato Cyst Nematode (PCN) regulated area, the Canadian Food Inspection Agency (CFIA) will provide an additional declaration "The articles in this shipment were grown in a PCN-free place of production and in a manner to prevent infestation by Potato Cyst Nematodes (Globodera rostochiensis and/or G. pallida)."

- Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- ♦ Newfoundland and Labrador: The entire island of Newfoundland
- ◆ Quebec: The municipality of Saint-Amable
- 2 The phytosanitary certificate may be CFIA Form 1327, CFIA Form 4743, or CFIA/ACIA 5378.
- 3 The common bedding plant called a geranium is really in the genus *Pelargonium*. While plants of the genus *Geranium* are not host to *Ralstonia solanacearum* race 3 biovar 2, geraniums (*Pelargonium* sp.) plants are a separate species from *Geranium* spp. and are regulated differently due to disease risk.
- 4 If a shipment is not in compliance with permit conditions, CONTACT PPQ PERMIT SERVICES at 1-877-770-5990.

TABLE 3-71: Canadian Origin Pine Trees with Roots¹

If from:	And:	Then:
New Brunswick or Nova Scotia		GO to Table 3-72
Ontario or Quebec	-	GO to Table 3-73
A province or area other than those listed in the two	Accompanied by a USDA Import Permit and a Canadian Phytosanitary Certificate ^{2, 3} specifying a place of origin where gypsy moth is not known to occur ⁴	RELEASE
cells above	Not accompanied by the above documentation	REFER to CBP AS

- 1 Canadian pine trees with roots are subject to requirements for potato cyst nematodes, gypsy moth, and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., check to make sure potato cyst nematode requirements are met (see **Table 3-64 on page 33-53**), then determine the requirements for gypsy moth and pine shoot beetle.
- 2 If the article is from a Potato Cyst Nematode (PCN) regulated area, the Canadian Food Inspection Agency (CFIA) will provide an additional declaration "The articles in this shipment were grown in a PCN-free place of production and in a manner to prevent infestation by Potato Cyst Nematodes (Globodera rostochiensis and/or G. pallida)."

- Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- Newfoundland and Labrador: The entire island of Newfoundland
- Quebec: The municipality of Saint-Amable
- 3 The phytosanitary certificate may be CFIA Form 1327, CFIA Form 4743, or CFIA/ACIA 5378.
- 4 See Appendix G.

	◆ The seed was cleared in the U.S. ³		
	None of the above conditions apply	Accompanied by a Phytosanitary Certificate or a Certificate of Seed Analysis (CFIA Form 5289)	REFER to CBP AS
		Not accompanied by either of the above forms	PROHIBIT ENTRY

- 1 If shipment is refused (infested with noxious weeds, diseases, or plant pests) CONTACT PPQ.
- 2 To establish proof of U.S. origin, the importer must provide the following documentation:
 - ◆ Export documents indicating the quantity of seed and number of containers, the date of exportation from the United States, the distinguishing marks on the containers at the time of exportation, and the name and address of the United States exporter; **OR** both of the following:
 - A document issued by a Customs or other government official of the country to which the seed was exported indicating that the seed was not admitted into the commerce of that country; and
 - A document issued by a Customs or other government official of the country to which the seed was exported indicating that the seed was not commingled with other seed after being exported to that country.
- 3 The U.S. Customs entry form must be stamped "I & R" and documentation of sale from a U.S. company to a Canadian company must be present.
- 4 See Appendix D for a list of exporters authorized to use the seed export label.
- 5 A U.S. issued Phytosanitary Certificate must be present.

	Stone, marble, slate, or limestone	RELEASE

¹ Includes sand, gravel, stone, marble, slate, or limestone.

Soil, Compost, and Peat

Canadian Origin

TABLE 4-4: Soil, Compost, and Peat (including peat moss and sphagnum moss) from Canada

If:	And:	And:	Then:
Peat, peat moss, or sphagnum	Commercially packaged and free from contaminants ¹	-	RELEASE
moss	Not as described above		CONTACT CBP AS
Soil ² or compost	From an area infested with potato cyst nematodes (PCN) ³	Accompanied by a soil permit (including tag or label) issued by USDA	RELEASE
		Lacks a permit as described above	PROHIBIT ENTRY
	From an area free from PCN		RELEASE
Soil-like material not fitting the above descriptions (including decomposed manure)		-	CONTACT CBP AS

- 1 Pure peat or commercially baled and packaged peat moss rarely poses a soil risk. Other contaminants could be plant pests, including weed seeds.
- 2 If a plant in soil, see Live Plants on page 3-47.
- 3 The areas of Canada regulated for PCN by the Canadian Food Inspection Agency (CFIA) are the following:
 - ♦ Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
 - British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
 - ◆ Newfoundland and Labrador: The entire island of Newfoundland
 - ◆ Quebec: The municipality of Saint-Amable

Foreign Origin Other than Canada

TABLE 4-5: Soil, Compost, and Peat from a Foreign Country OTHER THAN Canada

If:	And:	Then:
Peat or sphagnum	Free from soil ¹ , plant debris, and pests	RELEASE
	Not clean as described above	CONTACT CBP AS
Soil or compost	Accompanied by a soil permit (including tag or label) issued by the USDA	RELEASE
	Lacks a permit as described above	PROHIBIT ENTRY
Soil-like material not fitting the above descriptions (including decomposed manure)		CONTACT CBP AS

Soil is the loose surface material of earth in which plants grow; usually consisting of disintegrated rock (sand, silt, and clay) with an admixture of humus and soluble salts. Pure peat, washed sand and gravel, and stone and quarry products are **not** considered soil. Soil may be a contaminant or imported as such. Use this decision table to regulate both kinds.

Used Containers

Canadian Origin

Procedures

Clearing Seed for Planting

All Origins

Use the following decision tables to determine what action to take on seed regulated by the **Federal Seed Act (FSA).** If you have questions about any of the following procedures, contact the Seed Examination Facility (SEF) at (301) 504-8605.

Before following any directions on this page, make sure the shipment is for planting. If it is not, then refer to **Table 3-82** in the **Plant** section of this manual behind the green tab.

TABLE 5-1: Seed from All Origins

If the seed is:	And:	Then:
Moving under Departmental Permit (PPQ Form 588)	Conditions of the permit are met	RELEASE
	Conditions of the permit are not met	CONTACT a CBP Agriculture Specialist (CBP AS)
Agricultural or vegetable (refer to "A List of Agricultural and Vegetable Seed Regulated by the Federal Seed Act" on page 5-17)		GO to Table 5-2
Other than agricultural or vegetable		GO to Table 5-3

TABLE 5-2: Agricultural and Vegetable Seed from All Origins

If origin is:	And:	And:	And:	Then:
Canada	Accompanied by a declaration of labeling ¹	Accompanied by the original or a copy of PPQ Form 925, Seed Analysis Certificate, for each lot, a Canadian Seed Analysis Certificate (CFIA Form 5289 ²), or a Seed Export Label (CFIA Form 5309 ³) (See Appendix A)		GO to Table 5-4 on page 5-6
		Lacks the above documentation		GO to Table 5-5 on page 5-7
	Lacks a declaration of labeling		-	PROHIBIT ENTRY
United States (returned)			-	GO to Table 3-91 on page 3-78
Other than Canada or United States	Accompanied by a declaration of labeling ¹	Accompanied by a Canadian Seed Analysis Certificate (CFIA Form 5289), or a Seed Export Label (CFIA Form 5309)	-	RELEASE
		Accompanied by a Phytosanitary Certificate	Port has a CBP AS	REFER to CBP AS for inspection
			Port does not have a CBP AS	USE the procedures for "Sampling Seed" on page 5-41
		Lacks the above documentation		PROHIBIT ENTRY
	Lacks a declaration of labeling		-	

A declaration of labeling is defined as "a written statement of a grower, shipper, processor, dealer, or importer giving for any lot of seed the kind, variety (if vegetable), lot number, origin, and the use for which the seed is intended." This is usually the invoice and labeling on the containers. If any seed in the lot has been treated, the label must indicate that the seed has been treated, and the commonly accepted coined, chemical (generic), or abbreviated chemical name is shown. A statement must also be shown on labels of treated seed that the seed is not to be used for food, feed, or oil purposes.

² See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.

³ See Appendix D for a list of exporters authorized to use the seed export label.

TABLE 5-3: Seed OTHER THAN Agricultural or Vegetable from All Origins

If the origin is:	And:	Then:
Canada		GO to Table 3-89 on page 3-76
Other than Canada	Is accompanied by a Phytosanitary Certificate issued by the country of origin	REFER to CBP AS for inspection
	Is accompanied by a Canadian Seed Analysis Certificate (CFIA Form 5289¹) or a Seed Export Label (CFIA Form 5309²)	RELEASE
	Lacks the above documentation	PROHIBIT ENTRY

- 1 See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.
- 2 See Appendix D for a list of exporters authorized to use the seed export label.

Canadian Origin With SAC

TABLE 5-4: Canadian Origin Seed Accompanied by a Seed Analysis Certificate (SAC)

If:	And:	And:	And:	Then:
The SAC is issued by an accredited	ed by information on the declaration	The SAC states in Block 18 that the seed meets FSA requirements		RELEASE; Send original SAC (if it is with the
laboratory (refer to "Appendix D" on page D-1)	of labeling matches the information ¹ on the SAC	matches the information that the seed does not meet	The seed is consigned to an approved facility (see "Appendix D" on page D-1)	shipment) and invoice to SEF
page D 1)			The seed is not consigned to an approved facility	PROHIBIT ENTRY
	The information on the declaration of labeling does not match the information on the SAC	The seed is a mixture of peas and a grain (oats, barley, triticale, etc.)	The seed is accompanied by copies of SACs issued on each of the components of the mixture, and the lot of the mixture is composed of, at least in part, the combined lot numbers of the components	RELEASE; Send the copies of the SACs of the components and the invoice to the SEF
			The shipment does not meet the requirements specified in the cell above	PROHIBIT ENTRY
		The seed is corn seed that is bagged rather than in bulk	The lot is accompanied by a copy of an SAC issued on the bulk lot of corn seed, and the lot number of the corn seed is composed of, at least in part, the lot number of the bulk seed shown on the SAC	RELEASE; Send the copy of the SAC and the invoice to the SEF
			The shipment does not meet the requirements specified in the cell above	PROHIBIT ENTRY
		The seed is neither a pea/grain mixture nor corn that is bagged rather than in bulk	-	
The SAC is not issued by an accredited laboratory			-	

¹ With respect to kind, variety name, lot number, and treatment labeling.

Canadian Origin Without SAC

TABLE 5-5: Canadian Origin Seed Lacking a Seed Analysis Certificate (SAC)

If shipment is:	And the seed is:	Then:
Consigned to an approved facility (refer to Appendix D)		 FORWARD the shipment to the approved facility under CBP bond. SEND a copy of the invoice to the SEF.
Not consigned to an	Agricultural ¹	GO to Table 5-6
approved facility	Vegetable ¹	GO to Table 5-7

¹ To determine if the seed is agricultural or vegetable, see "A List of Agricultural and Vegetable Seed Regulated by the Federal Seed Act" on page 5-17

TABLE 5-6: Canadian Origin Agricultural Seed for Planting, Lacking an SAC

If the seed in Column A of Table 5-8 is for:	And the weight of the seed lot:	And the shipment:	Then:
Resale or planting by the importer ¹	Exceeds that listed in Column B of Table 5-8		PROHIBIT ENTRY
	Does not exceed	Is corn or wheat	RELEASE
	that listed in Column B of Table 5-8	Is other than corn or wheat, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309) ³	
		Is other than corn or wheat, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY
Experimental or breeding purposes ¹	Exceeds that listed in Column C of Table 5-8		
	Does not exceed	Is corn or wheat	RELEASE
	that listed in Column C of Table 5-8	Is other than corn or wheat, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309) ³	
		Is other than corn or wheat, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY

¹ The invoice or label should declare what the grower intends to use the seed for. Read the invoice and label to find out how the seed is to be used. If the invoice, label, or importer fails to declare how the seed is to be used, then regulate the seed as if it were intended for resale or planting by the importer.

² See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.

³ See Appendix D for a list of exporters authorized to use the seed export label.

TABLE 5-7: Canadian Origin Vegetable Seed for Planting, Lacking an SAC

If the seed in Column A of Table 5-9 is for:	And the weight of the seed lot:	And the shipment:	Then:
Resale or planting by the importer ¹	Exceeds that listed in Column B of Table 5-9		PROHIBIT ENTRY
	Does not exceed	Is sweet corn	RELEASE
	that listed in Column B of Table 5-9	Is other than sweet corn, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309) ³	
		Is other than sweet corn, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY
Experimental or breeding purposes ¹	Exceeds that listed in Column C of Table 5-9		
	Does not exceed	Is sweet corn	RELEASE
	that listed in Column C of Table 5-9	Is other than sweet corn, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309 ³)	
		Is other than sweet corn, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY

¹ The invoice or label should declare what the grower intends to use the seed for. Read the invoice and label to find out how the seed is to be used. If the invoice, label, or importer fails to declare how the seed is to be used, then regulate the seed as if it were intended for resale or planting by the importer.

Sage	25	50
Salsify	25	50
Savory, summer	5	10
Sorrel	5	10
Soybean	25	200
Spinach	25	50
Spinach, New Zealand	25	50
Squash	25	50
Tomato	5	10
Tomato, husk	5	10
Turnip	5	10
Watermelon	25	50

A List of Agricultural and Vegetable Seed Regulated by the Federal Seed Act

How to Use This List

Seed may be invoiced either by scientific or common name – or both. Agricultural and vegetable seed are entered into this list both by their scientific and common names. The scientific name will be italicized; the common name will not. Here are two ways you would find tomatoes listed:

TOMATO (V) (Lycopersicon esculentum) and

Lycopersicon esculentum (V) (tomato)

If you do **not** find the seed's name in this list, then that seed is neither agricultural nor vegetable.

Signs Used in This List

An "(A)"

◆ An (A) following the seed's name identifies that seed as agricultural.

A "(V)"

◆ A (V) following the seed's name identifies that seed as vegetable.

Boldface Type

If an entry is **boldfaced**, then that seed may have additional restrictions. If you didn't already, look up the seed in the "Plant" section of this manual under "Seed for Planting."

Α

Abelmoschus esculentus (V) (okra)

Agropyron
cristatum (A) (fairway crested wheatgrass)
desertorum (A) (standard crested wheatgrass)
elongatum (see Elytrigia elongata)
fragile subsp. sibiricum (A) (Siberian wheatgrass)
intermedium var. intermedium (see Elytrigia intermedia ssp.
intermedia)
intermedium var. trichophorum (see Elytrigia intermedia ssp.
intermedia)
riparium (see Elymus lanceolatus ssp. lanceolatus)
smithii (see Pascopyrum smithii)
spicatum (see Pseudoroegneria spicata)
trachycaulum (see Elymus trachycaulus)

Agrostis
canina (A) (velvet bentgrass)
capillaris (A) (colonial bentgrass)
gigantea (A) (redtop)
stolonifera var. stolonifera (A) (creeping bentgrass)

AGROTRICUM (A) (X Agrotriticum)

ALFALFA (A) (Medicago sativa)

ALFILARIA (A) (Erodium cicutarium)

Allium
cepa (V) (onion)
fistulosum (V) (Welsh onion)
porrum (V) (leek)
schoenoprasum (V) (chives)

Alopecurus pratensis (A) (meadow foxtail)

ALYCECLOVER (A) (Alysicarpus vaginalis)

Alysicarpus vaginalis (A) (meadow alyceclover)

Andropogon gerardii var. gerardii (A) (big bluestem), hallii (A) (sand bluestem)

Anethum graveolens (V) (dill)

Anthoxanthum odoratum (A) (sweet vernalgrass)

Apium

graveolens var. dulce (V) (celery)

graveolens var. rapaceum (V) (celeriac)

Arachis hypogaea (V) (peanut)

Arctium lappa (V) (great burdock)

Arrhenatherum elatius (A) (tall oatgrass)

Artemisia ludoviciana (Louisiana sagewort)

ARTICHOKE (V) (Cynara cardunculus ssp. cardunculus)

ASPARAGUS (V) (Asparagus officinalis)

Asparagus officinalis (V) (asparagus)

ASPARAGUS BEAN (V) (Vigna unguiculata subsp. sesquipedalis)

Asphodelus fistulosus (onionweed)

Astragalus cicer (A) (milkvetch)

Atriplex canescens (A) (saltbush)

Avena byzantina (A) (oat) nuda (A) (oat) sativa (A) (oat)

Axonopus fissifolius (A) (carpetgrass)

\mathbf{B}

BAHIAGRASS (A) (Paspalum notatum)

Barbarea verna (V) (upland cress)

BARREL CLOVER (A) (Medicago truncatula)

BARLEY (A) (Hordeum vulgare)

BEAN,

ADZUKI (A) (Vigna angularis)
FIELD (A) (Phaseolus vulgaris)
GARDEN (V) (Phaseolus vulgaris)
LIMA (V) (Phaseolus lunatus)
MUNG (A) (Vigna radiata)
RUNNER (V) (Phaseolus coccineus)

BEET (V) (Beta vulgaris ssp. vulgaris) FIELD (A) (Beta vulgaris ssp. vulgaris) GARDEN (V) (Beta vulgaris ssp. vulgaris) SUGAR (A) (Beta vulgaris ssp. vulgaris)

BEGGARWEED (A) (Desmodium tortuosum)

BENTGRASS.

