12. Other Farm Animals					
13. Other Animals					
Mice	78	3,701			3,701
Rats	51		94		94

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

DATE SIGNED

11/21/2000

University of Maine
Registration # 11-R-0006
Reporting of Exceptions
10/1/1999-09/30/2000

We have included this project as an exception based on our interpretation of the USDA's Reportable IACUC-Approved Exceptions. If we have misinterpreted this Policy, please let us know by contacting the Office of Research and Sponsored Programs (207/581-1498).

Approved Studies Allowing Exceptions to the Standards and Regulations Under the Act:

The protocol entitled, "Photic and Non-photic Influences on Circadian Phase Shifting During the Early Subjective Night," was approved in June 1999. Last annual review was conducted on May 31, 2000. Approved number of Syrian hamsters: 24. The following paragraphs summarize the goals/significance and the procedures of the experiment, as provided by the principal investigator and approved by the IACUC.

"Many studies have examined the effects of either photic (i.e. light) or non-photic stimuli on circadian rhythmicity, and it has been established that both types of stimuli can act on input pathways to the neural circadian system. An example of a commonly-used non-photic stimulus involves brief exposure to darkness (dark pulses) presented on a background of constant light. This stimulus produces characteristic changes in the phase of circadian rhythms when presented at different times during a circadian cycle. The phase-shifting effects of dark pulses in hamsters are believed to be mediated by increased activity, as previous studies have shown that restraining the animals during the dark pulses blocks the phase shifts observed during the mid-subjective day and late subjective night (e.g. Reeb, Lavery & Mrosovsky, 1989; Van Reth & Turek, 1989). However, to date, no studies have examined the effects of restraint on dark pulse-induced phase shifts during the early subjective night. Thus, this is one of the purposes of this study. The results would help to clarify whether dark pulses at this phase act at either the photic or non-photic input pathways to the circadian systems. A second purpose of this study is to examine the effects of light-exposure history on the circadian response to dark pulses presented during the early subjective night. The sensitivity of the mammalian circadian system is known to be affected by prior light exposure. Although constant light exposure is commonly used as a background in circadian studies involving dark pulses (and other non-photic stimuli), the intensity of such light exposure varies widely across studies, and the effects of this variable have not been systematically explored. Thus, the present study is designed to examine the effects of both restraint and light-exposure history on dark pulse-induced circadian phase shifts."

"Animals will be maintained individually in cages equipped with running wheels. Wheel running activity will be continuously recorded, providing a convenient and commonly-used marker of circadian rhythmicity. Animals will be maintained under constant light of 1, 10, or 100 lux (very dim to moderately bright, compared to normal room lighting of approximately 300 lux). Due to equipment limitations, only eight animals will be tested simultaneously; following completion of the study, data from the 24 animals will be pooled."

"Approximately every three weeks, animals will be exposed to one of three stimulus conditions during the early part of the subjective night. In one condition, the lights will be turned off for a period of 6 hours, and the animals will be otherwise undisturbed. In the second

condition, the animals will be confined to a small 7.5 x 9.5 cm nest box for a corresponding 6 hour period. This nest box will be placed in the animal's home cage, with the open side of the box placed against the bars at the side of the home cage, so as to provide ventilation and to prevent escape. The size of this nest box is similar to that used in previous studies (e.g. Reeb, Lavery & Mrosovsky, 1989), and although it is small enough to prevent the animal from expressing locomotor activity, it is large enough to allow the animal to express small movements (e.g. move its limbs, turn around). In the third condition, animals will be exposed to a 6 hour period of darkness during confinement to the nest box. It is this combined dark pulse-restraint condition that is of primary interest in this study, but dark pulses and restraint alone must also be included as control conditions. Following exposure to a particular stimulus, animals will be left undisturbed for at least 10 days, in order to measure stimulus-induced changes in circadian phase."

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual rese teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and ap Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary inc brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Summary of exceptions to the regulations and standards, specified and explained by the principle investigator and approved by the IACUC, must be attached.

Exception 1. - Exemption to Pen Space Requirements for Laboratory Pigs.

The Transplantation Biology Research Center periodically houses transplanted and fetal tissue donor pigs in the 100 to 130 kg range in the largest pens available, which provide only 25 square feet of floor space. This cage floor area is considered adequate for conventional pigs up to but not exceeding 100kg in body weight. In formulating an action plan to correct this minor deficiency, the investigator reviewed the situation with the Center for Comparative Resources veterinary staff. They found no adverse effects on the health of any of these animals. The investigator then requested this exemption in the cage space recommendations in the "Guide", and the exemption was granted by the Subcommittee on Research Animal Care (SRAC is MGH's IACUC). The SRAC finds the animals over 100 kgs body weight to be comfortable in these 25 square foot floor area pens and able to assume all normal body positions without problems.

Exception 2. - Exemption to Cage Space Requirements for Baboons.

The Transplantation Biology Research Center houses five large male baboons as blood donors at the ninth floor research animal laboratory. Two of these five animals exceed the weight of 30 kgs recommended for the 10 square foot floor area cages. This was identified during the December 2000 Semiannual SRAC facility inspection, and reported in that report to the responsible institutional official. The Center for Comparative Resources veterinary staff evaluates these animals daily and finds them in excellent health and condition. Based on their excellent condition, an exemption was recommended until money could be budgeted for purchase of larger cages. The investigator subsequently submitted a request for this exemption to the SRAC (MGH's IACUC) that was granted. Due to the budget process the request for funding was submitted in March for purchase in the next FY which begins January 2002.

Column E studies - None of these studies are conducted using covered species.

Studies involving "death as an endpoint" or LD₅₀ studies - None of these studies are conducted in covered species.

No Wild rodents were used at MGH facilities during the period 1 Oct, 2000 through 30 Sept. 2001.

DEC 10 2002

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). **A summary of all such exceptions is attached to this annual report.** In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Exceptions to the Animal Welfare Act approved by the IACUC at
Northeastern University 14-R-0021

The IACUC has approved exceptions to the AWA to Dr. Fred Davis' protocols. He has been allowed to go up to three weeks between cage changes of singly housed hamsters, to house them in light-tight ventilated chambers to alter light dark cycles, and to expose them to various lengths and intensities of light and darkness.

The hamsters are housed in wheel running cages for circadian rhythm experiments. The PI feels that a cage change during an animal's free running period in constant conditions induced activity can cause a phase shift or period change in its activity rhythm. In many experiments, phase and period are the critical measurements and the timing of a cage change is essential so that the research data is not impacted. This PI has been given permission to house hamsters in constant dim light to measure the free running times of the hamsters in the absence of external rhythmic factors, i.e. light cycles. A rhythmic light dark cycle will not allow for this information to be gathered. Every effort is made to design experiments to accommodate frequent cage changes, but occasionally a cage will be not be changed for a period of 2-3 weeks.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

(Chief Executive Officer or Legally Responsible Institutional Official)

SIGNATURE _____ OFFICIAL _____ NAME & TITLE OF C.E.O. OR INSTITUTIONAL OFFICIAL (Type or Print) _____ DATE SIGNED 11/25/03

Environmental Enhancement to Promote Psychological Well-being

Three Chlorocebus aethiops underwent multiple surgeries to assess a novel therapeutic approach. These animals were individually housed and isolated from other nonhuman primates during a portion of the studies to prevent potential occupational health and animal health exposures inherent to the research. Environmental enrichment was enhanced to compensate for the lack of audio or visual contact with other animals. Animals were monitored daily by the investigator(s) and the veterinary staff for pain, discomfort, distress, and for overall body condition. No complications were detected.

