
ANNEX 15 Local Resources for Community Mobilization and Education

Section 8 of this manual describes how to develop community education in an urgent situation. The first step is to identify key community resources such as groups who know the community and already have access to it. Information about each key community resource can be recorded on the following chart. Use the chart as a reference to identify appropriate community resources that can be called upon when a VHF occurs.

Local Resources for Community Mobilization and Education

Organization or Group	Expertise	Representative or Leader and Locating Information	Human Resources	Available Equipment	Contacted?	Task Assigned