COLONIAL (A) (Agrostis capillaris) CREEPING (A) (Agrostis stolonifera var. palustris) VELVET (A) (Agrostis canina)

BERMUDAGRASS (A) (Cynodon dactylon var. dactylon) GIANT (A) (Cynodon dactylon var. aridus)

Beta

vulgaris ssp. cicla (V) (Swiss chard) vulgaris ssp. vulgaris (A) (field beet, sugar beet) vulgaris ssp. vulgaris (V) (Crassa group) (beet)

BLUEGRASS,

ANNUAL (A) (Poa annua)
BULBOUS (A) (Poa bulbosa)
CANADA (A) (Poa compressa)
GLAUCANTHA (A) (Poa glauca)
KENTUCKY (A) (Poa pratensis)
NEVADA (A) (Poa secunda)
ROUGH (A) (Poa trivialis)
TEXAS (A) (Poa arachnifera)
WOOD (A) (Poa nemoralis)

BLUEJOINT (A) (Calamagrostis canadensis)

BLUESTEM,

BIG (A) (Andropogon gerardii var. gerardii) LITTLE (A) (Schizachyrium scoparium) SAND (A) (Andropogon hallii) YELLOW (A) (Bothriochloa ischaemum)

Bothriochloa ischaemum (A) (yellow bluestem)

BOTTLE BRUSH-SQUIRRELTAIL (A) (Elymus elymoides)

Bouteloua curtipendula (A) (side-oats grama) gracilis (A) (blue grama)

Brachiaria ramosa (A) (browntop millet)

Brassica

juncea (A) (India mustard) napus, var. annua (A) (annual rape) biennis (A) (winter rape) napobrassica (V) (rutabaga) pabularia (V) (Siberian kale) nigra (A) (black mustard) oleracea, var. acephala (V) (collards, kale) alboglabra (V) (Chinese kale) botrytis (V) (broccoli, cauliflower) capitata (V) (cabbage, savoy cabbage) costata (V) (tronchuda cabbage) gemmifera (V) (Brussels sprouts) gongylodes (V) (kohlrabi) pekinensis (V) (Chinese cabbage) perviridis (V) (spinach mustard) rapa ssp. chinensis (V) (pe-tsai, pak-choi) rapa ssp. rapa (A) (bird rape) (V) (turnip) rapa ssp. sylvestris (A) (turnip rape)

BROADBEAN (V) (Vicia faba)

BROCCOLI (V) (Brassica oleracea var. botrytis)

BROME.

FIELD (A) (Bromus arvensis)
MEADOW (A) (Bromus biebersteinii)
MOUNTAIN (A) (Bromus marginatus)
SMOOTH (A) (Bromus inermis)

Bromus

arvensis (A) (field brome) biebersteinii (A) (meadow brome) catharticus (A) (rescue grass) hordeaceus (A) (soft chess) inermis (A) (smooth brome) marginatus (A) (mountain brome) willdenowii (see Bromus catharticus) BROOMCORN (A) (Sorghum bicolor)

BRUSSELS-SPROUTS (V) (Brassica oleracea var. gemmifera)

Buchloe dactyloides (A) (buffalograss)

BUCKWHEAT (A) (Fagopyrum esculentum)

BUFFALOGRASS (A) (Buchloe dactyloides)

BUFFELGRASS (A) (Cenchrus ciliaris)

BURCLOVER, CALIFORNIA (A) (Medicago polymorpha) SPOTTED (A) (Medicago arabica)

BURDOCK, GREAT (V) (Arctium lappa)

BURNET, LITTLE (A) (Sanguisorba minor)

BUTTONCLOVER (A) (Medicago orbicularis)

\mathbf{C}

CABBAGE (V) (Brassica oleracea var. capitata), TRONCHUDA (V) (Brassica oleracea var. costata)

CABBAGE, CHINESE (V) (Brassica rapa ssp. pekinensis)

Calamagrostis canadensis (A) (bluejoint)

CANARYGRASS (A) (Phalaris canariensis), REED (A) (Phalaris arundinacea)

CANOLA¹ (A)

CANTALOUPE (V) (see MELON)

Cannabis sativa (A) (hemp) (A controlled substance)

Capsicum annuum var. annuum (V) (pepper)

CARDOON (V) (Cynara cardunculus ssp. cardunculus)

¹ Canola is a trademarked acronym for Canadian oil, low acid. It can be a cultivar of annual rape, bird rape, turnip rape, or winter rape. Canola is not accepted as a kind name under the Federal Seed Act.

CARPETGRASS (A) (Axonopus fissifolius)

CARROT (V) (Daucus carota ssp. sativus)

Carthamus tinctorius (A) (safflower)

CASTORBEAN (A) (Ricinus communis)

CAULIFLOWER (V) (Brassica oleracea var. botrytis)

CELERIAC (V) (Apium graveolens var. rapaceum)

CELERY (V) (Apium graveolens var. dulce)

Cenchrus ciliaris (A) (buffelgrass)

CHARD, SWISS (V) (Beta vulgaris ssp. cicla)

CHESS, SOFT (A) (Bromus hordaceus)

CHICKPEA (A) (Cicer arietinum)

CHICORY (V) (Cichorium intybus)

CHINESE CABBAGE (V) (Brassica oleracea var. pekinensis)

CHIVES (V) (Allium schoenoprasum)

Chloris gayana (A) (rhodesgrass)

Cicer arietinum (A) (chickpea)

Cichorium endivia (V) (endive) intybus (V) (chicory)

CITRON (V) (Citrullus lanatus var. citroides)

Citrullus

lanatus var. citroides (V) (citron, melon) lanatus var. lanatus (V) (watermelon) CLOVER,

ALSIKE (A) (Trifolium hybridum)

ARROWLEAF (A) (Trifolium vesiculosum)

BERSEEM (A) (Trifolium alexandrinum)

CLUSTER (A) (Trifolium glomeratum)

CRIMSON (A) (Trifolium incarnatum)

KENYA (A) (Trifolium semipilosum)

LADINO (A) (Trifolium repens)

LAPPA (A) (Trifolium lappaceum)

LARGE HOP (A) (Trifolium campestre)

PERSIAN (A) (Trifolium resupinatum)

RED, MAMMOTH (A) (Trifolium pratense)

RED, MEDIUM (A) (Trifolium pratense)

ROSE (A) (Trifolium hirtum)

SMALL HOP (SUCKLING) (A) (Trifolium dubium)

STRAWBERRY (A) (Trifolium fragiferum)

SUB (subterranean) (A) (Trifolium subterraneum)

WHITE (A) (Trifolium repens)

COLLARDS (V) (Brassica oleracea var. acephala)

CORN, FIELD (A) (Zea mays) POP (A) (Zea mays) SWEET (V) (Zea mays)

CORNSALAD (V) (Valerianella locusta)

Coronilla varia (A) (crownvetch)

COTTON (A) (Gossypium spp.)

COWPEA (A or V) (Vigna unguiculata subsp. unguiculata)

CRAMBE (A) (Crambe abyssinica)

Crambe abyssinica (A) (crambe, colewort)

CRESS.

GARDEN (V) (Lepidium sativum)

UPLAND (V) (Barbarea verna)

WATER (V) (Rorippa nasturtium-aquaticum)

CRESTED DOGTAIL (A) (Cynosurus cristatus)

CROTALARIA,

LANCE (A) (Crotalaria lanceolata) SHOWY (A) (Crotalaria spectabilis) SLENDERLEAF (A) (Crotalaria brevidens var. intermedia) STRIPED (A) (Crotalaria pallida) SUNN (A) (Crotalaria juncea)

Crotalaria

brevidens var. intermedia (A) (slenderleaf crotalaria) juncea (A) (sunnhemp) lanceolata (A) (lanceleaf crotalaria) pallida (A) (striped or smooth crotalaria) spectabilis (A) (showy crotalaria)

CROWNVETCH (A) (Coronilla varia)

CUCUMBER (V) (Cucumis sativus)

Cucumis

anguria (V) (West Indian gherkin) melo (V) (cantaloupe, melon, or muskmelon) sativus (V) (cucumber)

Cucurbita spp. (V) (pumpkin, squash)

Cyamopsis tetragonoloba (A) (guar)

Cynara cardunculus ssp. cardunculus (V) (cardoon or artichoke)

Cynodon

dactylon (A) (bermudagrass) and its var. var. aridus (A) (giant bermudagrass)

Cynosurus cristatus (A) (crested dogtail)

D

Dactylis glomerata (A) (orchardgrass)

DALLISGRASS (A) (Paspalum dilatatum)

DANDELION (V) (Taraxacum officinale)

Daucus carota ssp. sativus (V) (carrot)

Desmodium tortuosum (A) (Florida beggarweed)

DICHONDRA (A) (Dichondra repens)

Dichondra repens (A) (dichondra)

DILL (V) (Anethum graveolens)

DROPSEED, SAND (A) (Sporobolus cryptandrus)

\mathbf{E}

Echinochloa frumentacea (A) (Japanese millet)

EGGPLANT (V) (Solanum melongena)

Ehrharta calycina (A) (veldtgrass)

Elymus

canadensis (A) (Canada wild rye)
elymoides (A) (bottlebrush-squirreltail)
juncea (see Psathyrostacys juncea)
lanceolatus ssp. lanceolatus (A) (streambank wheatgrass)
smithii (A) (Western wheatgrass)
trachycaulus (A) (slender wheatgrass)

Elytrigia

elongata (A) (tall wheatgrass) intermedia subsp. intermedia (A) (intermediate wheatgrass or pubescent wheatgrass) spicata (A) (beardless wheatgrass)

EMMER (A) (Triticum dicoccum)

ENDIVE (V) (Cichorium endivia)

Eragrostis, curvula (A) (weeping lovegrass) trichodes (A) (sand lovegrass)

Erodium cicutarium (A) (alfilaria)

F

Fagopyrum esculentum (A) (buckwheat)

FESCUE,
CHEWING'S (A) (Festuca rubra subsp. commutata)
HAIR (A) (Festuca tenuifolia)
HARD (A) (Festuca brevipila)
MEADOW (A) (Festuca pratensis)
RED (A) (Festuca rubra subsp. rubra)
SHEEP (A) (Festuca ovina var. ovina)
TALL (A) (Festuca arundinacea)

Festuca

arundinacea (A) (tall fescue)
brevipila (A) (hard fescue)
ovina (A) (sheep fescue)
pratensis (A) (meadow fescue)
rubra (A) (red fescue)
ruba subsp. commutata (A) (Chewing's fescue)
tenuifolia (A) (hair fescue)

FLAX (A) (Linum usitatissimum)

G

GALLETAGRASS (A) (Hilaria jamesii)

GHERKIN, WEST INDIA (V) (Cucumis anguria)

Glycine max (A) (soybean)

Gossypium spp., hirsutum (A) (cotton, upland cotton)

GRAMA,

BLUE (A) (Bouteloua gracilis) SIDE-OATS (A) (Bouteloua curtipendula)

GUAR (A) (Cyamopsis tetragonoloba)

GUINEAGRASS (A) (Panicum maximum)

Н

HARDINGGRASS (A) (Phalaris stenoptera)

Hedysarum boreale (A) (northern sweetvetch)

Helianthus annuus (A) (sunflower)

HEMP (A) (Cannabis sativa) (A controlled substance)

Hibiscus cannabinus (A) (kenaf)

Hilaria jamesii (A) (galletagrass)

Holcus lanatus (A) (velvetgrass)

Hordeum vulgare (A) (barley)

I

INDIANGRASS, YELLOW (A) (Sorghastrum nutans)

INDIGO, HAIRY (A) (Indigofera hirsuta)

Indigofera hirsuta (A) (hairy indigo)

J

JAPANESE LAWNGRASS (A) (Zoysia japonica)

JOHNSONGRASS (A) (Sorghum halepense)

K

KALE (V) (Brassica oleracea var. acephala) CHINESE (V) (Brassica oleracea var. alboglabra) SIBERIAN (V) (Brassica napus var. pabularia)

KENAF (A) (Hibiscus cannabinus)

KOCHIA, FORAGE (A) (Kochia prostrata)

Kochia prostrata (A) (forage kochia)

KOHLRABI (V) (Brassica oleracea var. gongylodes)

KUDZU (A) (Pueraria montana var. lobata)

Kummerowia striata (A) (striate lespedeza)

L

Lactuca sativa (V) (lettuce)

Lathyrus hirsutus (A) (rough pea)

LEEK (V) (Allium porrum)

Lens culinaris (A) (lentil)

LENTIL (A) (Lens culinaris)

Lepidium sativum (A) (garden cress)

LESPEDEZA,

KOREAN (A) (Lespedeza stipulacea) SERICEA OR CHINESE (A) (Lespedeza cuneata) SIBERIAN (A) (Lespedeza juncea) STRIATE (A) (Kummerowia striata)

Lespedeza

cuneata (A) (sericea lespedeza) juncea (A) (Siberian lespedeza) stipulacea (A) (Korean lespedeza) striata (A) (striate lespedeza)

LETTUCE (V) (Lactuca sativa)

Leymus cinereus (A) (basin wildrye)

Lolium

x hybridum (A) (intermediate ryegrass) multiflorum (A) (Italian ryegrass, annual ryegrass) perenne (A) (perennial ryegrass) rigidum (A) (Wimmera ryegrass)

Lotus corniculatus (A) (birdsfoot trefoil)

Lotus uliginosus (A) (big trefoil)

LOVEGRASS, SAND (A) (Eragrostis trichodes) WEEPING (A) (Eragrostis curvula)

LUPINE, BLUE (A) (Lupinus angustifolius) WHITE (A) (Lupinus albus) YELLOW (A) (Lupinus luteus)

Lupinus, albus (A) (white lupine) angustifolius (A) (blue lupine) luteus (A) (yellow lupine)

Lycopersicon esculentum (V) (tomato)

M

MANILAGRASS (A) (Zoysia matrella)

MEADOW FOXTAIL (A) (Alopecurus pratensis)

Medicago arabica (A) (spotted burclover) lupulina (A) (black medic) orbicularis (A) (button-clover) polymorpha (A) (California burclover) sativa (A) (alfalfa) truncatula (A) (barrelclover)

MEDIC, BLACK (A) (Medicago lupulina)

Melilotus indicus (A) (sourclover) albus (A) (white sweet clover) officinalis (A) (yellow sweet clover)

Melinis minutiflora (A) (molasses grass)

MELON (V) (Cucumis melo)

MILKVETCH (A) (Astragalus cicer)

MILLET,

BROWNTOP (A) (Brachiaria ramosa)

FOXTAIL (A) (Setaria italica)

JAPANESE (A) (Echinochloa frumentacea)

PEARL (A) (Pennisetum glaucum)

PROSO (A) (Panicum miliaceum)

MOLASSESGRASS (A) (Melinis minutiflora)

Mucuna pruriens var. utilis (A) (velvetbean)

MUSKMELON (V) (Cucumis melo)

MUSTARD,

BLACK (A) (Brassica nigra)

INDIA (A&V) (Brassica juncea)

SPINACH (V) (Brassica perviridis)

WHITE (A) (Sinapis alba)

N

NAPIERGRASS (A) (Pennisetum purpureum)

Nasturtium officinale (see *Rorippa nasturtium-aquaticum*)

NEEDLEGRASS, GREEN (A) (Stipa viridula)

Nicotiana tabacum (A) (tobacco)

0

OAT (A) (Avena sativa, A. nuda, A. byzantina)

OATGRASS, TALL (A) (Arrhenatherum elatius)

OKRA (V) (Abelmoschus esculentus)

ONION (V) (Allium cepa), WELSH (V) (Allium fistulosum)

Onobrychis viciifolia (A) (sainfoin)

ORCHARDGRASS (A) (Dactylis glomerata)

Oryza sativa (A) (rice)

Oryzopsis, hymenoides (A) (Indian ricegrass) miliacea (A) (smilograss)

P

PAK-CHOI (V) (Brassica rapa ssp. chinensis)

PANICGRASS, BLUE (A) (Panicum antidotale) GREEN (A) (Panicum maximum var. trichoglume)

Panicum spp. (panicgrass), antidotale (A) (blue panicgrass) maximum (A) (guineagrass) maximum var. trichoglume (A) (green panicgrass) miliaceum (A) (proso millet) virgatum (A) (switchgrass)

PARSLEY (V) (Petroselinum crispum)

PARSNIP (V) (Pastinaca sativa)

Pascopyrum smithii (A) (western wheatgrass)

Paspalum dilatatum (A) (dallisgrass) notatum (A) (bahiagrass) urvillei (A) (vaseygrass)

Pastinaca sativa (V) (parsnip)

PEA, (V) (Pisum sativum), FIELD (A) (Pisum sativum)

PEANUT (A) (Arachis hypogaea)

Pennisetum glaucum (A) (pearl millet) purpureum (A) (napier grass)

PEPPER (V) (Capsicum spp.)