Feeding

Thirty-six Macaca mulatta underwent food regulation to motivate learning. Animals were given a reduced ration of monkey chow during the testing period of four days per week. During this time, their diets were supplemented by food rewards earned during testing and by food treats given as part of the enrichment program. The health status of the animals was monitored daily by the investigator(s) and the veterinary staff. Daily assessments included body condition, behavior, and hydration status. Animals were weighed weekly and returned to full feed when not on study.

Watering

One Macaca fascicularis, one Macaca nemestrina, and fifteen Macaca mulatta underwent water regulation to enhance performance and motivation to learn and perform complex tasks. Water regulation has been used as a principal reinforcement for learning and memory research in primates by many laboratories. Fluid intake was sufficient to maintain the animals' health and well-being. It was accomplished by: 1) permitting the animal to earn fluids to satiety each day during behavioral training and testing, 2) providing *ad libitum* chow and treats, 3) stopping fluid regulation when animals are not on study, and 4) monitoring of body condition, behavior, and hydration and weekly weights

Multiple Major Survival Surgery

Three Chlorocebus aethiops underwent an initial major surgery followed by a scientifically justified related surgery to assess novel therapies. Animals were monitored daily for pain, discomfort, distress, and overall body condition by the veterinary and investigator staffs.

Two Macaca fascicularis and one Macaca mulatta underwent multiple surgeries. The animals were rested at least five days between surgeries. Multiple surgeries were scientifically justified in order to facilitate adequate data collection. Animals were monitored daily for pain, discomfort, distress, and overall body condition by the veterinary and investigator staffs. No adverse complications were detected.

October 1, 2002 through September 30, 2003

Explanation for IACUC Approved Exceptions to USDA Regulations (cont.)

16-R-0001

Space

Seven opossums, seventeen raccoons, one skunk, and two squirrels were individually live-trapped and housed in Tomahawk traps (66.0 cm x 22.9 cm x 22.9 cm) for a maximum of seventy-two hours and then released to their site of capture. Animals were maintained in Tomahawk traps to minimize stress to the animal and prevent potential injury to them and to personnel, which could result from a transfer between the trap and a cage. During this period, animals were provided daily care and anesthetized (Ketamine and Xylazine) once for blood collection for epidemiology studies. Animals were monitored daily for comfort and maintenance of overall body condition by the veterinary, animal care, regulatory, and investigator staffs. Animals did not exhibit any overt discomfort or distress.

Nutritive Food Value

Forty hamsters were fed a nutrient deficient diet to mimic a tropical nation's diet to further anti-parasitic vaccine development. Animal weights were monitored by the investigator staffs. Veterinary and investigator staffs monitored for signs of discomfort, distress, and overall body condition daily. Animals did not exhibit any overt discomfort or distress.

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Exception To The Animal Welfare Act

Non-human Primate Cage Cleaning

The combination of the size and weight of the monkey cage units in the primate rooms, and the difficulty in maneuvering the racks into the retrofitted rack washers create a potential safety hazard for employees. Removing these racks from the room with minimal door clearances, into the narrow corridor space, and up the incline to the rack washers is extremely difficult, even though the unused caging from these racks has been removed when possible to reduce the rolling weight. Due to these difficulties, primate caging is washed at one month instead of two week intervals. The cage bottoms and pans are washed twice daily.

The policy currently applies to all nonhuman primates within the facilities. (Currently 11 cynomolgus monkeys.)

IACUC Approved Exemptions

The IACUC has approved an exemption for daily exercise for dogs for one protocol. In this dog protocol, the animals are confined to cages for 24 hours for use in pharmacokinetic studies. The dogs have indwelling venous catheters in place and must be confined during the 24 hour period that the catheter is in place. After the catheter is removed, the dog can be placed back on the exercise program. The protocol involves 12 dogs. This exemption for daily exercise at most occurs only once monthly for each dog.

Description of Exceptions to Animal Welfare Act

The Princeton IACUC has approved the limited use of a slightly smaller cage than that of standard size cat cage (18.5 inches high, compared to 24 inch standard height). The animals usually spend less than 18 hours in this cage during the recovery period directly following surgery [note that the protocol for this project allows for the animal to be in the recovery area for up to 48 hours, though in practice, the actual recovery period is significantly less]. This enclosure is heated and kept warm for the animals, which are asleep for the majority of the time spent in the area. Once the animals are awake and fully recovered, they are moved to their regulation-sized cages. Food, water, and a litter box are made available to the cats when they awake. This change effects approximately 20 cats per year.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

MEMORANDUM

DATE: *07 October 2002*

TO:
Attending Veterinarian

FROM:
Chair, Institutional Animal Care and Use Committee, VFA

SUBJECT: *Animal Care Regulations and Standards*

During the period from October 1, 2001 to September 30, 2002 there were no exceptions to the regulations or standards identified by the IACUC at our sites in Upper Merion and Upper Providence Townships in Pennsylvania. This includes having no exceptions to our exercise plan and all nonhuman primates participated in the environmental enrichment program.

This report is required by law (7 USC 2143). Failure to result in an order to cease and desist and to be subject

according to the regulations and penalties as provided for in Section 2150.

Summary of Exceptions to Welfare Regulations

1. Some of the Siberian hamsters (*Phodopus sungorus*) have been housed in a temperature-controlled chamber for a study of their ability to become torpid in cold situations, which conserves energy reserves. They were held at temperatures down to 8 degrees Celsius. The hamsters are properly housed in every other way. In fact, in view of the fact that the Siberian hamsters commonly experience even lower winter temperatures in the wild, the housing can be said to conform with the statement on page 101-102 (§3.126) of the Animal Welfare Regulations which reads "The ambient temperature shall not be allowed to fall below nor rise above temperatures compatible with the health and comfort of the animal."

Because this ability to assume torpor is well known, and it can be studied only at lower temperatures than those maintained in the regular animal housing, the IACUC has approved this use of the controlled temperature chamber.

2. In studies of circadian rhythms, endogenous rhythms are discovered by housing animals in constant conditions of light or dark. For the Siberian hamster, during the time period for discovering the free-running rhythm, that is the rhythm exhibited when there are no clues to the actual 24-hour day/night cycle, the animals are kept in constant darkness. These are nocturnal animals and there is no reason to believe that constant darkness causes them any discomfort. The IACUC has approved housing Siberian hamsters in constant darkness for experiments concerning circadian rhythms.

E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report, in addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

SUMMARY OF EXCEPTIONS
University of Illinois - Chicago
33-R-018

The Institutional Animal Care and Use Committee of the University of Illinois - Chicago has approved an exception to the minimum space requirements as contained in **Section 3.80 Primary Enclosures** of the Standards promulgated to implement the Animal Welfare Act for 15-20 kg. time, pregnant baboons (*Papio* sp). This exception is for the period that the animal is instrumented and tethered and does not exceed 90 days. The exception was granted to minimize the chance that the animals might damage the tether system which would result in detrimental effects to the animal and the fetus - hemorrhage. The exception granted is to maintain the instrumented animals in an eight square foot primary enclosures whose floor space has been reduced to six square feet by cranking in the squeeze back mechanism. During the reporting period 5 animals were temporarily housed under this exception and the housing period did not exceed 90 days.

The Institutional Animal Care and Use Committee of the University of Illinois - Chicago has approved an exception to the minimum space requirements as contained in **Section 3.80 Primary Enclosures** of the Standards promulgated to implement the Animal Welfare Act for the temporary housing of male and female baboons (*Papio* sp). The exception granted was that the male cage does not have to provide twice the minimal area required to house one animal during periods of breeding. This exception is for the period that the female is placed in the males cage for the purpose of breeding. This period generally does not exceed 5 days and the male cage contains 15 sq. ft. The exception was granted because the housing is only temporary in nature, and it is a generally accepted practice for many species that the female is taken to the male cage for breeding. It is the consensus of the veterinary staff that the current caging system provides ample space for the animals to engage in species specific interactive behaviour. During the reporting period 61 animals were temporarily housed under this exception.

