

**Finding of No Significant Impact  
for  
Mediterranean Fruit Fly Cooperative Eradication Program  
Solano County, California  
Environmental Assessment,  
September 2007**

The U.S. Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment (EA) that analyzes alternatives for control of the Mediterranean fruit fly, an exotic agricultural pest that has been found in areas of Solano County, California. The EA, incorporated by reference in this document, is available from:

USDA, APHIS, PPQ  
State Plant Health Director  
650 Capital Mall, Suite 6-400  
Sacramento, CA 95814

or

USDA, APHIS, PPQ  
Fruit Fly Exclusion and Detection Program  
4700 River Road, Unit 134  
Riverdale, MD 20737-1236

The EA for this program analyzed alternatives of (1) no action, (2) quarantine only, (3) quarantine and commodity certification, and (4) eradication. Each of those alternatives was determined to have potential environmental consequences. APHIS selected eradication using an integrated pest management (IPM) approach for the proposed program because of its capability to achieve eradication in a way that also reduces the magnitude of those potential environmental consequences.

APHIS has determined that this program will have no adverse impacts to endangered and threatened species based upon its review of proposed program operations, and upon review of consultations by the California Department of Food and Agriculture with the U.S. Department of the Interior, Fish and Wildlife Service.

I find that implementation of the proposed program will not significantly impact the quality of the human environment. I have considered and based my finding of no significant impact on the quantitative and qualitative risk assessments of the proposed pesticides and on my review of the program's operational characteristics. In addition, I find that the environmental process undertaken for this program is entirely consistent with the principles of "environmental justice," as expressed in Executive Order 12898, and the protection of children, as expressed in Executive Order 13045. Lastly, because I have not found evidence of significant environmental impact associated with this proposed program, I further find that an environmental impact statement does not need to be prepared and that the program may proceed.