Petroselinum crispum (V) (parsley)

PE-TSAI (V) (See CHINESE CABBAGE)

Phalaris arundinacea (A) (reed canary grass) canariensis (A) (canarygrass)

stenoptera (A) (Hardin grass)

Phaseolus coccineus (V) (runner bean) lunatus (V) (lima bean) vulgaris (field bean (A) or garden bean (V))

Phleum bertolonii (A) (turf timothy) pratense (A) (timothy)

Physalis ixocarpa (V) (husk-tomato)

Piptatherum miliaceum (A) (smilo)

Pisum sativum, (pea (V) or field pea (A))

Poa

annua (A) (annual bluegrass)
arachnifera (A) (Texas blue grass)
bulbosa (A) (bulbous bluegrass)
compressa (A) (Canada bluegrass)
glaucantha (A) (glaucantha bluegrass)
nemoralis (A) (wood bluegrass)
nevadensis (A) (Nevada bluegrass)
pratensis (A) (Kentucky bluegrass)
trivialis (A) (roughstalk bluegrass)

PROSO (A) (Panicum miliaceum)

Psathyrostachys juncea (A) (Russian wildrye)

Pseudoroegneria spicata (A) (beardless wheatgrass)

Pueraria montana var. lobata (A) (kudzu)

PUMPKIN (V) (Cucurbita pepo, C. moschata, C. maxima)

R

RADISH (V) (Raphanus sativus)

RAPE,

ANNUAL (A) (Brassica napus var. annua) BIRD (A) (Brassica rapa ssp. rapa) TURNIP (A) (Brassica rapa ssp. silvestris) WINTER (A) (Brassica napus var. biennis)

Raphanus sativus (V) (radish)

REDTOP (A) (Agrostis gigantea)

RESCUEGRASS (A) (Bromus catharticus)

Rheum rhabarbarum (V) (rhubarb)

RHODESGRASS (A) (Chloris gayana)

RHUBARB (V) (Rheum rhabarbarum)

RICE (A) (Oryza sativa)

RICEGRASS, INDIAN (A) (Oryzopsis hymenoides)

Ricinus communis (A) (castorbean)

Rorippa nasturtium-aquaticum (V) (water cress)

ROUGHPEA (A) (Lathyrus hirsutus)

RUTABAGA (V) (Brassica napus var. napobrassica)

Rumex acetosa (V) (sorrel)

RYE (A) (Secale cereale), MOUNTAIN (A) (Secale strictum ssp. strictum)

RYEGRASS.

ANNUAL OR ITALIAN (A) (Lolium multiflorum) INTERMEDIATE (A) (Lolium x hybridum) PERENNIAL (A) (Lolium perenne) WIMMERA (A) (Lolium rigidum)

S

SAFFLOWER (A) (Carthamus tinctorius)

SAGE (V) (Salvia officinalis)

SAGEWORT, LOUISIANA (A) (Artemisia ludoviciana)

SAINFOIN (A) (Onobrychis viciifolia)

SALSIFY (V) (Tragopogon porrifolius)

SALTBUSH, FOURWING (A) (Atriplex canescens)

Salvia officinalis (V) (sage)

Sanguisorba minor (A) (little burnet)

Satureja hortensis (V) (summer savory)

SAVORY, SUMMER (V) (Satureja hortensis)

Schizachyrium scoparium (A) (little bluestem)

Secale

cereale (A) (rye)

strictum ssp. strictum (A) (mountain rye)

SESAME (A) (Sesamum indicum)

Sesamum indicum (A) (sesame)

SESBANIA (A) (Sesbania exaltata)

Sesbania exaltata (A) (sesbania)

Setaria italica (A) (foxtail millet)

SIDE-OATS GRAMA (A) (Bouteloua curtipendula)

Sinapis alba (A) (white mustard)

SMILO (A) (Piptatherum miliaceum)

Solanum melongena (V) (eggplant)

Sorghastrum nutans (A) (yellow Indiangrass)

SORGHUM (A) (Sorghum bicolor) ALMUM (A) (Sorghum x almum)

Sorghum

x almum (A) (almum sorghum)

bicolor (A) (broomcorn and sorghum)

x drummondii (A) (Sudangrass or sorghum-sudangrass)

SORGHUM-SUDANGRASS (A) (Sorghum x drummondii)

SORGRASS (A) (Rhizomatous derivatives of a johnsongrass x sorghum cross or a johnsongrass x sudangrass cross)

SORREL (V) (Rumex acetosa)

SOURCLOVER (A) (Melilotus indicus)

SOUTHERN PEA (See COWPEA)

SOYBEAN (A&V) (Glycine max)

SPELT (A) (Triticum spelta)

SPINACH (V) (Spinacia oleracea), NEW ZEALAND (V) (Tetragonia tetragonioides)

Spinacia oleracea (V) (spinach)

Sporobolus cryptandrus (A) (sand dropseed)

SQUASH (V) (Cucurbita pepo, C. moschata, C. maxima)

Stipa viridula (A) (green needlegrass)

SUDANGRASS (A) (Sorghum x drummondii)

SUNFLOWER (A) (Helianthus annuus)

SWEET VERNALGRASS (A) (Anthoxanthum odoratum)

SWEETCLOVER, WHITE (A) (Melilotus albus) YELLOW (A) (Melilotus officinalis)

SWEETVETCH, NORTHERN (A) (Hedysarum boreale)

SWITCHGRASS (A) (Panicum virgatum)

T

Taraxacum officinale (V) (dandelion)

Tetragonia tetragonioides (V) (New Zealand spinach)

TIMOTHY (A) (Phleum pratense), TURF (A) (Phleum bertolonii)

TOBACCO (A) (Nicotiana tabacum)

Procedures

Sampling Seed

All Origins

Use the following procedures for these purposes:

- ◆ Sampling non-Canadian origin agricultural and vegetable seed shipments that weigh more than 5 pounds
- ◆ Monitoring Canadian origin seed when requested by APHIS

Occasionally, APHIS may ask you to take samples of Canadian origin seed for monitoring purposes. The Seed Examination Facility (SEF) in Beltsville, Maryland will send a memorandum telling you when to begin and end monitoring. If you do not have a memorandum from the SEF, use the instructions in **Table 3-71** (Plant Section) for Canadian origin seed. Here is an overview of the steps to take in sampling seed:

TABLE 5-10: Overview of Steps to Take in Sampling Seed

- 1. Determine how large a sample to collect.
- 2. Compute how many subsamples to draw.
- 3. Sample with a trier.
- 4. Forward samples.

Equipment Needed to Sample Seed

To collect the seed samples, make sure you have the equipment listed in **Figure 5-1** below.

- 🔷 A triei
- ◆ A **cloth** (something the length of the trier to empty subsamples onto)
- ◆ A **container** (must hold at least a quart of seed)
- ◆ A marking pen
- ◆ Tape (to close opened containers)
- ◆ A knife
- ◆ Protective **gloves** (to prevent skin exposure when sampling dusted seed)
- ◆ A cartridge type **dust mask** (to avoid breathing pesticide if the seed is treated)
- ◆ PPQ Form 237 (Record of Seed Offered for Importation Under the Federal Seed Act)
- ◆ SEF return address envelope form

FIGURE 5-1: A List of Equipment Needed to Sample Seed

Collecting the Sample

Follow these steps to sample the seed:

Step 1—Determine how large a sample to collect.

Refer to Table 5-11 as a guide.

TABLE 5-11: Amount of Seed to Collect from Each Lot1

If the seed is in:	And the seed is categorized as:	Then:
Bags or bulk	Agricultural (A)	1. COLLECT 1 quart of seed
		2. CONTINUE to Step 2
	Vegetable (V)	1. COLLECT 1 pint of seed
		2. CONTINUE to Step 2
Small packets or hermetically sealed containers		CONTACT the Seed Examination Facility (SEF) at (301) 504-8605 for directions on sampling

¹ If two or more different agricultural or vegetable seeds are mixed in a bag or in bulk, treat as one lot for sampling purposes.

Step 2—Compute how many subsamples to draw.

Once you know how much seed to collect for your sample, you must then calculate how many subsamples to draw to ensure a representative sample.

Consequences of failure to take a good sample: To ensure that seed is free from pest risk, you need to examine a representative sample of the shipment. The examination results can be no more accurate than the sample—therefore, the effort you make in sampling will decide the effectiveness of the work done by the SEF.

CRUCIAL: Follow these directions scrupulously! When sampling seed, **return the excess seed to its original container** after you have completed your sampling. Never mix seed from different lots before returning your samples. Be careful not to spill seed.

To compute how many subsamples to draw, you need to determine how the seed is packaged:

TABLE 5-12: Computing Number of Subsamples Based on Seed Packaging

If the seed is in:	Then use Substep:
Bags or other nonhermetically sealed containers	2.A for your computation
Bulk	2.B for your computation

Substep 2.A (seed in bags or other nonhermetically sealed packages)—If the seed is packaged in bags, then use **Table 5-13** to compute how many subsamples to draw. If the number of subsamples you draw does not provide enough seed for an adequate sample, then draw the additional seed you need.

TABLE 5-13: Determining How Many Subsamples to Draw from Seed in Bags

If the number of bags or packages in the shipment is:	Then draw this many subsamples to make your sample:	If the number of bags or packages in the shipment is:	Then draw this many subsamples to make your sample:
1 to 6	5	125 to 134	18
7 to 14	6	135 to 144	19
15 to 24	7	145 to 154	20
25 to 34	8	155 to 164	21
35 to 44	9	165 to 174	22
45 to 54	10	175 to 184	23
55 to 64	11	185 to 194	24
65 to 74	12	195 to 204	25
75 to 84	13	205 to 214	26
85 to 94	14	215 to 224	27
95 to 104	15	225 to 234	28
105 to 114	16	235 to 244	29
115 to 124	17	245 or more	30

Do **not** sample more than 30 bags per lot. If there are fewer than five bags in the lot, you must still draw five subsamples. You must also draw enough seed to fill your sample (1/2 pint, 1 pint, or 1 quart).

Go to Step 3.

Substep 2.B (bulk seed)—If the seed is being shipped in bulk (unpackaged or loose), then use this calculation and the preceding table to compute how many subsamples to draw:

- **1.** Determine the weight of the lot.
- 2. Divide the weight of the lot by 100.
- **3.** Take the result obtained by your division (consider this figure as the "equivalent number of bags") and go back to the previous Substep (**2.A**) to determine how many subsamples to draw. For an example, refer to **Table 5-14**.

TABLE 5-14: Example Computation of How Many Subsamples to Draw from Seed in a Bulk Shipment

Example computation:

How many subsamples would you draw from a 2,000 pound bulk shipment of oats?

Treat the shipment as a single lot:

- 1. The weight of the lot is 2,000 pounds.
- 2. $2,000 \div 100 = 20$ (the equivalent number of bags).
- 3. Twenty falls between 15 and 24 on the matrix—which directs you to draw 7 subsamples.

4. Go to **Step 3**.

Step 3—Sample with a trier.

Knowing how much seed needs to be collected to make a sufficient sample and how many subsamples to draw—now you're ready to sample (for seeds in bags or bulk).

Substep 3.A—Check the label or invoice to learn if the seed was treated. If the seed is brightly colored (blue, orange, or pink for example), then assume it was treated regardless of what the label says.

If you know or believe the seed is treated, then take these precautions:

- Use plastic gloves and a dust mask.
- Wear protective coveralls.
- ◆ Wear eye protection.
- ◆ Avoid wiping your mouth or nose with your hands.

Substep 3.B—Determine if the seed is coated, pelleted, or preplanted (anything that would make it impracticable to inspect the seed or tell what it is). This would **not** include seed that is merely dusted or coated with ingredients such as rhizobia, dyes, or pesticides. *Treated seeds are inspectable because you can see the seed through the chemical substance*. Refer to **Table 5-15** as a guide.

TABLE 5-15: Sampling Coated, Pelleted, or Preplanted Seed

If the seed is:	And its origin is:	And:	Then:
Coated, pelleted, or	Canada	Has a seed analysis certificate (PPQ Form 925)	GO to Substep 3.C
preplanted - making it impossible to		Does not have a Seed Analysis Certificate	PROHIBIT ENTRY
examine the seed itself	A country other than Canada	Is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289), or a Seed Export Label (CFIA Form 5309¹) and an officially drawn and sealed sample taken before the seed was coated	Take a small random sample of coated seed; send the official sample and the sample of uncoated seed to the SEF. GO to Step 4.
		Is not accompanied by one of the above forms and an official sample of uncoated seed	PROHIBIT ENTRY
Naked or merely dusted or treated		-	GO to Substep 3.C

 $^{{\}bf 1} \quad {\bf See} \ {\bf Appendix} \ {\bf D} \ {\bf for} \ {\bf a} \ {\bf list} \ {\bf of} \ {\bf exporters} \ {\bf authorized} \ {\bf to} \ {\bf use} \ {\bf the} \ {\bf seed} \ {\bf export} \ {\bf label}.$

Substep 3.C—Draw your subsamples randomly. If sampling a bulk shipment, then draw your subsamples at equal intervals throughout the shipment.

Substep 3.D—If you're sampling a single bag, don't make more than a single hole with the trier; merely move the trier in different directions to collect the seed.

Substep 3.E—Insert the trier (with the holes down and closed) into the seed. It's better to enter the bag near its top to prevent spillage. If the seed is too large, does not flow freely, or the trier cannot penetrate the container then sample by hand.

Substep 3.F—Rotate the inner sleeve of the trier to open the holes.

Substep 3.G—Lightly move the trier back and forth to get the seed into the trier.

Substep 3.H—Rotate the inner sleeve of the trier to close the holes.

Substep 3.I—Remove the trier from the bag or bulk seed.