The Institutional Animal Care and Use Committee of the University of Illinois - Chicago has approved an exception to the minimum space requirements for bats as contained in **Animal Care Policy # 24**, which was designed to clarify Section 3.128 Space Requirements of the Standards promulgated to implement the Animal Welfare Act. The exception granted was that bats could be maintained in a cage that did not provide sufficient unobstructed enclosure volume to enable movement by flying during the quarantine period and post-surgical manipulation. The exception was granted in order to facilitate the training of the bats to eat meal worms during the quarantine period as well as to better assess their food consumption and physical condition during both the quarantine period and post-surgical manipulation. During the reporting period 60 animals were housed temporarily under this exception and the housing period did not exceed 50 days (approximate duration of the quarantine period).

SUMMARY OF EXCEPTIONS
University of Illinois - Chicago
33-R-018

The Institutional Animal Care and Use Committee of the University of Illinois - Chicago has approved an exception to the minimum space requirements as contained in **Section 3.80 Primary Enclosures** of the Standards promulgated to implement the Animal Welfare Act for the temporary housing of male and female baboons (*Papio* sp). The exception granted was that the male cage does not have to provide twice the minimal area required to house one animal during periods of breeding. This exception is for the period that the female is placed in the males cage for the purpose of breeding. This period generally does not exceed 5 days and the male cage contains 15 sq. ft. The exception was granted because the housing is only temporary in nature, and it is a generally accepted practice for many species that the female is taken to the male cage for breeding. It is the consensus of the veterinary staff that the current caging system provides ample space for the animals to engage in species specific interactive behaviour. During the reporting period 3 animals were temporarily housed under this exception.

Animal Report of Research Facility Summary of Exceptions for Year 2001 – 2002
Registration No. 34-R-0025

An exception to the standards and regulations under the Act, involves non-human primate caging during the 2001 – 2002 year. Wall mounted non-human primate caging was installed in one room to augment our standard primate housing in 1998. A second room was equipped with similar wall mounted caging in March of 2002. The wall-mounted cages used in these rooms provide approximately 4.2 ft² of floor space rather than the 4.3 ft² required for non-human primates between 3 to 10 kg. The height of these cages is 34.6 inches and they slant outward from the bottom. The total volume of these wall-mounted cages is greater than 12.0 ft³. Therefore the height and volume are both greater than the 30 inch height and 10.75 ft³ volume requirements for 3 to 10 kg, non-human primate caging. The guidelines state that innovative primary enclosures not precisely meeting the floor area and height requirements, but that do provide a sufficient volume of space and opportunity to express species typical behavior may be used when approved by the Committee. The cage measurements and a study in which primate behavior (macaques and baboons) was compared between animals housed in caging similar to the ones in question at NBR and those of 4.5 ft² floor space were discussed. The study discovered no behavioral evidence that a 4.0 ft² was not a suitable substitute for a 4.5 ft² floor area cage. The Animal Care and Use Committee approved the use of the 4.2 ft² floor area, 34.6 inch height and > 12.0 ft² volume cages for animals in the 3 to 10 kg weight range. Seventy-two non-human primates were housed at some time in the wall-mounted cages during the 2001 – 2002 year.

2001/2002 Annual Report Attachment: Summary of IACUC Exceptions to the AWA

The IACUC approved two exceptions to the Standards and Regulations for the care and use of guinea pigs. The exceptions approved were variances in 1) the minimum interior height requirement of the primary enclosures used to house the animals, and 2) their normal diurnal light cycles.

Fourteen (14) guinea pigs involved in a study investigating the effects of ultra violet (UV) radiation on cataract formation in the lens were housed in specially modified cages containing two "black light" UV lamps mounted to the inside top of the cage.

This lamp arrangement, along with the need for a 1/4" mesh screen to prevent the animals from coming in direct contact with the lamps or their fixtures, resulted in a minimum height of five inches (5") directly under the lamps (approximately 50% of the cage floor space) and a minimum height of six inches (6") between the lamps.

The animals were exposed to the UV light continuously. Normal room lights were activated only for daily inspection and examination of the animals and to provide proper lighting for daily animal care duties.

The health status of these animals was routinely monitored by the veterinarian, animal care staff and the principal investigator for signs of ill effects from the UV exposure and/or primary housing conditions. No complications resulting from such were encountered.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs			35		35
5. Cats			26		26
6. Guinea Pigs			0		0
7. Hamsters			0		0
8. Rabbits			98		98
9. Non-human Primates			28		28
10. Sheep			0		0
11. Pigs			34		34
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual rese teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and ap Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary inc brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Dear Dr. Goldentyer:

RE: Research Facility Annual Report, Registration 41-R-0006

Enclosed is the "Annual Report of Research Facility" (APHIS Form 7023) form for the Mayo Foundation (Certificate Number: 41-R-0006, Customer Number: 542).

The IACUC has approved two exceptions to the Animal Welfare Act regulations. The IACUC approved separately housing hamsters (six hamsters involved) and mice in the same room in the Guggenheim Building, Mayo Clinic Rochester. Both species within this room were housed in microisolation cages, which provided the animals with their own microenvironment. This was done because both species were being used in a protocol where animals had been exposed to a Biosafety Level II organism. To contain this organism, both species of animals were housed in the same room within a designated Biohazard Facility. The IACUC also approved housing 12 pigs at between 25-30 kg in 12 square feet for less than 24 hours in the Birdsell Building, Mayo Clinic Jacksonville.

Attending veterinarians at all sites have the authority to ensure that adequate veterinary care is provided. Veterinarians oversee the Section of Veterinary Medicine, which administers all aspects of the animal care and use program at Mayo Foundation.

Oakdale, MN 55128

Dear Dr. Goldentyer:

Thank you for your prompt response to Excorp Medical's request to cancel its certification as a Class R Research Facility. As requested, enclosed please find the completed Annual Report, APHIS Form 7023, for the period of October 2003 through May 10, 2004.

As noted, Excorp Medical Inc. will submit the necessary application materials for recertification prior to initiating any research operations that require Animal Welfare Act registration.

Your assistance in this matter is appreciated.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs	0	0	0	0	0
5. Cats	0	0	0	0	0
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	0	0	0	0	0
9. Non-human Primates	0	0	0	0	0
10. Sheep	0	0	0	0	0
11. Pigs	0	0	0	0	0
12. Other Farm Animals	0	0	0	0	0
13. Other Animals	0	0	0	0	0

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Dear Sir/Madam:

As you requested, we are terminating your Registration under the Animal Welfare Act (AWA) effective the date shown above.

Should you decide to resume operations that require AWA registration, you will need to submit a new application. Please note that operating without a valid registration is a violation of the AWA and subject to legal action.

If you are a research facility, we wish to emphasize that all research facilities -- both active and inactive -- must file an annual report (APHIS Form 7023) with the Animal Care regional office documenting their activities and animal usage for the Federal fiscal year (October 1 through September 30) by December 1 of that year. Research facilities whose registrations were terminated during the fiscal year must also fulfill this requirement. Failure to do so constitutes a violation of the AWA and its regulations.

Accordingly, please complete the enclosed APHIS Form 7023 in triplicate and return two copies to the above address. Detailed instructions are printed on the back of the form. All research facilities should complete items 1 through 3; items 4 through 13 should be completed if applicable. Also required is the date, signature, and title of the Chief Executive Officer or other legally responsible official who attests to the accuracy of the report and to the assurance statements.

