Note--The estimated U.S. median income for 4-person families is \$70,354 for the period of October 1, 2008 through September 30, 2009.

^{1/}Prepared by the Administration for Children and Families (ACF), Office of Community Services (OCS), Division of Energy Assistance (DEA). In accordance with 45 CFR 96.85, each State's estimated median income for a four-person family is multiplied by the following percentages to adjust for family size for LIHEAP: 52 percent for one person, 68 percent for two persons, 84 percent for three persons, 100 percent for four persons, 116 percent for five persons, and 132 percent for six persons. For each additional family member above six persons, add 3 percentage points to the percentage for a six-person family (132 percent), and multiply the new percentage by the State's estimated median income for a four-person family.

^{2/}The 75% of FY 2009 State Median Income (SMI) figures that the Department of Health and Human Services (HHS) shows in this table supersede the 60% of FY 2009 SMI figures that HHS published on March 5, 2008 (73 FR 11924-11926). However, the 75% of SMI figures supersede the 60% of SMI figures only for FY 2009. For FY 2009, LIHEAP grantees may use the greater of (1) these figures; or (2) 150 percent of the FY 2008 HHS Poverty Guidelines, which were published on January 23, 2008 (73 FR 3971-3972), as the highest level at which they may set their income eligibility maxima.