Procedures: Sampling Seed Forwarding the Sample

Substep 3.J—Close the holes in the bag made by the trier. If a burlap or cloth bag, then close the hole by moving the tip of the trier over the weave. If a paper bag, then close the hole with a pressure sensitive label or masking tape.

Substep 3.K—Combine the seed in a plastic bag or other container large enough to hold all the subsamples.

Substep 3.L—Mix the seed thoroughly to blend the subsamples. Collect enough seed to have a sufficient amount to analyze (computed in **Step 1**).

Substep 3.M—If the seed is treated, wipe off the trier and then wash your hands, face, and arms with soap and water.

Forwarding the Sample

Here are directions for packaging and mailing:

Step 1—Bag the sample.

Pour the seed sample into a plastic bag. Put samples from different **lots** and different **kinds** of seed into separate bags.

Step 2—Tie the bag.

Secure the plastic bag with a string or rubber band. **NEVER USE STAPLES!**

Step 3—Double-bag the sample.

Put each plastic bag inside a separate cloth bag.

Step 4—Refer to Table 5-16 for further instructions.

The origin of the seed will determine how to forward the sample.

TABLE 5-16: Forwarding Seed Samples

If the seed is of:	Then:
Non-Canadian origin	 Complete a PPQ Form 237, Record of Seed Offered for Importation Under the Federal Seed Act. Put the completed pink copy (Part 3) of PPQ Form 237, declaration of labeling (copy of the label and invoice), and Phytosanitary Certificate, Canadian Seed Analysis Certificate (CFIA Form 5289), or Seed Export Label (CFIA Form 5309¹) into the cloth bag.² Secure the outer cloth bag by tying the mailing tag. Send the sample by PRIORITY MAIL to: Seed Examination Facility PPQ-APHIS-USDA Building 580 BARC-E Beltsville, MD 20705 Give the completed yellow copy (Part 4) of PPQ Form 237 to the consignee or the consignee's agent.
	 6. Mail the remaining white copies (Parts 1 and 2) of the completed PPQ For 237 to the SEF in a separate envelope. Mail these copies the same day as you send the sample-but separate from the sample. 7. GO to Table 5-17. Request additional forms, bags, and tags (if needed) from the SEF at the above address.
Canadian origin for monitoring purposes	 Place a copy of the seed analysis certificate (PPQ Form 925) and declaration of labeling into the cloth bag. Secure the outer cloth bag by tying the mailing tag. Send the sample by PRIORITY MAIL to: Seed Examination Facility PPQ-APHIS-USDA Building 580 BARC-E Beltsville, MD 20705 Request additional forms, bags, and tags (if needed) from the SEF at the above address.
Canadian origin, lacking a seed analysis certificate (SAC), consigned to an approved facility	 Place the sample and a copy of the invoice into the shipping packaging supplied by the importer. Using an address label provided by the importer, send the sample to a Canadian seed testing laboratory designated by the importer (the importer is responsible for paying to send the sample to the Canadian laboratory). The laboratory must be authorized to issue Seed Analysis Certificates (see Appendix D). Request additional labels and shipping packaging (if needed) from the importer.

- 1 See Appendix D for a list of exporters authorized to use the seed export label.
- 2 When forwarding samples of treated seed, be sure to put the papers in the outer cloth bag.

WARNING! If the seed is treated, make sure that you put the paperwork in the cloth bag outside the plastic bag - never put the paperwork in the plastic bag containing the treated seed. **If you put the paperwork in with the treated seed, you create a risk of exposing personnel at the seed examination facility to pesticides.** Note that pesticide absorption through the skin is the most common cause of poisoning in agricultural workers.

Clearing the Seed Shipment

Refer to **Table 5-17** as a guide.

TABLE 5-17: Clearing Non-Canadian Origin Seed Shipments

If the importer:	Then:
Has posted a performance bond	ALLOW the seed to go forward to the owner's premise pending release by the SEF
Has not posted a performance bond	HOLD the seed until released by the SEF

Procedures

Boarding Aircraft

Procedures for Boarding Aircraft

Flight's Origin

Determine if the flight originated in Canada or some other foreign country, Hawaii, or a U.S. offshore territory.

Canadian Flights

If the flight originated in Canada, examine the stores. If you can confirm that any agricultural product was grown in either the United States or Canada, release the material. This would include citrus fruit stenciled with the brand of a U.S. grower (see "Evidence of Origin" on page 3-25). Collect meats, fruits, and vegetables of other than Canadian or continental U.S. Origin.

Precleared Flights

If the flight originated in a foreign country other than Canada, Hawaii, or any U.S. offshore territory; check to see if the flight was precleared by PPQ. Assume that all scheduled flights (and some charters) from Nassau or Freeport, Bahamas or Bermuda are precleared. RELEASE precleared flights.

Foreign Arrivals not Precleared

If the foreign, Hawaiian, or U.S. territorial flight was not precleared, then board the aircraft, clear its passengers, cargo, and crew:

- 1. Examine stores (including box lunches), and storage for produce, meats, and other agricultural items. Use the references in this manual to decide the appropriate action to take on intercepted items. Collect all inadmissible material (where you are directed to prohibit entry) for later incineration or sterilization.
- **2.** Remove all garbage and food waste (including unused meals) for incineration or sterilization.

Procedures: Boarding Aircraft Procedures for Boarding Aircraft

- **3.** Examine baggage and question passengers and crew to learn if they are carrying agricultural items. Use the references in this manual to decide the appropriate action to take on intercepted items. Collect all inadmissible material (where you are directed to prohibit entry) for later sterilization or incineration. If the owners of intercepted material object to the seizure and request action by CBP, then CONTACT a CBP Agriculture Specialist (CBP AS) for directions. Check the manifest to see if live animals and organisms are manifested. If the aircraft is carrying live animals or organisms, use the references in this manual to decide the appropriate action to take.
- **4.** Observe if there is infestation, soil, plant, or animal contamination (principally blood, manure, or straw). If you detect infestation or contamination, secure the aircraft and/or cargo, then immediately contact a CBP AS.
- 5. Incinerate or sterilize all garbage, refuse, and those prohibited items you collected. Officers of the Canadian Food Inspection Agency (CFIA) have agreed to assist in this incineration.

Procedures

Boarding Ships

General Instructions

- 1. Determine if the ship is plying only between continental United States and Canadian ports or has visited other foreign ports.
- **2.** If the ship was plying only between continental United States and Canadian ports, no further action is necessary.
- **3.** If the ship visited other foreign ports besides Canada, verify whether or not a CBP Agriculture Specialist (CBP AS) has been notified. If a CBP AS was not notified, contact them.
- **4.** In the absence of a CBP AS, make sure that no meat, stores, or animals are discharged. Do not allow any garbage to be removed or dumped overboard.

Breaking Seals

Foreign meats in sea stores of vessels plying the Great Lakes/St. Lawrence Seaway are sealed in freezer compartments by the Canadian Food Inspection Agency (CFIA). Although these seals are to remain intact while the vessel is in the Seaway or Great Lakes, in an emergency (like a failure in the refrigeration system) the seals can be broken by Federal officers. If you are asked by CFIA to break seals in sea stores, and you judge that there is a real emergency, then supervise the breaking of the seals and resealing of the stores by following this procedure:

- 1. **Record** the serial numbers of the seals that are broken.
- **2. Replace** the seals that were broken.
- **3. Record** the serial numbers of the new seals.
- **4. Contact** a CBP AS immediately. The CBP AS will notify the Canadian Food Inspection Agency.

Procedures: Boarding Ships Breaking Seals

Procedures

Handling Foreign Products

Procedures for Handling Foreign (other than Canadian) Agricultural Products in Transit¹

CONTACT a CBP Agriculture Specialist (CBP AS).

¹ In transit includes products moving from Canada and passing through the United States on their way back into Canada; or passing through the United States to reach another foreign country.

APHIS Form 2006: United States Veterinary Biological Product Permit

Purpose:

To permit the importation of veterinary diagnostics, viruses, bacteria, toxins, and analogous products into the United States.

Directions:

- **1.** See that the permit has not expired. If expired, REFER to CBP AS.
- **2.** See that the importation description matches the description of the material on the shipping documents. If not, REFER to CBP AS.
- **3.** If the permit is current, and the description on the permit matches the description on the shipping documents, RELEASE.

Certificates That May Accompany Meat and Animal Products (Reserved)

Certificates That May Accompany Plants and Plant Products

CFIA/ACIA Form 0108: Movement Certificate (Canadian)

Purpose: A document issued by the Canadian Food Inspection Agency certifying

that articles are permitted to move from quarantine areas. Since the United States and Canada have parallel regulations for the gypsy moth, this certificate is acceptable for the movement of bulk articles (like railroad crossties) and outdoor household effects from Canada

into the United States.

Directions: If this form declares that "the product is free from gypsy moth," then

you may release bulk articles (like timber and quarry products) and

outdoor household effects.

FIGURE A-4: CFIA/ACIA Form 0108—Movement Certificate (Canadian)

CFIA Form 1327: Phytosanitary Certificate (Canadian Origin)

Purpose:

A document issued by the Canadian Food Inspection Agency certifying to the phytosanitary condition of plants and unprocessed or unmanufactured plant products.

Directions:

- **1.** Use this form to confirm Canadian origin for plants and produce.
- **2.** Look at the "Additional Declaration" block for statements that are required for you to allow entry (like the importer holds a U.S. permit or the shipment has been treated for a particular pest).

If you detect an alteration on the phytosanitary certificate, **REFER to CBP AS**. Look for erasures, information that was struck through and changed, and the use of white out.

FIGURE A-5: CFIA Form 1327—Phytosanitary Certificate (Canadian Origin)

CFIA/ACIA Form 1357: Phytosanitary Certificate for Re-export (Canadian)

Purpose:

A document issued by the Canadian Food Inspection Agency certifying that plants and unprocessed or unmanufactured plant products re-exported from Canada are considered to conform to the phytosanitary regulations of the importing country and that while in Canada, the material was not subject to infection or infestation.

Directions:

- **1.** Use this form to identify the foreign source (non-Canadian) for plants and produce.
- **2.** Use this form to confirm U.S. origin for U.S. plants being returned from Canada.

FIGURE A-7: CFIA/ACIA Form 2401, E2 Certificate (Canadian)

Directions:

CFIA/ACIA Form 4743: Phytosanitary Certificate (Canadian Origin)

Purpose: A document issued manually by the Canadian Food Inspection Agency

certifying to the phytosanitary condition of plants and unprocessed or

unmanufactured plant products.

1. Use this form to confirm Canadian origin for plants and produce.

2. Look at the "Additional Declaration" block for statements that are required for you to allow entry (like the importer holds a U.S. permit or the shipment has been treated for a particular pest).

If you detect an alteration on the phytosanitary certificate, **REFER to CBP AS**. Look for erasures, information that was struck through and changed, and the use of white out.

CFIA/ACIA Form 5289: Seed Analysis Certificate (Canadian)

Purpose: A document issued by the Canadian Food Inspection Agency for seed

destined for the United States.

Directions: Use this form in lieu of a phytosanitary certificate to allow the entry of

seed that is not Canadian or U. S. grown and not listed in the U. S. Federal Seed Act regulations. Check to make sure that the 5289 is

issued by an accredited laboratory (refer to **Appendix D**).

FIGURE A-9: CFIA/ACIA Form 5289, Seed Analysis Certificate (Canadian)

CFIA/ACIA Form 5309: Seed Export Label

Purpose: A document issued by the Canadian Food Inspection Agency to certify

seed exported by facilities that are certified in the Canadian

Phytosanitary Certification Program for Seed. It is typically used to

certify shipments of small packet seed.

Directions: Use this form in lieu of a phytosanitary certificate to allow the entry of seed into the U. S. from the authorized Canadian exporters listed in

Appendix D.

FIGURE A-10: CFIA/ACIA Form 5309, Seed Export Label

CFIA/ACIA Form 5314: Export Document for C-PIQ Establishments Fresh Fruit and Vegetables

Purpose: A document issued by the Canadian Food Inspection Agency certifying

that the shipment is from an establishment operating under a CFIA recognized quality assurance program aimed at verifying that the products meet the Fresh Fruit and Vegetable Regulations and the U.S.

Import Requirements of 7 U.S.C. 608e-1.

Directions: Use this form in lieu of a phytosanitary certificate to allow the entry of

fresh potatoes into the U.S.

FIGURE A-11: Export Document for C-PIQ Establishments Fresh Fruit and Vegetables

CFIA/ACIA Form 5329: Material Produced under the Swede Midge Certification Program

Purpose:

A document issued by the Canadian Food Inspection Agency certifying that the shipment of greenhouse grown plants was produced under the Swede Midge Certification Program and is considered to conform with the phytosanitary import requirements of the United States.

Directions:

Use this form to allow the entry of greenhouse grown host plants of Swede Midge into the U. S.

FIGURE A-12: CFIA/ACIA Form 5329, Material Produced under the Swede Midge Certification Program

CFIA/ACIA Form 5378: Canadian Nursery Certification Program Phytosanitary Certificate

Purpose:

This label certifies that accompanying plants were produced in accordance with the Canadian Nursery Certification Program and are considered to conform with the phytosanitary import requirements of the United States.

Directions:

- **1.** Use this form to confirm Canadian origin for plants and produce.
- **2.** Look at the "Additional Declaration" block for the statement shown in **Figure A-13**.

If you detect an alteration on the phytosanitary certificate, **REFER to CBP AS**. Look for erasures, information that was struck through and changed, and the use of white out.

CFIA/ACIA Form 5565: Certificate of Origin for Potatoes

Purpose:

A document issued by the Canadian Food Inspection Agency certifying the origin of potatoes exported to the United States.

Directions:

Use this form to allow entry of potatoes into the U. S. If the potatoes are from a Potato Cyst Nematode (PCN) regulated area and grown, processed, and shipped per the required protocol, CFIA will provide the following additional declaration (AD): "The potatoes in this shipment have been cleaned and commercially packed in a CFIA approved facility." The areas of Canada regulated for PCN by CFIA are the following:

- ◆ Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- ◆ British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- ◆ Newfoundland and Labrador: The entire island of Newfoundland
- ◆ Quebec: The municipality of Saint-Amable

Forms to Use When Seizing Agricultural Products

Leaflet: Notice to Arriving Traveler

Purpose: A leaflet that explains to the traveler why agricultural items must be

seized.

Directions: Give this leaflet to the traveler whenever you seize an article or have it

returned to Canada.

Availability: Order this leaflet from your local PPQ contact. The leaflet is available

in several languages so be prepared to tell your contact what languages you need. The leaflet reproduced on the adjacent is in

English and French. Feel free to photocopy this leaflet.

NOTICE TO ARRIVING TRAVELER

We regret that it is necessary to take agricultural items from your baggage. They cannot be brought into the United States because they sometimes carry plant and animal pests and diseases. Restricted items include fruits, vegetables, meats, plants, soil, and products made from plant or animal materials.

Agricultural pests and diseases are a threat to U.S. food crops and livestock. Some of these organisms are natural "polluters" capable of upsetting local ecological balances by destroying trees and other plant life. They also can affect property values by damaging lawns, ornamental plants, and (in the case of termites and other wood-eating insects) homes.

Confiscated items are carefully destroyed in special facilities of the U.S. Department of Agriculture. If you have any questions, write to: "Quarantines," U.S. Department of Agriculture, P. O. Box 96464, Washington, DC 20090-6464.

To file a complaint, write the Secretary of Agriculture, U. S. Department of Agriculture, Washington, DC 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

Nous regrettons la necessite d'avoir a supprimer les produits agricoles de vos bagages. Ils ne peuvent pas etre introduits aux Etats-Unis parce qu'ils transportent parfois des insectes nuisibles aux plantes et aux animaux. Les articles sujets a ces restrictions comprennent fruits, legumes, viandes, plantes, terre, et produits fabriques avec des substances vegetales ou animales.

Les insectes et les maladies agricoles representent une menace pour les recoltes vivrieres, les plantes ornementales, et le cheptel des Etats-Unis. Certains de ces organismes bouleversent les balances naturelles en detruisant les arbres et autres flores. Ils peuvent aussi reduire la valeur des proprietes en endommageant les pelouses, les plantes ornementales, et meme les maisons—lorsque les termites et autres insectes detruisent le bois.