We appreciate your efforts in complying with the Animal Welfare Act. Contact this office at 817-885-6923 if you have any questions regarding this letter or the Animal Welfare Act.

Sincerely,

Walter A. Christensen
Regional Director - Animal Care

13. Other Animals	↓	↓	↓	↓	↓

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC) A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs	3		71		71
5. Cats	0		38		38
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals Rats	17		71		71

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Exception to USDA Policy #3

**Attachment to USDA Annual Report
Registration No. 43-R-0033
November 2001**

The IACUC approved the following exception to USDA Policy 3 during this reporting period:

An exception to the use of pharmaceutical –grade compounds as outlined in USDA Policy 3, Veterinary Care was scientifically justified by the principal investigator and approved by the IACUC for a non-recovery study in anesthetized dogs where Pharmacia compounds are evaluated for effects on renal function. The alcohol content in the commercially prepared pharmaceutical grade sodium pentobarbital was scientifically unacceptable due to the effect of alcohol on platelet aggregation and the release of anti-diuretic hormone. Due to the potential negative impact on study endpoints, the IACUC approved the use of non-pharmaceutical-grade sodium pentobarbital for this project.

2002 USDA Annual Report (November 25, 2002)
Pharmacia-St. Louis
Registration #: 43-R-0033

IACUC Approved Exceptions

- 1) The IACUC approved an exception to cage height for rabbits in a telemetry study. In order to receive an adequate signal for the equipment, the transmitters were mounted to the top center portion of the cage ceiling. This reduces the overall cage height from 14 inches to 12-13 inches in the very center of the cage. The rabbits have ample space to move around the receiver, and have adequate space to move about the cage and make normal postural adjustments.
- 2) The IACUC approved an exception from the institutional exercise policy for dogs so that urine could be collected continuously over a 7 day period.

RE: 2003 Annual Report, Terminated Pharmacia-St. Louis Registration #: 43-R-0033

Dear Dr. Gibbens:

Please find the enclosed 2003 Annual Report of Research Facilities (Form #7023) for Pharmacia, St. Louis as required by the AWA. As per our April 24, 2003 correspondence to your office, Pfizer, Inc. acquired Pharmacia on April 16, 2003. As a result, the Pharmacia, St. Louis USDA registration (#43-R-0033) has been terminated and the St. Louis site is now covered under Pfizer registration, #21-R-088.

The enclosed annual report for terminated registration, #43-R-033 covers the time period from October 1, 2002 through April 15, 2003. The report has been signed by _____ for the St. Louis site during the above stated time period prior to the Pfizer acquisition.

If you should have any questions regarding this communication, please don't hesitate to contact me. I can be reached a

Sincerely,

cc:

Dr. Jamilon Newman, USDA VMO

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep		2	2		4
11. Pigs					
12. Other Farm Animals	54		24		24
goats					
donkeys	1	3			3
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

RE: Washington University and Central Institute for the Deaf merger

Dear Dr. Gibbens,

Effective September 1, 2003 the Washington University animal care and use committee merged with Central Institute for the Deaf (CID), 4560 Clayton Avenue, St. Louis, MO 63110. CID is now covered under Washington University's registration #43-R-008.

If there is any further information you require, please let me know.

Sincerely,

DEC 11 2003

Dear Sir/Madam:

As you requested, we are terminating your Registration under the Animal Welfare Act (AWA) effective the date shown above.

Should you decide to resume operations that require AWA registration, you will need to submit a new application. Please note that operating without a valid registration is a violation of the AWA and subject to legal action.

If you are a research facility, we wish to emphasize that all research facilities -- both active and inactive -- must file an annual report (APHIS Form 7023) with the Animal Care regional office documenting their activities and animal usage for the Federal fiscal year (October 1 through September 30) by December 1 of that year. Research facilities whose registrations were terminated during the fiscal year must also fulfill this requirement. Failure to do so constitutes a violation of the AWA and its regulations.

Accordingly, please complete the enclosed APHIS Form 7023 in triplicate and return two copies to the above address. Detailed instructions are printed on the back of the form. All research facilities should complete items 1 through 3; items 4 through 13 should be completed if applicable. Also required is the date, signature, and title of the Chief Executive Officer or other legally responsible official who attests to the accuracy of the report and to the assurance statements.

We appreciate your efforts in complying with the Animal Welfare Act. Contact this office at 817-885-6923 if you have any questions regarding this letter or the Animal Welfare Act.

Sincerely,

W. A. Christensen

Walter A. Christensen
 Regional Director - Animal Care

RE: Mo. Laser Institute
43R0043

Jim,

Mo. Laser Institute has closed its operations and procedure facilities for handling animals. I verified this while in St. Louis on June 19th, 2001. The Bridgeton site was closed down. I called

by phone. He verified the closing of their operations. was to send to your office a letter stating the above.

Please remove this facility from our registant list.

Sincerely,

Ed Slauter VMO

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

11. Pigs	—	—	—	—	—
12. Other Farm Animals	—	—	—	—	—
13. Other Animals	—	—	—	—	—

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Central Region
P.O. Box 6258
Ft. Worth, TX 76115-6258

Dear Dr. Christiansen:

Enclosed for your files is our *Annual Report of Research Facility*. As indicated, the number of horses and treatment category is the same as that reported last year.

This report reflects activities through the first half of this year only. Treatments to the 5 horses in this project were discontinued May 30 and the horses were sold July 26. Therefore, we currently have no animals being used in a program qualified as research. We do, however, wish to maintain our Research Facility status although on an inactive basis.

Respectfully,

Enclosure

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs			16		16
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits		14			14
9. Non-human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					
Mice		7,229			7,229
Rats		329			329

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

----------------------	--

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs			9		9
5. Cats			19		19
6. Guinea Pigs			11		11
7. Hamsters			6		6
8. Rabbits			6		6
9. Non-Human Primates			-		-
10. Sheep			-		-
11. Pigs			1		1
12. Other Farm Animals			-		-
13. Other Animals					
Gerbils			6		6

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). **A summary of all the exceptions is attached to this annual report.** In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO OF ANIMALS (Cols. C + D + E)
4 Dogs					0
5 Cats					0
6. Guinea Pigs					
7 Hamsters					
8 Rabbits					
9 Non-Human Primates					
10 Sheep					
11 Pigs					
12. Other Farm Animals					
13. Other Animals					0

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetics, analgesics, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

DATE: October 12, 2001

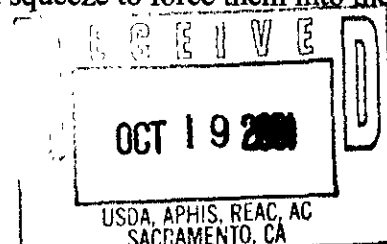

RE: Annual Report

The following are appended to the annual report.

We declare that we have no ongoing column E studies in regulated species.

The following exceptions to regulations for regulated species are approved by the IACUC. Note that other than these exemptions, all aspects of the primate psychological enrichment program remain in force, including perches, housing in visual and hearing proximity to other macaques, manipulanda (except for Nudo projects), daily treats and human interaction.

1. projects – Investigator requests no group housing of macaques due to inoculation of animals with specific AIDS viruses. Protocols track the identity of inoculated vaccine and challenge strains. There must be no possibility of cross transmission via wounds.
2. projects – Investigator requests no group housing due to electrode “caps” surgically implanted on heads of animals. Pair housing may result in damage to the caps.
3. projects – Investigator requests no toys in cages because they interfere with training and manipulation studies.
4. The following exemption is requested for new monkeys, those that are young and not trained for transfer cages. Staff requests that kong toys be left out of the cages until the animals are conditioned to the transfer cage. Toys prohibit a tight squeeze to force them into the transfer cage.

