

Welcome to the Camp Adair Formerly Used Defense Site (FUDS) website we have established to keep you informed about the U.S. Army Corps of Engineers' efforts to conduct the Military Munitions Response Program (MMRP) Site Investigation (SI).

The U.S. Army Corps of Engineers is evaluating FUDS that had historically been used for military training located within Camp Adair and Adair Air Force Station, located in parts of Polk and Benton counties, near Corvallis , Ore.

Camp Adair was constructed in 1942 and served as a training facility for several army divisions. The camp was demolished in 1947. During the short operation of the camp it was the second largest city in Oregon .

The Corps will do this evaluation by conducting a MMRP SI. The SI will be conducted by a Corps contractor, Shaw Environmental. The work to be performed will include access to and a visual inspection of property that was part of the former Camp Adair . The inspection may also include soil and or water sampling.

The SI will be used to determine future work the Corps may do the clean-up of possible Hazardous, Toxic and Radioactive Waste. The Corps of Engineers cleans up sites contaminated with hazardous waste, radioactive waste, or ordnance and complies with federal, state, and local environmental laws and regulations.

In order to begin the SI the Corps will be contacting property owners of the Former Camp Adair site and request the owner to provide a signed Department of the Army Right of Entry Environmental Assessment and Response (ROE).