Les articles confisques sont soigneusement detruits dans des locaux speciaux du Ministere de l'agriculture des Etats-Usis. Si vous avez une question quelconque, ecrivez au bureaua "Quarantines," U.S. Department of Agriculture, P. O. Box 96464, Washington, DC 20090-6464.

Forms to Use When Seizing Agricultural Products

PPQ Form 216: Cooperators Agriculture Products Monthly Seizure Record

Purpose: A form on which to record agricultural products seized and the

number of flights boarded.

Directions: 1. Use this form to tally the number of articles seized for each of the

five categories.

2. For meats, enter the number of pounds seized.

3. Tally your "scores" at the end of the month and send to your CBP

AS contact.

Availability: Request additional forms from your CBP AS contact.

	d original or copy of this record to designated PPQ part before the 10th of the mo	onth following the period covered.

Forms to Use When Sampling Agricultural Products

PPQ Form 237: Record of Seed Offered for Importation Under the Federal Seed Act

Purpose:

A form that notifies consignees that their seed has been sampled and forwarded to USDA for examination. The form warns the consignee that the seed must be held intact subject to redelivery to Customs if demanded.

Directions:

- **1.** Complete Section 1 of this form for each lot of seed.
- **2.** Put the completed pink copy (Part 3) of the form and declaration of labeling (copy of the label and invoice) into the cloth bag.
- **3.** Secure the outer cloth bag by tying the mailing tag.
- **4.** Send the sample with its completed form by **PRIORITY MAIL** to:

Seed Examination Facility PPQ-APHIS-USDA Building 580 BARC-E Beltsville, MD 20705

- **5.** Give the completed yellow copy (Part 4) of the form to the consignee or the consignee's agent.
- **6.** Mail the remaining white copies (Parts 1 and 2) of the completed form to the SEF in a separate envelope. Mail these copies the same day you send the sample—but separate from the sample.

Availability:

Request additional forms, bags, and tags from the address listed above.

Appendix B

Extracts from CBP Regulations that Pertain to Agricultural Products

General

19 CFR 145.57 Regulations of Other Agencies

Certain types of plants and plant products, food, drugs, cosmetics, hazardous or caustic and corrosive substances, viruses, serums, and various harmful articles are subject to examination and clearance by appropriate agencies before release to the addressee (see Part 12 of this chapter).

Plants and Plant Products

19 CFR 12.10 Regulations and Orders of the Department of Agriculture

The importation into the United States of plants and plant products is subject to regulations and orders of the Department of Agriculture restricting or prohibiting the importation of such plants and plant products. Customs officers and employees shall perform such functions as are necessary or proper on their part to carry out such regulations and orders of the Department of Agriculture and the provisions of law under which they are made.

19 CFR 12.11 Requirements for Entry and Release

A. The importer or his representative shall submit to the director of the port of first arrival, for each entry of plants or plant products requiring a plant quarantine permit, a notice of arrival for any type of entry except rewarehouse and informal mail entries. Such notice shall be on a form provided for the purpose by the Department of Agriculture. The director of the port of arrival shall compare the notice of arrival which he receives from the importer or his representative with the shipping documents, certify its agreement therewith, and transmit it, together with any accom panying certificates or other documents pertaining to the sanitary status of the shipment, to the Department of Agriculture. The merchandise may not be moved, stored, or otherwise disposed of until the notice of arrival has been submitted and release for the

- intended purpose has been authorized by an inspector of the Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs.
- **B.** Where plant or plant products are shipped from the port of first arrival to another port or place for inspection or other treatment by a representative of the Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs, and all Customs requirements for the release of the merchandise have been met, the merchandise shall be forwarded under a special manifest (Customs Form 7512) and in-bond labels or Customs seals to the representative of the Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs at the place at which the inspection or other treatment is to take place. No further release by the port director shall be required.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978]

19 CFR 12.12 Release Under Bond

Plants or plant products which require fumigation, disinfection, sterilization, or other treatment as a condition of entry may be released to the permittee for treatment at a plant approved by the Department of Agriculture upon the giving of a bond on Customs Form 301, containing the bond conditions set forth in §113.62 of this chapter to insure that the merchandise is treated under the supervision and to the satisfaction of an inspector of the Department of Agriculture or returned to Customs custody when demanded by the port director.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 84-213, 49 FR 41167, Oct. 19, 1984]

19 CFR 12.13 Unclaimed Shipments

- **A.** If plants or plant products enterable into the United States under the rules and regulations promulgated by the Secretary of Agriculture are unclaimed, they may be sold subject to the provisions of Subparts C and D of Part 127 of this chapter to any person to whom a permit has been issued who can comply with the requirements of the regulations governing the material involved.
- **B.** Unclaimed plants and plant products not complying with the requirements mentioned in this section shall be destroyed, by burning or otherwise, under Customs supervision.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 74-114, 39 FR 12091, Apr. 3, 1974]

19 CFR 12.14 Detention

- **A.** Port directors shall refuse release of all plants or plant products with respect to which a notice of prohibition has been promulgated by the Secretary of Agriculture under any of the various quarantines. If an importer refuses to export a prohibited shipment immediately, the port director shall report the facts to the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs and the United States attorney and withhold delivery pending advice from that Department.
- **B.** In case of doubt as to whether any plant or plant product is prohibited, the port director shall detain it pending advice from the Department of Agriculture.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978]

19 CFR 12.15 Disposition; Refund of Duty

Plants or plant products which are prohibited admission into the United States under Federal law or regulations and are exported or destroyed under proper supervision are exempt from duty and any duties collected thereon shall be refunded. (See 158.41 and 158.45(c) of this chapter.)

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 72-258, 37 FR 20174, Sept. 17, 1972]

19 CFR 18.21 Restricted and Prohibited Merchandise

A. Merchandise subject upon importation to examination, disinfection, or further treatment under quarantines and Quarantine Division, Agricultural Research Service, Department of Agriculture, shall be released for transportation or exportation only upon written permission of, or under regulations issued by, that Bureau. (See §12.10 to §12.15 of this chapter.)

19 CFR 18.23 Change of Destination; Change of Entry

A. The foreign destination of such merchandise may be changed by the parties in interest upon notice to the district director at the port of exit from the United States. The district director at the port of exit, in his discretion, may report the application for a change of foreign destination to the district director at the port of entry.

B. Such merchandise may be entered for consumption or warehouse or under any other form of entry. If the merchandise is subject on importation to quarantine and regulations administered by the Bureau of Entomology and Plant Quarantine, it shall be entered for consumption or warehouse only upon written permission of, or under regulations issued by, that Bureau. (See §12.10 to §12.15 of this chapter.)

Animals and Animal Products

19 CFR 12.24 Regulations of the Department of Agriculture

A. The importation into the United States of domestic animals, animal products, and animal feeding materials is subject to inspection and quarantine regulations of the Department of Agriculture, Customs officers and employees are authorized and directed to perform such functions as are necessary or proper on their part to carry out such regulations of the Department of Agriculture.

Meat and Meat-Food Products

19 CFR 12.8 Inspection; bond; release

A. All imported meat, meat-food products¹ horse meat and horse meat-food products offered for entry into the United States are subject to the regulations prescribed by the Secretary of Agriculture under section 306, Tariff Act of 1930. Such meat, meat-food products, horse meat and horse meat-food products shall not be released from Customs custody prior to inspection by an inspector of the Animal and Plant Health Inspection Service, except when authority is given by such inspector for inspection at the importer's premises or other place not under Customs supervision.

¹ The term "meat and meat-food products," for the purpose of this section, shall include any imported article of food or any imported article which enters or may enter into the composition of food for human consumption, which is derived or prepared in whole or in part from any portion of the carcass of any cattle, sheep, swine, or goat, is such portion is all or a considerable and definite portion of the article.

Bees, Insects, Earthworms, and Like Organisms

19 CFR 12.17 Importation Restricted

The importation into the United States of viruses, serums, toxins, and analogous products for use in the treatment of domestic animals is prohibited unless the importer holds a permit from the Department of Agriculture covering the specific product. The port director shall notify the Animal and Plant Health Inspection Service, Veterinary Services, Washington, DC, of the arrival of any such product, and detain it until he shall receive notice from that Department that a permit to import the shipment has been issued.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978; T.D. 82-145, 47 FR 35476, Aug. 16, 1982]

19 CFR 12.18 Labels

Each separate container of such virus, serum, toxin, or analogous product imported is required by the regulations of the Department of Agriculture to bear the true name of the product and the permit number assigned by the Department of Agriculture in the following form: "U.S. Veterinary Permit No. -----," or an abbreviation thereof authorized by the Animal and Plant Health Inspection Service. Each separate container also shall bear a serial number affixed by the manufacturer for identification of the product with the records of preparation thereof, together with a return date.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060. Mar. 29, 1978]

19 CFR 12.19 Detention; Samples

- **A.** The port director shall detain all shipments of such products for which no permit to import has been issued pending instructions from the Department of Agriculture.
- **B.** Samples shall be furnished to the Department of Agriculture upon its request, and the port director shall immediately notify the consignee of any such request.

19 CFR 12.20 Disposition

Viruses, serums, or toxins rejected by the Department of Agriculture shall be released by the port director to that Department for destruction, or exported under Customs supervision at the expense of the importer if exportation is authorized by the Department of Agriculture.

19 CFR 12.31 Plant Pests

The importation in a live state of insects which are injurious to cultivated crops, including vegetables, field crops, bush fruits, and orchard, forest or shade trees, and of the eggs, pupae, or larvae of such insects, except for scientific purposes under regulations prescribed by the Secretary of Agriculture, is prohibited.² All packages containing live insects or their eggs, pupae, or larvae arriving from abroad, unless accompanied by a permit issued by the Department of Agriculture, shall be detained and submitted to the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs of that Department for inspection and determination of their admissibility into the United States.

[28 FR 14710. Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978; T.D. 82-145, 47 FR 35476, Aug. 16, 1982]

19 CFR 12.32 Honeybees and Honeybee Semen

A. Honeybees from any country may be imported into the U.S. by the Department of Agriculture for experimental or scientific purposes. All other importations of honeybees are prohibited except those from a country which the Secretary of Agriculture has determine to be free of diseases dangerous to honeybees.

⁽a) No person shall knowingly move any plant pest from a foreign country into or through the United States, or interstate, or knowingly accept delivery of any plant pest moving from any foreign country into or through the United States, or interstate, unless such movement is authorized under general or specific permit from the Secretary and is made in accordance with such conditions as the Secretary may prescribe in the permit and in such regulations as he may promulgate under this section to prevent the dissemination into the United States, or interstate, of plant pests. (7 U.S.C. I50bb(a)).

⁽b) The Secretary may refuse to issue a permit for the movement of any plant pest when, in his opinion, such movement would involve a danger of dissemination of such pests. The Secretary may permit the movement of host materials otherwise barred under the Plant Quarantine Act when they must necessarily accompany the plant pest to be moved. (7 U.S.C. I5Obb(b)).

⁽c) As used in this chapter, except where the context otherwise requires.

[&]quot;Plant pest" means any living stage of: Any insects, mites, nematodes, slugs, snails, protozoa, or other invertebrate animals, bacteria, fungi, other parasitic plants or reproductive parts thereof, viruses, or any organisms similar to or allied with any of the foregoing, or any infectious substances, which can directly or indirectly injure or cause disease or damage in any plants or parts thereof, or any processed, manufactured, or other products or plants. (7 U.S.C. 150aa).

Appendix C

Directory of CBP Contacts Along the Canadian Border

Introduction

Do not give cell phone numbers to brokers and the public; they end up distributed across the country. Forward Phytosanitary Certificates, copy invoices and other documents to the address listed for your state, unless other arrangements are made by your local CBP office.

If you have checked the manual and local policy and still need a decision, please call Blaine, WA or Buffalo, NY during the hours listed. Otherwise, don't let the article in question enter. As soon as we have a 24-hour border information number it will be listed here.

Laboratories Authorized to Issue Seed Analysis Certificates

This list changes frequently. Contact the Seed Examination Facility for possible updates to the list.

The following laboratories are authorized to issue Seed Analysis Certificates (PPQ Form 925 or CFIA Form 5289):

- **1.** 20/20 Seed Labs Ltd. Attn. Sarah Foster-Stubbs Suite 201, 509-11th Avenue Nisku, AB T9E 7N5, Canada
- Accu-Test Seed LaboratoryAttn. Dorothy Gerrard102 2nd AvenueP. O. Box 579Rivers, MB ROK 1X0, Canada
- **3.** A. E. McKenzie Seeds Laboratory Attn. Betty Girard 30 9th Street Brandon, MB R7A 6E1, Canada
- 4. Ag Seed LabAttn. Janet StonerP. O. Box 998Carrot River, SK S0E 0L0, Canada
- **5.** Agricore United Seed Laboratory Attn. Peggy Van Petten 4722-39 Street Camrose, AB T4V 0Z5, Canada

6. BioVision Seed Labs (Grande Prairie)

Attn. Michele Kulba, Amanda Longson, and Deborah Schulze Suite C, 12803-100th Street Grand Prairie. AB T8V 4H3, Canada

7. BioVision Seed Labs (Edmonton)

Attn. Terry McIntee, Sandra Dyck, or Crystal Dentman 7225 B Roper Rd. Edmonton, AB T6B 3J4, Canada

8. BrettYoung (Winnipeg) Ltd.

Attn. Harold Murphy P. O. Box 99, St. Norbert Postal Station Winnipeg, MB R3V 1L5, Canada

9. BrettYoung (Rycroft) Ltd.

Attn. Charolette Kozuback

P. O. Box 100

Rycroft, AB T0H 3A0, Canada

10. Canadian Seed Laboratories Ltd.

Attn. Catharine Breadner, Agatha Sebastian, or Barbara Lovitt 208 St. David Street P. O. Box 217

11. La Coop Fédérée

Attn. Chantal Lecavalier 2405 rue de la Province Longueuil, QC J4G 1G3, Canada

Lindsay, ON K9V 5Z4, Canada

12. Discovery Seed Laboratory - Nipawin

Attn. Tera McCloy P.O. Box 1180 700 Railway Ave. Nipawin, SK S0E 1E0, Canada

13. Discovery Seed Laboratory - Saskatoon

Attn. Reylyn Ordonez 450 Melville Street Saskatoon, SK S7J 4M2, Canada

14. SGS Canada Inc.

Attn. Glen Green 103-38 Portage Avenue E. Winnipeg, MB R2C 0A1, Canada

15. Hannas Seeds Ltd.

Attn. Doris Ballantine 5039 49 Street Lacombe, AB T4L 1Y2, Canada

- **16.** Hyland Seed Quality Laboratory Attn. Ms. Christine DeRooy P.O. Box 250, Blenheim, ON NOP 1A0, Canada
- **17.** Kent Agri Laboratory Attn. Dianne Gilhuly R.R. 2 Tupperville, ON NOP 2M0, Canada
- **18.** Laboratoire P.E.Q. Attn. Roxane Dubois 1486 Boul Jarry Chomedey Laval, QC H7W 2W8, Canada
- **19.** Lendon Seed Laboratory Attn. Taj Prasad 147 Hodsman Road Regina, SK S4N 5W5, Canada
- **20.** Livingstone Seed Laboratory Attn. Gail Livingstone 22 Langfield Cres. Etobicoke, ON M9V 3L7, Canada
- **21.** Monsanto Canada Inc. Seed Laboratory¹ Attn. Chris Vandersluis 301 Richmond Street Chatham, ON N7M 1P5, Canada
- 22. Norseco Inc. Attn. Lise Goudreau 2914 Curé-Labelle Laval, QC H7P 5R9, Canada
- 23. Parkland LaboratoriesAttn. Walter Pitz5410 Gaetz AvenueRed Deeer, AB T4N 4B7, Canada
- **24.** Perth Seed Laboratory Attn. Ms. Bernadine Wolfe R.R.#5, Line 42, 6455 West Perth Mitchell, ON NOK 1NO, Canada
- **25.** Pioneer Hi-Bred Ltd. Attn. Ms. Mary Ellen Van Zelst 7398 Queen's Line, Country Rd. Hwy 2 W Chatham, ON N7M 5L1, Canada

¹ This laboratory was formerly known as DeKalb.