Report for 10-01-00 to 9-31-01

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ATTACHMENT 1

IACUC APPROVED EXEMPTIONS

DOGS

The IACUC has approved exemptions of exercise for dogs (purpose bred beagles) immediately post IV catheter installation and also if the catheterization is for continuous infusion which may be interfered with while exercising due to the playful nature of the dogs. On occasions, exemption has been approved when a test compound might be expected to induce vomiting and it is essential to identify the dog which may have vomited, in order to prevent other dogs that are exercising from consuming vomitus unintentionally. Dogs may be exempted during pharmacokinetic blood sampling. An occasional dog is exempt from exercise due to medical reasons but, only on the order of the Attending Veterinarian.

NONHUMAN PRIMATES

Nonhuman primates on toxicology studies may be exempted from commingling depending on the nature of the compound being studied, and compatibility of the monkey.

Although cynomolgus monkeys have been proven to be compatible, they are unpredictable in their sudden change of attitude to bite and fight. Due to the unpredictability of the behavior of cynomolgus monkeys, to meet the study requirements of FDA, and GLP's, they may be exempted from commingling for fear of injury which would require additional drugs to be given to the monkeys, and/or cause a need for surgery or result in death due to fighting. These conditions could require additional monkeys to be assigned to the study or cause the study to be repeated. Monkeys may be exempted during pharmacokinetic blood sampling. Exemption from commingling has been approved for conditions immediately post IV catheter installation and if the catheterization is for continuous infusion which may be interfered with during commingling.

Whenever nonhuman primates are exempted from commingling, they are still provided with environmental enrichment toys, devices, treats, etc. An occasional monkey is exempt from exercise due to medical reasons but, only on the order of the Attending Veterinarian.

i), which is obsolete)

Addendum to the 2003 USDA Annual Report of the Research Facility
Duke University

Active Projects During this Reporting Interval with DUIACUC Approved Exceptions to
the Regulations or Standards of the Animal Welfare Act

Six investigators used restricted access to food and/or water to train cats and nonhuman primates to perform tasks for rewards. In some cases, dietary supplements, such as fruit juice, fruit and other treats that were used for enrichment, were restricted to increase the animals' interest in these items during study periods. All six investigators also required physical restraint (sound box or chair) for up to six hours to study neural processing and mechanisms in areas such as hearing, conditioned motor learning, mastication, and cognitive and motor deficits.

Prior to starting the restricted water access paradigm, each animal's *ad libitum* baseline daily water consumption was determined. Once the restricted access study began, water was restricted for up to 18 hours prior to each study session or limited to 50 ml/kg per day in some primate protocols to motivate the animals to perform tasks for fruit juice or water rewards. Fruit was also restricted during this period. Daily water requirements were met during study periods or immediately after the study when the remaining balance of the daily baseline water consumption was provided in the animal's home cage.

When food restriction procedures were used, the animals' weights and *ad libitum* food consumption were measured prior to the training paradigm. During each daily training session, a slurry of food and liquid, food pellets, or treats (e.g., fruit and nuts) were used as a reward to enhance the training and performance of behavioral tasks. After the training session or study, additional chow was provided to each animal. The amount of chow was adjusted in order to maintain each animal's body weight at no less than 85% (cats) to 90% (primates) of the baseline weight taken before the study began. Other studies involved withholding food for up to 24 hours prior to electrode insertion and subsequent EMG measurements. In these studies, the animals were given a variety of foods during the experiment to study chewing motion.

There were a total of six protocols that used these paradigms. The protocols involved 18 cats, 16 macaques, 4 owl monkeys, and 4 baboons for this reporting period.

Food and water consumption, body weights, physical condition and health were monitored daily by the investigators' staff, the clinical veterinarians, the veterinary technicians, and the animal care staff.

End of addendum.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for wh the use of appropriate anesthetic, analgesic, or tranquiliz drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals a the reasons such drugs were not used must be attached this report).	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs			26		26
5. Cats					
6. Guinea Pigs			100 120		120
7. Hamsters					
8. Rabbits			24		24
9. Non-human Primates			52		52
10. Sheep					
11. Pigs					
12. Other Farm Animals <i>CATTLE</i>			2		2
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual rese teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and ap Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary inc brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Llama	1				1
12. Other Farm Animals					
Goats	20	10			30
13. Other Animals					
Catfish	30,000	10,000	5,000		45,000
Tilapia	15,000	5,000	2,000		22,000
Striped Bass	500	300	200		1,000

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

DATE SIGNED

11/25/03

11/25/03

IACUC Approved Exceptions to USDA Regulations or Standards (2003)

- 1. Controlled food or water intake (i.e., feeding less than once a day and/or watering less than twice a day for an hour each time).**

Eleven non-human primates were on studies using controlled water intake. Water was withheld overnight prior to testing. Animals received water and/or juice during testing and had free access to water for several hours following testing. Animals were weighed regularly while on study with no ill effects observed. The maximum continuous period of controlled water intake was five days for most animals; two animals experienced two periods of six days and another animal experienced five periods of six days. All other animals had unlimited access to water at least two days each week.

- 2. Maintaining animals at temperatures and/or humidities outside the ranges specified by the standards.**

N/A

- 3. Not cleaning and/or sanitizing at required frequencies.**

N/A

- 4. Not providing diurnal lighting as required.**

Light cycles in lemming housing areas were designed to mimic natural environmental conditions. Animals received short periods of light or dark depending on the season being studied. The rooms were 8 hours light/16 hour dark, or 16 hours light/8 hours dark, or 22 hour light/2 hours dark.

- 5. Not meeting space requirements (including innovative enclosures).**

N/A

- 6. Exceptions from the exercise plan for dogs or exceptions from the psychological well-being plan for primates.**

Primates were pair housed unless research parameters, health status or behavior required individual housing. Individually housed animals received environmental enhancement through food treats, access to puzzles and/or toys, interaction with caretakers, and the ability to see other animals of their species.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals at the reasons such drugs were not used must be attached this report).	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs	0	0	0	0	0
5. Cats	0	0	0	0	0
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	0	0	0	0	0
9. Non-human Primates	0	0	0	0	0
10. Sheep	0	0	0	0	0
11. Pigs	0	0	0	0	0
12. Other Farm Animals	0	0	0	0	0
13. Other Animals	0	0	0	0	0

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Program Exemption Report**

October 1, 2002 through September 30, 2003

Registration No: 65-R-0102

Exceptions to the exercise plan for dogs

A total of 26 dogs were housed in metabolic cages during the fiscal year. These animals are exempted from the canine exercise program. Metabolism dogs are chronically catheterized and continuously, consciously monitored via computer. The jacket system precludes large caging in order to minimize problems with the various instrumentation. The exemption from the exercise requirement has been approved by the UMC IACUC and verified by the LAF veterinary staff.

FOR 2001 ANNUAL REPORT OF RESEARCH FACILITY

In our opinion, the facility is adhering to the standards and regulations of the Act with the questionable exception of flea egg collection boards which are placed under the cages of four (4) dogs to collect flea eggs. This exception is addressed in Item 2 of the August 20, 1990 Report of IACUC to ARC, Inc. Lab Director as follows:

"The use of unsealed wood for flea egg collection may continue. We do not believe this condition imposes a health hazard to the dogs in question since the dogs cannot come in contact with the surfaces and the surfaces are washed daily.

