Planet Biotechnology, Inc.; Availability of an Environmental Assessment for a Field Release of *Nicotiana* Hybrids Genetically Engineered To Produce Antibodies

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we have prepared an environmental assessment for a proposed field release involving a *Nicotiana* hybrid line that has been genetically engineered to produce an antimicrobial antibody that binds to a bacterium (*Streptococcus mutans*) associated with tooth decay in humans. The purpose of this field release is to generate plant biomass from which the antibody will be extracted after harvest. We are making the

environmental assessment available to the public for review and comment.

DATES: We will consider all comments received on or before July 13, 2007.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," regulate, among other things, the introduction

(importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered "regulated articles." A permit must be obtained or a notification acknowledged before a regulated article may be introduced. The regulations set forth the permit application requirements and the notification procedures for the importation, interstate movement, or release in the environment of a regulated article.

On December 21, 2005, the Animal and Plant Health Inspection Service (APHIS) received a permit application (APHIS No. 05-354-03r) from Planet Biotechnology, Inc., of Hayward, CA, for a field trial using a transgenic *Nicotiana* hybrid. Permit application 05-354-03r describes a *Nicotiana* hybrid line (*Nicotiana tabacum* X *Nicotiana glauca*), designated as 06PBCarHG1, that produces a chimeric antimicrobial antibody (trade name CaroRx)TM that binds to the bacterium (*Streptococcus mutans*) associated with tooth decay in humans. Expression of the gene sequence is controlled by the cauliflower mosaic virus (CaMV) promoter and terminated by NOS from *Agrobacterium tumefaciens* and utilizes the selectable marker NPTII from *Escherichia coli*. Constructs were inserted into the recipient organisms via a disarmed *Agrobacterium tumefaciens* vector system. The antibodies generated from this planting will be extracted after harvest.

The subject *Nicotiana* hybrid is considered a regulated article under the regulations in 7 CFR part 340 because it has been genetically engineered using genetic sequences from plant pathogens.

To provide the public with documentation of APHIS' review and analysis of any potential environmental impacts and plant pest risks associated with the proposed release of these *Nicotiana* hybrids, we have prepared an environmental assessment (EA). The EA was prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

The EA may be viewed on the [Regulations.gov](http://www.Regulations.gov) Web site or in our reading room. (Instructions for accessing

Regulations.gov and information on the location and hours of the reading room are provided under the heading **ADDRESSES** at the beginning of this notice.) In addition, copies may be obtained by calling or writing to the individual listed under **FOR FURTHER INFORMATION CONTACT**.

Done in Washington, DC, this 7th day of June, 2007.

SUPPLEMENTARY INFORMATION:

Title: Form RD 1940-59, "Settlement Statement."

OMB Number: 0575-0088.

Expiration Date of Approval: October 30, 2007.

Type of Request: Extension of a currently approved information collection.

Abstract: The Agencies are requesting an extension of the OMB clearance for Form RD 1940-59, "Settlement Statement." The Real Estate Settlement Procedures Act (RESPA), as amended,

required the disclosure of real estate settlement costs to home buyers and sellers. The Secretary of the Department of Housing and Urban Development (HUD) was instructed by the RESPA to develop a standard form for the statement of settlement costs to be used for all federally related transactions. Form RD 1940-59 is similar to the HUD-1 Settlement Statement used by HUD, the Veterans Administration, and the private mortgage industry, with some minor adaptations acceptable under RESPA.

Form RD 1940-59 is completed by Settlement Agents, Closing Attorneys, and Title Insurance Companies performing the closing of RHS loans and credit sales used to purchase or refinance Section 502 Housing, Rural Rental Housing, and Farm Labor Housing. The same parties performing the closing of FSA Farm Ownership loans and credit sales also complete the form. The information is collected to provide the buyer and seller with a statement detailing the actual costs of the settlement services involved in the Agencies' financed real estate transactions.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .36 hours per response.

Respondents: Settlement Agents, Closing Attorneys, and Title Insurance Companies performing the closing of the Agencies' loans and credit sales.

Estimated Number of Respondents: 11,928.

Estimated Number of Responses per Respondent: 1.8.

Estimated Number of Responses: 21,135.

Estimated Total Annual Burden on Respondents: 7,530 hours.

Copies of this information collection can be obtained from Renita Bolden, Regulations and Paperwork Management Branch, at (202) 692-0035.