- **26.** Prairie Diagnostic Seed Lab Inc. Attn. Bonnie Ernst or Kelly Hansen 1105 Railway Avenue Weyburn, SK S4H 3H5 Canada
- **27.** Precision Seed Testing Laboratory Attn. Sherry Corvalan and Lee-Anne Alde P.O. Box 210, 1120 8th Ave. Beaverlodge, AB TOH 0C0, Canada
- **28.** Pride Seeds (AgReliant Genetics) Attn. Ernestine Demers P.O. Box 1088 Chatham, ON N7M 5L6, Canada
- **29.** Viterra (Saskatoon) Attn. Dona Coroy #102-407 Downey Road Saskatoon, SK S7N 4L8, Canada
- **30.** Seed Check Technologies Inc. Attn. Mr. Morgan Webb and Lisa Behnke #220 5904B-50 Street Leduc. AB T9E 6J4. Canada
- **31.** Seed Science and Technology Section Saskatoon Laboratory, CFIA Attn. Janine Maruschak 301-421 Downey Road Saskatoon, SK S7N 4L8, Canada
- **32.** Synagri S.E. C. / L.P. (St. Rosalie) Attn. Cécile Tétreault 5175 Boul. Laurier Est. Saint-Hyacinthe, QC J2R 2B4, Canada

Facilities Approved to Clean Canadian Seed

This list changes frequently. Contact the Seed Examination Facility for possible updates to the list.

The following facilities are approved to clean Canadian seed:

- **1.** ABI Alfalfa P.O. Box 1130 Nampa, ID 83653-1130
- 2. CHS P.O. Box 11065 Spokane, WA 99211
- Clark Seeds Inc. 4784 Highway 310 Graybull, WY 82426
- **4.** Clark Seeds Inc. 9311 Highway 45 Nampa, ID 83686
- **5.** Crites Moscow Growers, Inc. 212 West 8th Moscow, ID 83843
- Crossroads Seed and Feed (Mr. John Brown)
 200 Marias Fair Road Shelby, MT 59474
- 7. Dairyland Seed Co. (Lynn Nichols) 504 West Idaho Ave. Homesdale, ID 83628
- 8. Deer Creek Seed Inc. (Mr. Bill Leakey)P. O. Box 105Ashland, WI 54806
- **9.** Ernst Crownvetch Farms AKA Ernst Conservation Seeds 9006 Mercer Pike Meadville, PA 16335

- **10.** First Creek Ranch (Mr. Darryl Menge)
 Box 48
 Saco, MT 59261
- 11. General Feed and Grain Inc. (Mr. Vic Raye)P. O. Box 748Bonners Ferry, ID 83805
- **12.** Mark Glinz 1075 Highway 5 NE Bottineau, ND 58318
- **13.** Gries Seed Farms Inc. 2340 N. 9th Street Fremont, OH 43420
- **14.** Habstritt Seed Co. Box 148 Roseau, MN 56751
- **15.** Harvest States (Seed) (Kevin Rogers) 1015 N. Thierman Road Spokane, WA 99212
- **16.** K S Seed Cleaner 11733 Selah Springs Road Silverton, OR 97381
- **17.** Legacy Seeds (Mr. Steve Jensen) 16762 Malt Caldwell, ID 83605
- **18.** Norfarm Seeds, Inc. (Mr. Dennis Montgomery)
 P. O. Box 725
 Bemidji, MN 56601
- **19.** Norfarm Seeds, Inc. (Mr. Leroy Roseen) RR-2, Box 37 Roseau, MN 56751
- **20.** Pioneer Hi-Bred Intl., Inc. 9178 Lakeshore Drive Nampa, ID 83686
- **21.** Premium Natural Foods (Mr. Leslie E. Gasal) RR1, Box 228 Grandin, ND 58038

- **22.** Rivards Quality Seed, Inc. P.O. Box 303
 Argile, MN 56713
- **23.** Rolla Seed Co. (Mr. Chad Leas)
 P. O. Box 1209
 Rolla, ND 58367-1209
- **24.** Saco Dehy Inc. (Mr. Bobbie Menge) P. O. Box 268 Saco, MT 59261
- **25.** Scootney Spring Seeds 999 West Hatton Road Othello, WA 99344
- **26.** Seeds, Inc. P. O. Box 866 Tekoa, WA 99033
- **27.** Selkirk Seed Co. HCR 85, Box 4 Bonners Ferry, ID 83805
- 28. Seminis Vegetable Seeds (Mr. Gary Petersen) 529 North Street P. O. Box 290 Filer, ID 83328
- 29. Seminis Vegetable Seeds 115 E. 1st N Warden, WA 98857
- **30.** Stubbs Seed Services (Mr. Jerry Robinson)
 P. O. Box 8975
 Moscow, ID 83843
- **31.** Superior Grains Inc. (Mr. Les Knudson) 11225 108th St. NW Crosby, ND 58730
- **32.** Timeless Seeds, Inc. P. O. Box 881 Conrad, MT 59425
- 33. Treasure State Seed, Inc. (Mr. Donald Becker)P. O. Box 698Fairfield, MT 59436

- **34.** Waconda Seed 13723 French Prairie Rd., NE Gervais, OR 97026
- **35.** Weinlaeder Seed Company 7162 160th Drive NE Drayton, ND 58225

Establishments Approved for Processing Screenings

This list changes frequently. Contact the Seed Examination Facility for possible updates to the list.

The following establishments are approved for processing screenings:

- **1.** ADM Northern Sun 5525 136th Ave. SE. Enderlin, ND 58027
- **2.** ADM Processing 1388 Highway 97 Velva, ND 58790
- **3.** Agra Basic Feed 100 S. Broadway Belgrade, MT 59714
- 4. Cenex Ag.P.O. Box 102913007 Downs RoadMt. Angle, OR 97362
- Evans Grain & Elevator Co.P.O. Box 2208Great Falls, MT 59403
- **6.** Farmers Feed & Supply Co., Inc. 549 S. 2nd Hillsboro, OR 97123
- 7. Koch Agri Services P. O. Box 1186 Occidental and Sub Streets Burley, ID 83318
- **8.** Kropf Seed, Inc. 23765 Towerline Road Harrisburg, OR 97446

- 9. Land O' Lakes Cenex Ag. 2407 Warren Avenue P.O. Box 123 Twin Falls, ID 83303
- **10.** Mid Valley Milling Inc. P. O. Box 49 Prosser, WA 99350
- **11.** NW Feed Manufacturing 245 5th Avenue South Twin Falls, ID 83301
- **12.** R & G Quality Feed P. O. Box 160 Malta, MT 59538
- **13.** Rivards Quality Seed, Inc. (Mr. Ken Schuster, General Manager) P.O. Box 303
 Argyle, MN 56713
- **14.** Saco Dehy Inc. (Mr. Bobby Menge) P. O. Box 268 Saco, MT 59261
- **15.** Wilcox Feed & Seed, Inc. 200 N. 5th Street Harrisburg, OR 97446
- **16.** Winn Feed Company 600 South 400 West Smithfield, UT 84335

Exporters Authorized to Use Seed Export Labels

This list changes frequently. Contact the Seed Examination Facility for possible updates to the list.

The following companies are authorized by the Canadian Food Inspection Agency (CFIA) to use the seed export label (CFIA Form 5309) to export seed to the United States in lieu of a Canadian phytosanitary certificate:

- **1.** A. E. McKenzie Seeds Co. Inc. Registration # 1740-101
- **2.** Angelgrove Tree Seeds Registration # 03-002

- **3.** Botanical Paperwork Inc. Registration # 06-001
- **4.** JVK Registration # 1742-106
- **5.** Richter's Seeds Registration # 02-001
- **6.** Stoke's Seeds Registration # 1666-117
- **7.** The Butchart Gardens Registration # 03-003
- **8.** Vessey's Seeds Registration # 1758-145
- **9.** West Coast Seeds Registration # 08-001

Appendix E

Lists of the Most Common Vegetable and Annual Bedding Plants and Herbaceous Perennial Plants

Vegetable and Annual Bedding Plants¹

Abelmoschus esculentus, okra
Achimenes spp. (grown as annuals in North)
Ageratum houstonianum, ageratum
Allium cepa, onion
alyssum, sweet, Lobularia maritima
Amaranthus spp.
Apium graveolens var. dulce, celery
Arachis hypogaea, peanut
aster, Callistephus spp.

bachelor button, Centaurea cyanus

balsam, Impatiens spp.

basil, Ocimum basilicum

bean, field *Phaseolus* spp.

beet, Beta vulgaris

Begonia grandis ssp. evansiana, hardy begonia

Begonia spp. (cultivated kinds are grown as annuals in North)

Begonia x tuberhybrida, tuberous begonia

Beta vulgaris, beet

Beta vulgaris subsp. cicla, chard

Brassica juncea, mustard greens

Brassica oleracea var. botrytis, cauliflower

Brassica oleracea var. capitata, cabbage

Brassica oleracea var. gemmifera, Brussels sprouts

Brassica oleracea var. gongylodes, kohlrabi

Brassica oleracea var. italica, broccoli

Brassica oleracea var. viridis, collards, kale

Brassica rapa ssp. rapa, turnip

broccoli, Brassica oleracea var. italica

broomcorn, Sorghum bicolor

Browallia spp. (grown as annuals in North)

Brussels sprouts, Brassica oleracea var. gemmifera

Bupleurum rotundifolium, thoroughwax

¹ Scientific names are in italics.

cabbage, Brassica oleracea var. capitata

Calceolaria spp. (herbaceous kinds only, grown as annuals in North)

Calendula arvensis, field marigold

Calendula officinalis, pot-marigold

Callistephus spp., aster

candytuft, globe, Iberis umbellata

candytuft, rocket, Iberis amara

cantaloupe, Cucumis melo ssp. melo

carrot, Daucus carota subsp. sativus

Carthamus spp.

Catharanthus roseus, rosy periwinkle (when grown as annual)

cauliflower, Brassica oleracea var. botrytis

celery, Apium graveolens var. dulce

Celosia argentea var. cristata, cockscomb

Centaurea cyanus, bachelor button

chard, Beta vulgaris subsp. cicla

Citrullus lanatus var. lanatus, watermelon

coleus, Solenostemon scutellarioides

collards, Brassica oleracea var. viridis

corn, Zea mays

Cosmos bipinnatus

Cosmos sulphureus, orange or yellow cosmos

Crepis rubra

cucumber, Cucumis sativus var. sativus

Cucumis melo ssp. melo, cantaloupe, melon

Cucumis sativus var. sativus, cucumber

Cucurbita spp., gourds, pumpkin, squash

Daucus carota subsp. sativus, carrot Dimorphotheca spp.

eggplant, Solanum melongena

field marigold, Calendula arvensis flax, flowering, Linum grandiflorum

Gaillardia pulchella, Indian blanket-flower garden balsam, *Impatiens balsamina*

Gazania spp.

Geranium spp.

Glandularia canadensis, rose vervain (grown as annuals in North)

Gomphrena spp.

gourds, Cucurbita spp.

hardy begonia, Begonia grandis ssp. evansiana

Helianthus spp. sunflower

Helichrysum spp.

Hibiscus spp. (only tropical kinds grown as annuals)

Iberis amara, rocket candytuft
Iberis umbellata, globe candytuft
Impatiens balsamina, garden balsam
Impatiens hawkeri, New Guinea impatiens
Indian blanket-flower, Gaillardia pulchella
Ipomoea batatas var. batatas, sweet potato

kale, Brassica oleracea var. viridis kohlrabi, Brassica oleracea var. gongylodes

Lactuca sativa, lettuce
Lathyrus odoratus, sweet pea
lettuce, Lactuca sativa
Linum grandiflorum, flowering flax
Lobularia maritima, sweet-alyssum
lupine, blue, Lupinus angustifolius
lupine, white, Lupinus albus
Lupinus albus, white lupine
Lupinus angustifolius, blue lupine
Lycopersicon spp., tomato

marigold, Tagetes spp. melon, Cucumis melo ssp. melo Mexican zinnia, Zinnia haageana mournful-widow, Scabiosa atropurpurea mustard greens, Brassica juncea

nasturtium, *Tropaeolum* spp. New Guinea impatiens, *Impatiens hawkeri*

Ocimum basilicum, basil okra, Abelmoschus esculentus onion, Allium cepa

parsley, Petroselinum crispum
pea, Pisum spp.
peanut, Arachis hypogaea
pepper, Piper nigrum
periwinkle, rosy, Catharanthus roseus (when grown as annual)
Petroselinum crispum, parsley
Petunia spp.
Phaseolus spp., field bean
Piper nigrum, pepper
Pisum spp., pea
Portulaca spp., purslane
pot-marigold, Calendula officinalis
potato, Solanum tuberosum
pumpkin, Cucurbita spp.
purslane, Portulaca spp.

radish, Raphanus sativus Raphanus sativus, radish rose vervain, Glandularia canadensis (grown as annuals in North)

Salvia splendens, scarlet sage
Scabiosa atropurpurea, mournful-widow
scallion, Allium cepa
scarlet sage, Salvia splendens
Solanum melongena, eggplant
Solanum tuberosum, potato
Solenostemon scutellarioides, coleus
Sorghum bicolor, sorghum, broomcorn
spinach, Spinacia oleracea
Spinacia oleracea, spinach
squash, Cucurbita spp.
statice, annual, Limonium spp.
sunflower, Helianthus spp.
sweet pea, Lathyrus odoratus
sweet potato, Ipomoea batatas var. batatas

Tagetes spp., marigolds thoroughwax, Bupleurum rotundifolium tomato, Lycopersicon spp. Tropaeolum majus, garden nasturtium tuberous begonia, Begonia x tuberhybrida turnip, Brassica rapa ssp. rapa

Verbena x hybrida, garden verbena (grown as annuals in North)

Watermelon, Citrullus lanatus var. lanatus

Zea mays, corn zinnia, common, Zinnia violacea Zinnia haageana, Mexican zinnia Zinnia violacea, zinnia

Herbaceous Perennial Plants^{2,3}

Achillea spp., yarrow Aconitum spp., monkshood Actaea racemosa, black snakeroot Adriatic bellflower, Campanula garganica Ajuga reptans, bugle weed Alchemilla spp., ladysmantle Amasonia spp., blue stars Anemone pulsatilla, pasque flower Aquilegia spp., columbine Arabis alpina, mountain rockcress Armeria spp., thrift, sea pink, statice Artemisia ludoviciana, silver king Aruncus spp., goats-beard Asclepias tuberosa, butterfly-weed Aster novi-belgii, New York aster Astilbe spp. Aubrieta spp. Aurinia saxatilis ssp. saxatilis, golden tuft alyssum avens, Geum spp.

baby's-breath, Gypsophila paniculata
balloon flower, Platycodon grandiflorus
bee balm, Monarda didyma
bellflower, Campanula spp.
Bellis perennis, English daisy
Bergenia crassifolia, heartleaf saxifrage, Siberian-tea
black snakeroot, Actaea racemosa
blazing star, Liatris spp.
bleeding heart, Dicentra spectabilis
blue stars, Amasonia spp.
Bracteantha bracteata, strawflower
bugle weed, Ajuga reptans
butterfly-weed, Asclepias tuberosa

Campanula garganica, Adriatic bellflower
Campanula spp., bellflower (most cultivated kinds are perennial)
cardinal flower, Lobelia cardinalis
carnation, Dianthus spp.
Centaurea dealbata, Persian cornflower
Centaurea spp., cornflower
Cerastium tomentosum, snow-in-summer
Chelone spp., turtlehead
Chrysanthemum coccineum, see Tanacetum coccineum

² A Canadian Phytosanitary Certificate is mandatory for these plants.

³ Scientific names are in italics.