FOR 2002 ANNUAL REPORT OF RESEARCH FACILITY

In our opinion, the facility is adhering to the standards and regulations of the Act with the questionable exception of flea egg collection boards which are placed under the cages of four (4) dogs to collect flea eggs. This exception is addressed in Item 2 of the August 20, 1990 Report of IACUC to ARC, Inc. Lab Director as follows:

"The use of unsealed wood for flea egg collection may continue. We do not believe this condition imposes a health hazard to the dogs in question since the dogs cannot come in contact with the surfaces and the surfaces are washed daily.

Emc Co; Jeff Baker, VMD
11-12-03
Laris

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

See reverse side for additional information.

- ASSURANCE STATEMENTS**
- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
 - 2) Each principal investigator has considered alternatives to painful procedures.
 - 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
 - 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

2. HEADQUARTERS RESEARCH FACILITY (Name and Address, as registered with USDA, include Zip Code) UNIVERSITY OF THE OZARKS 415 COLLEGE AVE CLARKSVILLE, AR 72830 (479) 979-1361		
3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)		

FACILITY LOCATIONS(sites)

See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs	0	0			0
5. Cats	0	0			0
6. Guinea Pigs	0	0			0
7. Hamsters	0	0			0
8. Rabbits	0	0			0
9. Non-Human Primates	0	0			0
10. Sheep	0	0			0
11. Pigs	0	0			0
12. Other Farm Animals	0	0			0
13. Other Animals	0	0			0

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress or use of pain-relieving drugs	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO OF ANIMALS (Cols. C + D + E)
4 Dogs					
5 Cats					
6 Guinea Pigs					
7 Hamsters					
8 Rabbits					
9 Non-Human Primates					
10 Sheep		1			1
11 Pigs					
12 Other Farm Animals					
goats		4			4
13 Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- Each principal investigator has considered alternatives to painful procedures
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC) A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

TRAUMA SERVICES

March 22, 2001

Walter A. Christensen
Regional Director- Animal Care
USDA Central Region
PO Box 915004
Ft. Worth Texas 76115-9104

Dear Mr. Christensen:

I am writing to make application for registration under the Animal Welfare Act. APHIS form 7011 is enclosed. I would like to request waiver of form 7005, and substitution of the enclosed computer generated spreadsheet. Please note that the facility for which application is being made does not house any animals. All animals are delivered the day of the procedure and the procedure used in the lab is terminal.

I hope that the enclosed information is sufficient, however please contact me if the provision of additional information would prove helpful to you or your field inspector. Thank you.

Sincerely,

*checked 5/17/01
OK use of computer form
since no animals
not required per
research.*

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

2. HEADQUARTERS RESEARCH FACILITY (Name and Address, as registered with USDA, include Zip Code) BROOKE ARMY MEDICAL CENTER C/O 3851 ROGER BROOKE DRIVE FORT SAM HOUSTON, TEXAS 78234 (210) 916-1264			

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)

FACILITY LOCATIONS (sites)

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters			1		1
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Pigs			65		65
12. Other Farm Animals					
Goats			44		44
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

FACILITY LOCATIONS (Sites) - See Attached Listing

USDA-ARS-SPARC College Station, TX Bldgs 5A, 5B, 10, 17, 20, 21, and various pastures at SPARC

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs	0	0	0	0	0
5. Cats	0	0	0	0	0
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	0	0	0	0	0
9. Non-human Primates	0	0	0	0	0
0. Sheep	0	0	0	0	0
1. Pigs	800	800	0	0	800
2. Other Farm Animals	8	8	0	0	8
Cattle					
Chickens	9870	9870	0	0	9870
3. Other Animals					
Turkeys	200	200	0	0	200
Mice	20	20	0	0	20

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

USDA Annual Report (2000-2001)

Explanation for animals used under the Pain/No Drugs category:

In order to study the molecular basis of pain (nociception), it is necessary to study animals under these conditions. However in the majority of our studies, we perform our behavioral studies to determine the threshold of pain in the animals. Therefore, no more stimulus is applied than that required to elicit a minimally aversive response, and the animals are freely moving and able to withdraw the paw from the stimulus. Thus, the actually pain experienced by the animals is minimal. Certain of our studies involve the injection of inflammatory agents, which likely induce some pain to the animals, however this is never enough to limit the animals mobility, access to food and water, or of sufficient intensity to induce vocalizations indicating extreme stress or intense pain. If an animal were to appear to be under extreme distress, we would euthanize the animal by an overdose of anesthetic. However, this has not occurred in the course of our studies.

Attachment to 2002 Annual Report

A total of 41 calves on 6 separate IACUC approved protocols were confined to a stanchion for the minimum period of time necessary to accomplish the research task, but greater than 12 hours, to properly care for or treat routine post-operative issues or to prevent additional harm to the animal or damage to externalized hardware. Each of the six protocols was reviewed and pre-approved by the IACUC to allow the extended restraint.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO OF ANIMALS (Cols. C + D + E)
4 Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits	190	1,413	0	0	1,413
9. Non-Human Primates					
10 Sheep	74	227	0	0	227
11 Pigs					
12 Other Farm Animals					
Goats	40	466	0	0	466
13 Other Animals					
Donkeys	3	1	0	0	1

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC) A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

N/A

1. Registration Number: _____

2. Number _____ of animals used in this study.

3. Species (common name) _____ of animals used in the study.

4. Explain the procedure producing pain and/or distress.

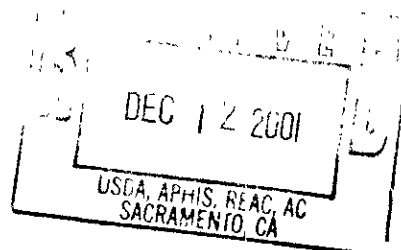

N/A

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

N/A

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

IACUC - APPROVED EXCEPTION TO THE ANIMAL WELFARE ACT

1. Decreased cage space due to scientific necessity:

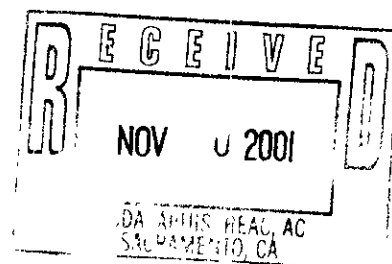

*Sheep 7/year

27 November 2001

To Whom It May Concern:

Please find attached the annual report for the University of Texas Health Science Center – Houston. The report was prepared to the best of our ability with the information that we had available. As you are aware, our institution lost all of our records covering animal use between October 1, 2000 and June 8, 2001 due to the devastating effects of Tropical Storm Allison in the Houston area on June 8th and 9th. The offices in which these records were kept were underwater for at least three days. Some of the records are in the process of being reclaimed, but the process is very slow. We do not expect that the animal usage records will be readable after undergoing this process, since most records kept in ballpoint ink have been smeared and are unreadable. If they do prove readable, we will amend this report at a later date.

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 211

See attached form for additional information.

USDA Report

“CATEGORY E”

None to be reported

“EXCEPTIONS”

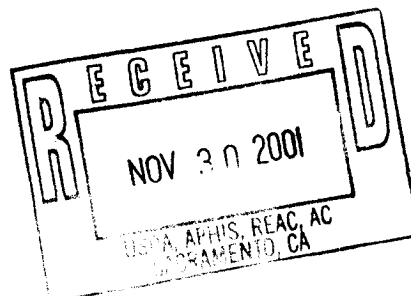

Sheep

Fifteen individually instrumented sheep were housed in small, elevated pens. This procedure is done to minimize the environmental stresses to the animal, and to provide reproducible results. The size of the pen permits the sheep to standup, laydown, or turn body positions.

