ACTION: Final rule; announcement of effective date.

SUMMARY: This document announces the effective date of the final rule published on November 21, 2000 at 65 FR 70133. SUPPLEMENTARY INFORMATION:

Background

The final rule "Food Stamp Program: Noncitizen Eligibility, and Certification Provisions of Public Law 104-193, as Amended by Public Laws 104-208, 105-33, and 105-185," provided that several amendments would not be effective until Office of Management and Budget (OMB) approval of an associated information collection burden. That rule further provided that the Food and Nutrition Service would publish a document in the **Federal Register** announcing the effective date of these amendments after approval of the information collection requirements by OMB. On September 10, 2001, OMB approved the associated information collection burden for these items under OMB control number 0584-0064. This approval will expire on September 30, 2004.

Dated: November 21, 2001.

George A. Braley,

Acting Administrator, Food and Nutrition Service.

Airworthiness Directives; Reims Aviation S.A. Model F406 Airplanes; Correction

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document makes a correction to Airworthiness Directive (AD) 2001-23-07, which was published in the **Federal Register** on November 15, 2001 (66 FR 57364), and concerns certain Reims Model F406 airplanes. The FAA incorrectly referenced the AD number as "AD 2001-01-07" instead of "AD 2001-23-07." This AD requires repetitive inspections of the canted rib upper cap in the center wing carry-through area for cracks, and, if cracks are found, immediate repair of the cracks or modification of this area depending on the extent of any cracks found. This AD also requires modifying the canted rib upper cap at a certain time period as terminating action for the repetitive inspections. This action corrects the AD to reflect the correct AD number.

EFFECTIVE DATE: The effective date of this AD remains January 7, 2002.

This AD currently requires repetitive inspections of the canted rib upper cap in the center wing carry-through area for cracks, and, if cracks are found, immediate repair of the cracks or modification of this area depending on the extent of any cracks found.