Chrysanthemum maximum, see Leucanthemum x superbum Chrysanthemum parthenium, see Tanacetum parthenium Clematis spp.
columbine, Aquilegia spp.
common foxglove, Digitalis purpurea
coneflower, Rudbeckia spp.
Convallaria spp., lily of the valley
coral bells, Heuchera sanguinea
Coreopsis giganea
Coreopsis grandiflora
Coreopsis lanceolata, garden coreopsis
Corispermum spp., tickseed
cornflower, Centaurea spp.

day-lily, Hemerocallis spp.

Delphinium spp., larkspur (most cultivated kinds are perennial)

Dianthus spp., carnation (most cultivated kinds are perennial)

Dicentra spectabilis, bleeding heart

Dicentra spp.

Digitalis purpurea, common foxglove

dollarplant, Lunaria annua

Doronicum spp., leopard's bane

English daisy, *Bellis perennis Eryngium maritimum*, sea holly *Eryngium* spp., eryngo
eryngo, *Eryngium* spp. *Euphorbia* spp., spurge
evening primrose, *Oenothera* spp.

feverfew, Tanacetum parthenium (= Chrysanthemum parthenium) flax, perennial, Linum perenne forget-me-not, Myosotis spp.

Gaillardia aristata, blanket-flower
Gaillardia x grandiflora, blanket-flower
garden coreopsis, Coreopsis lanceolata
gayfeather, Liatris spp.
Geranium spp. (most cultivated kinds are perennial)
Geum quellyon, lady strantheden Chile avens
Geum spp., avens
globeflower, Trollius europaeus
goats-beard, Aruncus spp.
golden tuft alyssum, Aurinia saxatilis ssp. saxatilis
gooseneck loosestrife, Lysimachia spp.
Gypsophila paniculata, baby's-breath

heartleaf saxifrage, *Bergenia crassifolia Helianthemum* spp., sun rose *Hemerocallis* spp., day-lily
hens and chicks, *Sempervivum tectorum Heuchera sanguinea*, coral bells *Heuchera* spp., hollyhock

Hibiscus spp. (except tropical kinds grown as annuals) hollyhock, Heuchera spp. honesty, perennial, Lunaria rediviva Hosta spp., plantain-lily

Iris spp.

Jacob's-ladder, Polemonium caeruleum

knotweed, Polygonum spp.

lady strantheden Chile avens, Geum quellyon ladysmantle, Alchemilla spp. larkspur, Delphinium spp. Lavandula spp., lavender lavender, Lavandula spp. leopard's bane, Doronicum spp. Leucanthemum x superbum, Shasta daisy, mat daisy Liatris spp., gayfeather, blazing star Lilium spp., lily lily, Lilium spp. lily of the valley, Convallaria spp. Limonium spp., sea lavender, statice Linum perenne, perennial flax lionsheart, Physostegia spp. Lobelia cardinalis, cardinal flower Lunaria annua, money plant, dollarplant (biennial) Lunaria rediviva, perennial honesty lupine, garden, Lupinus polyphyllus lupine, perennial, Lupinus perennis Lupinus perennis, perennial lupine Lupinus polyphyllus, garden lupine Lychnis chalcedonica, maltese cross Lysimachia spp., gooseneck loosestrife Lythrum salicaria, purple loosestrife

maltese cross, Lychnis chalcedonica mat daisy, Leucanthemum x superbum meadow rue, Thalictrum spp. Monarda didyma, bee balm money plant, Lunaria annua monkshood, Aconitum spp. mother of thyme, *Thymus serpyllum* mountain rockcress, *Arabis alpina Myosotis* spp., forget-me-not (most cultivated kinds are perennial)

New York aster, Aster novi-belgii

obedient plant, *Physostegia virginiana Oenothera* spp., evening primrose (most cultivated kinds are perennial) oriental poppy, *Papaver orientale*

Paeonia officinalis, peony Paeonia suffruticosa, tree peony painted daisy, Tanacetum coccineum (=Chrysanthemum coccineum) Papaver orientale, oriental poppy pasque flower, Anemone pulsatilla Pelargonium spp. peony, Paeonia officinalis periwinkle, Vinca spp. Persian cornflower, Centaurea dealbata Phlox spp. (except annual phlox) Physostegia spp., lionsheart Physostegia virginiana, obedient plant pincushion flower, Scabiosa spp. plantain-lily, *Hosta* spp. Platycodon grandiflorus, balloon flower Polemonium caeruleum, Jacob's-ladder Polygonum spp., knotweed primrose, Primula spp. Primula spp., primrose Pseudolysimachion incanum, speedwell purple loosestrife, Lythrum salicaria

Rudbeckia fulgida, coneflower Rudbeckia spp., coneflower

Saponaria spp., soapwort
Saxifraga spp., saxifrage
saxifrage, Saxifraga spp.
Scabiosa spp., pincushion flower (except S. atropurpurea)
sea holly, Eryngium maritimum
sea lavender, Limonium spp.
sea pink, Armeria spp.
Sedum spp., stonecrop
Sempervivum tectorum, hens and chicks
Shasta daisy, Leucanthemum x superbum
Siberian-tea, Bergenia crassifolia
silver king, Artemisia ludoviciana
snow-in-summer, Cerastium tomentosum
soapwort, Saponaria spp.

speedwell, Pseudolysimachion incanum, Veronica officinalis spurge, Euphorbia spp. statice, Armeria spp., Limonium spp. stonecrop, Sedum spp. strawflower, Bracteantha bracteata sun rose, Helianthemum spp.

Tanacetum coccineum (=Chrysanthemum coccineum), painted daisy Tanacetum parthenium, feverfew
Thalictrum spp., meadow rue
thrift, Armeria spp.
Thymus serpyllum, mother of thyme
tickseed, Corispermum spp.
tree peony, Paeonia suffruticosa
Trollius europaeus, globeflower
Trollius spp.
turtlehead, Chelone spp.

Veronica officinalis, speedwell Vinca spp., periwinkle

yarrow, Achillea spp.

Appendix E: Lists of the Most Common Vegetable and Annual Bedding Plants and Herbaceous Perennial Plants Herbaceous Perennial Plants[,]

Appendix F

List of Federal Noxious Weeds and Parasitic Plants

In this Appendix are some foreign plants that cause large losses in agricultural production. Also included are prohibited parasitic plants. Use this list to make sure none of these plants gets a foothold in the United States. Scientific names are in italics.

Acroblastum

Aeginetia spp.

Aetanthus

African boxthorn, Lycium ferocissimum

African couchgrass, Digitaria abysssinica

African feathergrass, Pennisetum macrourum

Ageratina adenophora, crofton weed

Alectra spp.

Alepis (=Elytranthe)

Alternanthera sessilis, sessile joyweed

Ambulia, Limnophila sessiliflora

Ammobroma

Amyema

Amylotheca

Anchored water hyacinth, Eichhornia azurea

Animated oat, Avena sterilis

Annual couchgrass, Digitaria velutina

Apodanthes

Arachnites

Arceuthobium, dwarf mistletoe

Arjona

Arrowhead, Sagittaria sagittifolia

Asian sprangletop, Leptochloa chinensis

Asphodelus fistulosus, onionweed

Atkinsonia

Aureolaria

Avena sterilis, animated oat, wild oat

Azolla pinnata, mosquito fern, water velvet

Balanophora

Barathranthus

Bartsia

Bastard toadflax, Comandra

Bdallophyton

Bearded-creeper, Crupina vulgaris

Benghal dayflower, Commelina benghalensis

Bluehearts. Buchnera

Borreria alata (see Spermacoce alata)

Boschniakia

Brazilian satintail, Imperata brasiliensis

Broadleaf paper bark tree, Melaleuca quinquenervia

Broomrape, *Orobanche* spp. 1

Buchnera, bluehearts

Buttonia

Cajeput, Melaleuca quinquenervia

Cansjera

Cape tulip, Homeria spp.

Carthamus oxyacantha, wild safflower

Cassytha

Castilleja grisea (ESA; other species non-actionable)

Catclaw mimosa, Mimosa pigra var. pigra

Cattail grass, Setaria pallide-fusca

Caulerpa taxifolia, Mediterranean clone of Caulerpa

Centranthera

Chaffseed, Schwalbea

Chlamydophytum

Choristegeres

Christisonia

Chrysopogon aciculatus, pilipiliula

Cistanche

Cladomyza

Coat buttons, Tridax procumbens

Comandra, bastard toadflax

Commelina benghalensis, benghal dayflower, tropical spiderwort

Common crupina, Crupina vulgaris

Cogongrass, Imperata cylindrica

Conopholis

Cordylanthus (2 spp. ESA)

Corsia

Corynaea

Crofton weed, Ageratina adenophora

Crupina vulgaris, common crupina

Cuscuta spp., dodder¹

Cyne

Cynomorium

Cytinus

Dactylanthus

Dactyliophora

Daenikera

Dasistoma

Decaisnina

1 CONTACT PPQ!

Dendromyza

Dendrophthoe

Dendrophthora

Dendrotrophe

Devil's thorn, Emex spinosa

Dicymanthes

Digitaria abyssinica, African couchgrass, fingergrass

Digitaria scalarum (see Digitaria abyssinica)

Digitaria velutina, velvet fingergrass, annual couchgrass

Diplatia

Distichella

Distrianthes

Ditepalanthus

Dodder, Cuscuta spp.²

Drymaria arenarioides, lightning weed

Duck-lettuce, Ottelia alismoides

Dufrenoya

Eichhornia azurea, anchored water hyacinth, rooted water hyacinth

 ${\it Elytranthe}$

Emelianthe

Emex australis, three-cornered jack

Emex spinosa, devil's thorn

Epifagus

Eremolepis

Eubrachion

Euphrasia

Exocarpos

Exorhopala

Exotic bur-reed, Sparganium erectum

Fingergrass, Digitaria abyssinica

Gaiadendron

Galega officinalis, goatsrue

Geocaulon

Gerardia (=Agalinis)

Giant hogweed, Heracleum mantegazzianum

Giant salvinia, Salvinia auriculata, S. biloba, S. herzogii,

S. molesta

Giant sensitive plant, Mimosa invisa

Ginalloa

Gleadovia

Glutago

Goatsrue, Galega officinalis

Gypsy Moth Infested Areas in the United States

Connecticut

The entire State.

Delaware

The entire State.

District of Columbia

The entire district.

Illinois

Lake county.

Indiana

The counties of Allen, DeKalb, Elkhart, La Grange, Noble, Porter, St. Joseph, and Steuben.

Maine

Androscoggin County: the entire county; Aroostook County: the towns of Amity, Cary Plantation, Dyer Brook, Haynesville, Hodgdon, Linneus, Oakfield, Forkstown, the townships of Bancroft, Benedicta, Crystal, Glenwood Plantation, Houlton, Island Falls, Macwahoc Plantation, Molunkus, New Limerick, North Yarmouth Academy Grant, Orient, Reed Plantation, Sherman, Silver Ridge, Upper Molunkus, Weston, 1 R5 WELS, T2 R4 WELS, T3 R3 WELS, T3 R4 WELS, T4 R3 WELS, and TA R2 WELS; Cumberland County: the entire county; Franklin County: the town of Eustis, the townships of Avon, Carthage, Chesterville, Coplin Plantation, Crockertown, Dallas Plantation, Davis, Lang, Farmington, Freeman, Industry, Jay, Jerusalem, Kingfield,

Madrid, Mount Abraham, New Sharon, New Vineyard, Perkins, Phillips, Rangeley, Rangeley Plantation, Redington, Salem, Sandy River Plantation, Strong, Temple, Washington, Weld, Wilton, Wyman, 6, D and E; Hancock County: the entire county; Kennebec County: the entire county; Knox County: the entire county; Lincoln County: the entire county; Oxford County: the townships of Adamstown, Albany, Andover, Andover North, Andover West, Batchelders Grant, Bethel. Brownfield, Buckfield, Byron, Canton, Denmark, Dixfield, Fryeburg, Gilead, Grafton, Greenwood, Hanover, Hartford, Hebron, Hiram, Lincoln Plantation, Lovell, Lower Cupsuptic, Magalloway Plantation, Mason Plantation, Mexico, Milton Plantation, Newry, Norway, Oxford, Paris, Parkerstown, Peru, Porter, Richardsontown, Riley, Roxbury, Rumford, Stoneham, Stow, Sumner, Sweden, Upton, Waterford, Woodstock, C, and C Surplus; Penobscot County: the town of Patten, the townships of Alton, Argyle, Bangor City, Bradford, Bradley, Brewer City, Burlington, Carmel, Carroll Plantation, Charleston, Chester, Clifton, Corinna, Corinth, Dexter, Dixmont, Drew Plantation, E. Millinocket, Eddington, Edinburg, Enfield, Etna, Exeter, Garland, Glenburn, Grand Falls Plantation, Greenbush, Greenfield, Grindstone, Hampden, Hermon, Hersey Town, Holden, Hopkins Academy Grant, Howland, Hudson, Indian Purchase, Kenduskeag, Kingman, Lagrange, Lakeville, Lee, Levant, Lincoln, Long A, Lowell, Mattamiscontis, Mattawamkeag, Maxfield, Medway, Milford, Millinocket, Newburgh, Newport, Old Town City, Orono, Orrington, Passadumkeag, Plymouth, Prentiss Plantation, Seboesis Plantation, Soldiertown, Springfield, Stacyville, Stetson, Summit, Veazie, Webster Plantation, Winn, Woodville, AR 7, AR 8, AR 9, 1 ND, 3 R1 NBPP, 1 R6 WELS, 1 R8 WELS, 2 R8 NWP, 2 R9 NWP, 3 R9 NWP, 5 R1 NBPP, and 2 R8 WELS; Piscataguis County: the town of Greenville. the townships of Abbott, Atkinson, Barnard, Blanchard Plantation, Bowerbank, Brownville, Dover-Foxcroft, Elliotsville, Guilford, Katahdin Iron Works, Kingsbury Plantation, Lakeview Plantation, Medford, Milo, Monson, Orneville, Parkman, Sangerville, Sebec, Shirley, Veazie Gore, Williamsburg, Willimantic, Willington, 1 R9, 2 R9 WELS, 4 R9 NWP, 5 R9 NWP, T7R9 NWP, T8R11 WELS, T8R10 WELS, TAR11 WELS, TAR 10 WELS, T1R11 WELS, T1R10 WELS, and T2R10 WELS; Sagadahoc County: the entire county; Somerset County: the townships of Anson, Athens, Bald Mountain, Bingham, Bowtown, Brighton Plantation, Cambridge, Canaan, Caratunk, Carrying Place, Carrying Place Town, Concord Plantation, Cornville, Dead River, Detroit, East Moxie, Embden, Fairfield, Harmony, Hartland, Highland Plantation, Lexington Plantation, Madison, Mayfield, Mercer, Moscow, Moxie Gore, New Portland, Norridgewock, Palmyra, Pierce Pond, Pittsfield, Pleasant Ridge Plantation, Ripley, Skowhegan, Smithfield, Solon, St. Albans, Starks, The Forks Plantation, West Forks Plantation, and T3 R4 BKP WKR; Waldo County: the entire county; Washington County: the entire county; York County: the entire county.

Maryland

The entire State.

Massachusetts

The entire State.

Michigan

The entire State.

New Hampshire

The entire State.

New Jersey

The entire State.

New York

The entire State.

North Carolina

Currituck County: the entire county; Dare County: the area bounded by a line beginning at the intersection of State Road 1208 and Roanoke Sound; then easterly along this road to its junction with State Road 1206; then southerly along this road to its intersection with U.S. Highway Business 158; then easterly along an imaginary line to its intersection with the Atlantic Ocean; then northwesterly along the coastline to its intersection with the Dare-Currituck County line; then westerly along this county line to its intersection with the Currituck Sound; then southeasterly along this sound to the point of beginning.