Pigs

Seven pregnant sows were housed in farrowing pens beginning one week prior to parturition. The sow is returned to routine housing after weaning of the piglets.

This procedure is done to prevent accidental injury to the piglets by the sow.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and if has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and if has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits	11	43			43
9. Non-Human Primates					
10. Sheep	5	16			16
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
Goats	3	0	14	0	14
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					
Brook Trout		141			141
Tiger Salamanders		1693			1693
Wood Rats		74			74

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

RE: REGISTRATION CANCELLATION

Dear Sir/Madam:

As you requested, we are terminating your Registration under the Animal Welfare Act (AWA) effective the date shown above.

Should you decide to resume operations that require AWA registration, you will need to submit a new application. Please note that operating without a valid registration is a violation of the AWA and subject to legal action.

If you are a research facility, we wish to emphasize that all research facilities -- both active and inactive -- must file an annual report (APHIS Form 7023) with the Animal Care regional office documenting their activities and animal usage for the Federal fiscal year (October 1 through September 30) by December 1 of that year. Research facilities whose registrations were terminated during the fiscal year must also fulfill this requirement. Failure to do so constitutes a violation of the AWA and its regulations.

Accordingly, please complete the enclosed APHIS Form 7023 in triplicate and return two copies to the above address. Detailed instructions are printed on the back of the form. All research facilities should complete items 1 through 3; items 4 through 13 should be completed if applicable. Also required is the date, signature, and title of the Chief Executive Officer or other legally responsible official who attests to the accuracy of the report and to the assurance statements.

We appreciate your efforts in complying with the Animal Welfare Act. Contact this office at 970-494-7467 if you have any questions regarding this letter or the Animal Welfare Act.

Sincerely,

Robert M. Gibbens
Regional Director - Animal Care

Dear Sirs:

The Coulston Foundation has relinquished ownership of all animals, non-human primates, to Center for Captive Chimpanzee Care, located at 1300 LaVelle Road in Alamogordo.

The Coulston Foundation has ceased business. Diagnostic and Technology Center (DTC) is charged with the task of returning archive materials, test substances, hazardous & radioactive materials.

Please contact us, if we may be of further assistance.

Sincerely,

CC: DJS

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use

(An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
Golden mantled squirrel		5			5
Kangaroo rats	72				0
Least chipmunk		7			7
Mexican wood rat		13			13
Red squirrel		1			1
Round tailed squirrel	33		10		10
Skunks			18		18
Voles		15			15
Wood rats	55				0
* Pig numbers:					
Thirty seven (37) of the 118 pigs listed on this report were used in a collaborative project with Arizona Heart Institute Foundation. After consulting with Dr. Wendy Koch of the USDA Denver office, it was decided that because the pigs were purchased by and housed at Arizona State University, the pigs would be included under the ASU USDA Annual Report. A copy of Dr. Koch's fax is attached. Therefore, the Arizona Heart Institute Foundation is reporting no animal use. Their USDA form is included in this packet.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be identified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions must be included to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

IACUC-approved exceptions to regulations and standards.

Three exceptions to regulations were approved by the Institutional Animal Care and Use Committee at St. Joseph's Hospital.

The first exception is the schedule for providing water to rabbits. As part of two IACUC-approved protocols that involve behavioral experiments, the provision of water to rabbits is restricted to one session each day in the laboratory. Water is provided as a positive reinforcement to obtain the behavior under study. At the end of each session, the animals are allowed to drink to satiation. No animals were used in this protocol during the current reporting period.

The second exception is the schedule for providing food to cats. As part of three IACUC-approved protocols that involve behavioral experiments, the provision of food to cats is restricted to one session each day in the laboratory. Food is provided as a positive reinforcement to obtain the behavior under study. At the end of each session, the animals are allowed to eat to satiation. Fifteen animals have been used in these protocols during the current reporting period.

The third exception is the schedule for providing water to rhesus monkeys. As part of an IACUC-approved protocol that involves behavioral experiments, the provision of water to rhesus monkeys is restricted to one session each day in the laboratory. Water is provided as a positive reinforcement to obtain the behavior under study. At the end of each session, the animals are allowed to drink to satiation. Two animals have been used in this protocol during the current reporting period.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

TO WHOM IT MAY CONCERN:

Enclosed is a completed APHIS Form 7023 for a small laboratory Animal facility that I have at the USDA, Agricultural Research Service (ARS) station in Reno, Nevada. Although this facility was previously included as a University of Nevada facility under their Registration (88-R-01), it now has its own Registration (88-F-0001). My facility continues to operate under the University of Nevada IACUC.

It should be noted that the majority of animals listed in columns C and F of the enclosed Form 7023 were animals that were simply live-trapped in the field and released unharmed for population studies. Only approximately 30 captive animals are maintained in my laboratory at ARS.

Sincerely,

USDA-ARS

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use this form.)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
Grizzly Bear	0	25	0	0	25
Cougar	0	0	12	0	12
Duikers	0	4	0	0	4
Mink	0	0	62	0	62
Ferret	0	1	0	0	1
Cottontail	0	6	0	0	6
Pygmy Rabbit	0	87	0	0	87
Mule Deer	0	31	40	0	71
Gerbils	40	127	48	0	175
Montane Voles	0	9	0	0	9
Chipmunks	0	9	0	0	9
Deer mice	0	460	0	0	460
Bats	0	0	20	0	20

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions shall be attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the dates and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**USDA Annual Report of Research Animal Facility
October 1, 1999 through September 30, 2000**

**The Salk Institute for Biological Studies - 93-R-0066
10010 N. Torrey Pines Road
La Jolla, CA 92037**

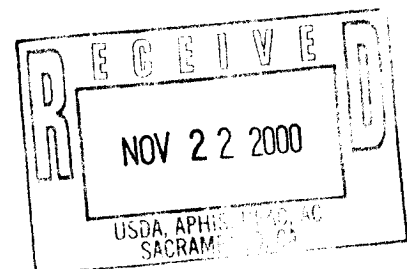

Summary of IACUC-Approved Exceptions

1. An investigator was granted Salk IACUC approval to perform multiple survival surgeries on nonhuman primates as part of the same experimental protocol. During this reporting period six animals were used.

2. An investigator was granted Salk IACUC approval to perform multiple survival surgeries on nonhuman primates as part of the same experimental protocol. During this reporting period two animals were used.

3. An investigator using nonhuman primates was granted Salk IACUC approval to utilize carefully monitored water control as a motivational tool. These animals were also chaired during experimental procedures and were removed at the end of the recording sessions (the average length of these sessions was four hours). During this period 13 animals were used.

4. An investigator using nonhuman primates was granted Salk IACUC approval to utilize carefully monitored water control as a motivational tool. These animals were also chaired during experimental procedures and were removed at the end of the recording sessions (the average length of these sessions was four hours). During this period three animals were used.

Explanation of exception to the standard as stated in section 3.128

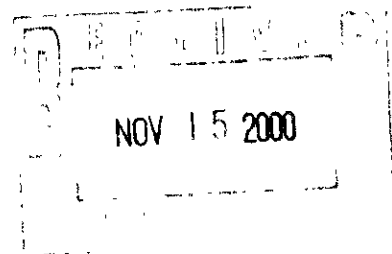

7 sheep weighing between 25-50 kg. were given enclosures of 14 square feet, secured to restrict movement to 3 feet forward and 3 feet backward, and could have been the only animal in the room. The duration of the study lasted up to 90 days in some cases. The animals were able to raise normally and lie down normally, they could not turn around. The nature of the power source to the implanted device would not allow for interruption of the current or the animal would die within 2 minutes. Animal care personnel were present in the room 24 hours per day to provide care and social enrichment. During 2 studies 2 animals were present in the room at the same time.

Attached is a sample of the Exemption from Social Interaction or Environmental Requirements for Research Animals. The animals were observed by one or more of the IACUC at 2 week intervals and the form was completed, signed and added to the animal's record. Signs of distress, behavior problems, weight loss, appetite changes and any medical conditions were reviewed by the IACUC at this time and noted on the Exemption form. No adverse conditions ever occurred in these 7 sheep.

EXEMPTION FROM SOCIAL INTERACTION OR ENVIRONMENTAL REQUIREMENTS FOR RESEARCH ANIMALS

Animal Identification and Location:	Ovine 0030.
Justification for individual Housing:	Electrical connections to medical device can not be tampered with by the animal or other animals.
Justification for and description of decreased environmental enrichment plan:	Death will occur if electricity is interrupted
Length of time approved for:	Date: 4/5/00 - 4/20/00 2 wks.
Re-Evaluation Date:	4/20/00
Veterinarian Signature:	<i>[Signature]</i>
Bacuc Members Signatures:	<i>[Signature]</i> <i>[Signature]</i> <i>[Signature]</i> <i>[Signature]</i>

FACILITY LOCATIONS (Sites) - See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred conditioned or held for teaching, testing, experiments, research, or surgery, if any.	C. Number of animals upon which teaching, research, experiments, or tests were conducted.	D. Number of animals upon which experiments, teaching, research, surgery or tests were conducted involving accompanying pain or distress to the animals, for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report.)	F. TOTAL NUMBER OF ANIMALS (C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-human Primate					
0. Sheep					
1. Pigs					0
2. Other Farm Animals					
3. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it is required that exceptions to the standards and regulations be explained and approved by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care.

RE: Certificate Number: 93-R-0358, Customer Number 8231

Dear Mr. Gibbons:

Please find enclosed a copy of the previously signed Form 7023, Annual Report of Research Facility, for Cypros Pharmaceutical Corporation with an original signature. Please note that Cypros Pharmaceutical Corp. has changed its name to Questcor Pharmaceuticals, Inc. In addition, Questcor Pharmaceuticals is not currently conducting any animal experiments in our facilities and would like to be put on inactive status.

Please contact me at _____ if you require any additional information.

Sincerely,

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the number and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

RE: ANNUAL REPORT
Certificate No.: 93-R-0378
Customer No.: 1332
Facility No.: 001

Dear Mr. Gibbens:

Enclosed please find a completed APHIS Form 7023, covering the period of October 1, 2002 through September 30, 2003.

Please note, the animals sited (25 rabbits) in the report were animals that were housed in the vivarium at our old facility at the following address: 11035 Roselle Street, San Diego, CA 92121. As of December 6, 2002, we closed this facility and have no animals, vivarium, equipment or personnel at this location.

In December of 2002, we moved to a facility which does not have an animal facility at the following address: 11588 Sorrento Valley Road, Suite 21, San Diego, CA 92121. For this reason, on September 11 of this year (2003), we sent a letter to your office requesting a cancellation of our USDA Certification (certificate #93-R-0378).

Your notification for the 2003 annual report was sent to our old facility on Roselle Street to the attention of [redacted]. Please update your database so all future mailings and notices come to our current address on Sorrento Valley Road to the attention of our current Institutional Official,

If you have any further questions, please do not hesitate to contact me at our Institutional Official [redacted]

Sincerely,

Attachment (APHIS Form 7023 - USDA ANNUAL REPORT)

1. This facility is in compliance with the appropriate standards governing the care, treatment and use of animals included on appropriate animal research facilities, testing, surgery, or use of pain relieving drugs.

2. Each animal given a procedure is identified and its identification is maintained.

3. This facility is adhering to the standards and guidelines under the Animal Welfare Act, the regulations thereunder, and the standards and guidelines of the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of the changes to the IACUC report for this annual report is attached, identifying the ACUC approved exceptions to the standards and guidelines.

4. The attending veterinarian for this research facility has approved the procedures for the animals included on this report.

Ref: Change of research program.

Dear Sir,

Genetronics, Inc. is registered with USDA as a Class "R" research facility. Our registration no is 93-R-0395. We had proposed to work with the rabbit animal model for our cardiovascular drug delivery research program. Due to some current changes in our research program we have postponed these studies until further notice. I would request you to keep us in inactive status. I will inform you as soon as we start our research activities with the rabbit animal model.

Thank you

Inactive Date: 01/12/98
RE: INACTIVE STATUS

Dear Registrant:

This is to acknowledge receipt of your request to change the status of your facility from active to inactive. This change has been made effective on the date above.

Should you decide to reactivate your facility in the future (i.e., perform research and/or house species of animals regulated by the Animal Welfare Act), it is your responsibility to provide written notification to this office immediately.

You are reminded that even in an inactive status you will be required to submit the "Annual Report of Research Facility" (APHIS Form 7023) by December 1 of each year. If you were to cancel your registration and later decide to resume research, all you need to do is to contact our office and request the appropriate materials. There is no advantage to being registered unless you are actually engaged in research.

We appreciate your efforts in complying with the Animal Welfare Act. Contact this office at 916-857-6205 or 916-857-6206 if you have any questions regarding this letter.

Sincerely,

Robert M. Gibbens, D.V.M.

Re: Registration No. 93-R-0396

Dear Dr. Gibbens

The purpose of this letter is to notify the USDA that Miravant Medical Technologies has had a change in operations. Due to financial reasons, Miravant's animal facility, located at 336 Bollay Dr., Santa Barbara, CA, has been shut down as of August 7, 2003. Animals are no longer housed, handled or used at this facility.

According to the USDA regulations, 9 CFR Ch.2.27, Miravant is requesting a cancellation of its registration, 93-R-0396. Miravant acknowledges that any future use of USDA regulated animals would first require re-registration with the USDA and compliance with the Act and regulations.

cc: Michael Smith, USDA Medical Officer

Re: Registration no. 93-R-0410, Customer no. 1819

Dear Dr. Gibbens:

This letter is to serve as official notice to the USDA that Intuitive Surgical, Inc., is requesting cancellation of its Computer Motion, Inc. license (registration no. 93-R-0410, Customer no. 1819) effective immediately. Computer Motion, Inc. and Intuitive Surgical, Inc. merged on June 30, 2003 and we have closed the lab facility at the Computer Motion, Inc., 130-B Cremona Dr., Goleta, CA address.

Should you have any questions, please feel free to contact me at

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals involved.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and the adequacy of other aspects of animal care.

APHIS Form 7023 Site List

The following sites have been reported by the facility.

Registration Number: 93-R-0449
Customer Number: 11593
Facility: AVANIR PHARMACEUTICALS
11388 SORRENTO VALLEY ROAD, STE 200
SAN DIEGO, CA 92121
(858) 622-5227

11388 SORRENTO VALLEY ROAD, STE 200
SAN DIEGO, CA 92121

Attachment to APHIS Form 7023

Registration Number: 93-R-0449
Customer Number: 11593
Facility: Avanir Pharmaceuticals
11388 Sorrento Valley Road, Suite 200
San Diego, CA 92121
(858) 622-5227

The number reported on Line 6 (Guinea Pigs), columns B, D and F does not reflect the total number of guinea pigs received by Avanir. In addition, there were five (5) guinea pigs that were either dead on arrival or died within two days of being received. Reports were made of these incidents to both the USDA and the vendor, Charles River Laboratories.

The total number of animals that actually came through the Avanir facility was 78.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