Ohio

The counties of Ashland, Ashtabula, Belmont, Carroll, Columbiana, Coshocton, Crawford, Cuyahoga, Defiance, Delaware, Erie, Fairfield, Franklin, Fulton, Geauga, Guernsey, Harrison, Henry, Hocking, Holmes, Huron, Jefferson, Knox, Lake, Licking, Lorain, Lucas, Mahoning, Marion, Medina, Monroe, Morgan, Morrow, Muskingum, Noble, Ottawa, Perry, Portage, Richland, Sandusky, Seneca, Stark, Summit, Trumbull, Tuscarawas, Washington, Wayne, Williams, and Wood.

Pennsylvania

The entire State.

Rhode Island

The entire State.

Vermont

The entire State.

Virginia

The counties of Accomack, Albemarie, Allegheny, Amelia, Amherst, Appomatox, Arlington, Augusta, Bath, Bedford, Botetourt, Brunswick, Buckingham, Campbell, Caroline, Charles City, Charlotte, Chesterfield, Clarke, Craig, Culpeper, Cumberland, Dinwiddie, Essex, Fairfax, Fauquier, Floyd, Fluvanna, Franklin, Frederick, Giles, Gloucester, Goochland, Greene, Greensville, Halifax, Hanover, Henrico, Highland, Isle of Wight, James City, King and Queen, King George, King William, Lancaster, Loudon, Louisa, Ludenburg, Madison, Mathews, Mecklenburg, Middlesex, Nelson, New Kent, Northampton, Northumberland, Nottoway, Orange, Page, Pittsylvania, Powhatan, Prince Edward, Prince George, Prince William, Rappahannock, Richmond, Roanoke, Rockbridge, Rockingham, Shenandoah, Southampton, Spotsylvania, Stafford, Surry, Sussex, Warren, Westmoreland, and York.

The cities of Alexandria, Bedford, Buena Vista, Charlottesville, Chesapeake, Columial Heights, Danville, Emporia, Fairfax, Falls Church, Franklin, Fredericksburg, Hampton, Harrisonburg, Hopewell, Lexington, Lynchburg, Manassas, Manassas Park, Newport News, Norfolk, Petersburg, Poquoson, Portsmouth, Richmond, Roanoke, Salem, South Boston, Staunton, Suffolk, Virginia Beach, Waynesboro, Williamsburg, and Winchester.

West Virginia

The counties of Barbour, Berkely, Braxton, Brooke, Calhoun, Doddridge, Fayette, Gilmer, Grant, Greenbrier, Hampshire, Hancock, Hardy, Harrison, Jackson, Jefferson, Lewis, Marion, Marshall, Mineral, Monongalia, Monroe, Morgan, Nicholas, Ohio, Pendleton, Pleasants, Pocahontas, Preston, Randolph, Richie, Taylor, Tucker, Tyler, Upshur, Webster, Wetzel, Wirt, and Wood.

Wisconsin

The counties of Adams, Brown, Calumet, Columbia, Dane, Dodge, Door, Florence, Fond du Lac, Forest, Green Lake, Jefferson, Juneau, Kenosha, Kewaunee, Langlade, Lincoln, Manitowoc, Marathon, Marinette, Menominee, Milwaukee, Oconto, Oneida, Outagamie, Ozaukee, Portage, Racine, Rock, Sauk, Shawano, Sheboygan, Vilas, Walworth, Washington, Waukesha, Waupaca, Waushara, Winnebago, and Wood.

Gypsy Moth Infested Areas in Canada

New Brunswick

The entire counties of Albert, Carleton, Charlotte, Kings, Queens, Saint John, Sunbury, York, and Westmorland.

Kent County: The Municipality of Bouctouche.

Northumberland County: Miramichi City.

Nova Scotia

The entire counties of Annapolis, Colchester, Cumberland, Digby, Halifax, Hants, Kings, Lunenburg, Queens, Shelburne, and Yarmouth.

Ontario

The entire counties of Brant, Bruce, Dufferin, Elgin, Essex, Frontenac, Grey, Haliburton, Hastings, Huron, Lambton, Lanark, Leeds-Grenville, Lennox-Addington, Middlesex, Muskoka, Northumberland, Oxford, Parry Sound, Perth, Peterborough, Prescott-Russell, Prince Edward, Renfrew, Simcoe, Stormont-Dundas-Glengarry, Victoria, Wellington, and York.

The entire Municipality of Chatham-Kent.

The entire Regional Municipalities of Durham, Haldimand-Norfolk, Halton, Hamilton-Wentworth, Niagara, Ottawa-Carleton, Peel, and Waterloo.

Algoma District: All areas south of Highway 17 east of and including the city of Sault Ste. Marie, plus the entire geographic townships of: Denis; Prince; Parke; Korah; Tarentorus; Garden River First Nation; MacDonald; Laird; Tarbutt; Tarbutt Additional; Johnson; Plummer Aditional; Lefroy; Thessalon; Bright Additional; Bright; Thompson; Cobden; Striker; Long; Spragge; Lewis; Shedden; Indian Reserve #7.

Manitoulin District: All areas of St. Joseph Island, Cockburn Island, Manitoulin Island and Great Cloche Island, plus all Indian Reservations.

Nipissing District: All areas south of the Ottawa and Mattawa rivers up to and including the City of North Bay. All areas south of highway 17 west of the city of North Bay.

Sudbury District: All areas south of Highway 17 plus the city of Sudbury and the entire geographic townships of: Victoria; Salter; May; Hallam; Shakespeare; Dunlop; Porter; Baldwin; Nairn; Hymen; Lorne; Louise; Graham; Waters; McKim; Neelon; Dryden; Indian Reserves #4, #5 and #6.

Prince Edward Island

Queens County: The Municipality of Charlottetown.

Quebec

The entire regions of Acton, Argenteuil, Arthabaska, Asbestos, Beauce-Sartigan, Beauharnois-Salaberry, Bécancour, Bellechasse, Brome-Missisquoi, Champlain, Coaticook, Communauté Urbaine de L'Outaouais, Communauté Urbaine de Montréal, Communauté Urbaine de Québec, D'autray, Desjardins, Deux Montagnes, Drummond, Francheville, Joliette, La Haute-Yamaska, La Nouvelle-Beauce, La Rivière du Nord, La Vallée-du-Richelieu, Lajemmerais, L'amiante, L'assomption, Laval, Le Bas Richelieu, Le Granit, Le Haut Richelieu, Le Haut-Saint-François, Le Haut Saint-Laurent, Le Val-Saint-François, L'Érable, Les Chutes de la Chaudière, Les Collines-de-L'Outaouais, Les Etchemins, Les Jardins de Napierville, Les Laurentides, Les Maskoutains, Les Moulins, Les Pays d'en Haut, L'ile d'Orléans, L'Islet, Lotbinière, Memphrémagog, Mirabel, Montcalm, Montmagny, Nicolet-Yamaska, Papineau, Robert-Cliche, Roussillon, Rouville, La-Région-Sherbrookoise, Thérèse de Blainville, and Vaudreuil-Soulanges.

Municipalities of the following regions:

Antoine-Labelle: Notre-Dame-du-Laus, Notre-Dame-de-Pontmain, Lac-du-Cerf, Saint-Aimé-du-lac-des-Iles, Kiamika, Lac-Nominingue, L'Annonciation, Marchand, La Macaza, L'Ascension, Sainte-Véronique, Lac-Saguay, Chute-Saint-Philippe, Val-Barrette, Lac-des-Écorces, Beaux-Rivages, Mont-Laurier, Des Ruisseaux, Ferme-Neuve M, Lac-Saint-Paul, Mont-Saint-Michel, Sainte-Anne-du-Lac, Lac-Ernest.

Kamouraska: Mont-Carmel.

La Côte de Beaupré: Beaupré, Boischatel, Sainte-Anne-de-Beaupré, Château-Richer, L'Ange-Gardien.

La Jacques-Cartier: Sainte-Catherine-de-la-Jacques-Cartier, Fossambault-sur-le-Lac, Lac-Saint-Joseph, Shannon, Saint-Gabriel-de-Valcartier, Lac-Delage, Stoneham-et-Tewkesbury, Lac-Beauport, Sainte-Brigitte-de-Laval.

La Vallée-de-la Gatineau: Denholm, Low, Kazabazua, Lac-Sainte-Marie, Northfield, Gracefield, Wright, Cayamant, Blue Sea, Bouchette, Sainte-Thérèse-de-la-Gatineau, Messines, Maniwaki V, Déléage, Egan-Sud, Montcerf, Bois-Franc, Aumond, Grand-Remous Lytton, Maniwaki.

Le Centre de la Mauricie: Charette, Saint-Élie, Saint-Mathieu-du-parc, Saint-Boniface de Shawinigan, Shawinigan, Shawinigan-Sud, Notre-dame-du-Mont-Carmel, Lac-à-la-Tortue, Saint-Georges, Grand-Mère, Saint-Gérard-des-Laurentides, Saint-Jean-des-Piles.

Maskinongé: Maskinongé, Saint-Joseph-de-Maskinonge, Louiseville, Yamachiche, Saint-Barnabé, Saint-Sévère, Saint-Léon-le-Grand, Sainte-Ursule, Saint-Justin, Saint-Édouard-de-Maskinongé, Sainte-Angèle-de-Prémont, Saint-Paulin, Saint-Alexis-des-Monts.

Matawinie: Saint-Félix-de-Valois M, Saint-Jean-de-Matha, Sainte-Béatrix, Saint-Alphonse-Rodriguez, Sainte-Marcelline-de-Kildare, Rawdon, Chertsey, Entrelacs, Notre-Dame-de-la-Merci, Saint-Donat, Saint-Côme, Sainte-Émélie-de-l'Énergie, Saint-Damien, Saint-Zénon, Saint-Michel-des-Saints.

Mékinac: Notre-Dame-de-Montauban, Lac-aux-Sables, Saint-Adelphe, Saint-Sévérin, Saint-Tite V, Hérouxville, Grandes-Piles V, Saint-Roch-de-Mékinac, Sainte-Thècle.

Pontiac: Bristol, Shawville, Clarendon, Portage-du-Fort, Bryson, Campbell's Bay, Grand-Calumet, Litchfield, Thorne, Alleyn-et-Cawood, Leslie-Clapham-et-Huddersfield, Fort-Coulonge, Mansfield-et-Pontefract, Waltham, Chapeau, L'Isle-aux-Allumettes, Chichester, Sheen-Esher-Aberdeen-et-Malakoff, Rapides-des-Joachims.

Portneuf: Neuville, Pointe-aux-Trembles, Pont-Rouge V, Sainte-Jeanne-de-Pont-Rouge, Donnacona, Cap-Santé, Saint-Basile-Sud, Saint-Basile, Notre-Dame-de-Portneuf, Portneuf, Deschambault, Saint-Gilbert, Saint-Marc-des-Carrières, Grondines, Saint-Casimir M, Saint-Casimir P, Saint-Thuribe, Saint-Ubalde, Saint-Alban, Sainte-Christine-d'Auvergne, Saint-Léonard-de-Portneuf, Lac-Sergent, Saint-Raymond V, Saint-Raymond P, Rivière-à-Pierre.

Rivière-du-Loup: Rivière-du-Loup V.

Témiscamingue: Témiscaming V, Béarn, Ville-Marie.

The entire State.

Wisconsin

The entire State.

Pine Shoot Beetle Infested Areas in Canada

Ontario

The entire counties of Brant, Bruce, Chatham-Kent, Dufferin, Elgin, Essex, Frontenac, Grey, Haldimand, Haliburton, Hastings, Huron, Kawartha Lakes, Lambton, Lennox-Addington, Middlesex, Muskoka, Norfolk, Northumberland, Oxford, Parry Sound, Perth, Peterborough, Prince Edward, Simcoe, Victoria, Wellington, and York.

The entire regional municipalities of Durham, Haldimand-Norfolk, Halton, Hamilton-Wentworth, Niagara, Peel, and Waterloo.

The entire metropolitan Toronto area.

The Geographical Townships of *Bridgeland*, *Montgomery*, *Parkinson*, *Patton*, *Rose*, and *Wells* in Algoma District.

The Geographical Township of Nairn in Sudbury District.

The Town of Blind River in Algoma District.

The Township of *Huron Shores* in Algoma District.

Quebec

The entire regions of Acton, Arbestos, Argenteuil, Arthabaska, Autray, Beauce-Sartigan, Brome-Missisquoi, Coaticook, Collinesde l'Outaouais, Des Laurentides, Drummond, L'Amiante, La Haute-Yamaska, Lajemmerais, La-Région-Sherbrookoise, Le-Granit, Le Haut St-Laurent, Le-Haut-Saint-François, Les Chutes de la Chaudière, Les Etchemins, Les Maskoutains, Les Nouvelles Beauce, Le-Val-Saint-François, Memphrémagog, Nicolet-Yamaska, Pontiac, and Robert-Cliche.

The municipality of Sorel in the region of Le-Bas-Richelieu.

Appendix H

Protocol for Inspection of Coated or Pelleted Seed, Seed Tape, Seed Mats or Seed Embedded in Any Other Substrate that Obscures Visibility

Introduction

This protocol is for the importation of commercial shipments of the articles listed above, except for Canadian origin seed (see 7CFR 361). Currently, the listed articles are not enterable because the seed can not be properly inspected. Under this protocol, authorized officials in the exporting country will draw official seed samples from lots of seed before processing in the country of origin. The unprocessed samples will accompany the shipment of processed seed, and will be presented for inspection by Customs and Border Protection-Agriculture Inspection (CBP-AI) at the port of entry. If the samples are free of quarantine significant species¹, plant pests, soil and Federal noxious weeds, CBP-AI will release the shipment. If CBP-AI inspectors find quarantine significant species, plant pests, soil, or Federal noxious weeds in the sample, they will refuse entry to the shipment.

Procedure

Importers wishing to participate in this program must comply with the following protocol:

- ◆ Only seed which is allowed entry to the United States without treatment or other restrictions may be considered under this program.
- ◆ Each shipment must be accompanied by a phytosanitary certificate issued by an authorized official of the foreign government of origin.
- An authorized official of the foreign government must sample each lot of seed before the seed is processed. Sampling methods must comply with the International Seed Testing Association (ISTA) requirements, which satisfy Federal Seed Act (FSA) procedures. The sample must be sealed or verified as sealed by

¹ A quarantine significant species is one regulated because it is a pathway for a plant pest that is difficult to detect. For example, corn and corn relative seeds are prohibited from certain countries because they may be associated with certain injurious insects and diseases.

Appendix H: Protocol for Inspection of Coated or Pelleted Seed, Seed Tape, Seed Mats or Seed Embedded in Any Other Substrate that Obscures Visibility

the sampler and identified with the marks of the lot(s) sampled. Sealed means the container in which the seed is held is closed in such a way that it cannot be opened to gain access to the seed and closed again without either destroying the seal or leaving evidence of tampering.

- ◆ The sealed sample(s) must accompany the seed shipment in a package clearly marked for CPB-AI inspection and placed in a conspicuous location, such as the doors of the shipping container.
- ◆ The shipment must be accompanied by an importer document (such as an ISTA certificate) declaring the sample was taken by a government authorized official and the method of sampling complies with ISTA requirements. The seal number or other distinguishing marks of the sample must be on the documentation.
- CBP-AI inspectors will inspect the sample at the port of entry using the same inspection procedures, less sampling, currently used for imported seed shipments. CBP-AI inspectors will examine the sample for soil, Federal noxious weeds, quarantine significant species and plant pests. If they find quarantine significant species, Federal noxious weeds, plant pests, or soil beyond tolerance in the sample, they will refuse entry to the shipment. The inspectors will take a small (10-25 seeds) sample of processed seed, remove the covering (coating, tape, etc.), and compare the seed to the uncoated sample. The sample must match the shipment, same type and size of seed. If the inspectors detect obvious differences, they will refuse entry to the shipment. If the small coated sample matches the uncoated sample, and the samples are free of plant pests, soil, quarantine-significant species and Federal noxious weeds, the shipment will be released.

Importers interested in participating in this program should submit a permit application (PPQ form 587) including the name of the exporting country's plant protection organization and the individual who will sample the seed. Send the request to USDA, APHIS, PPQ, Permit Unit, 4700 River Road Unit 133, Riverdale, Maryland 20737.
