

National Nonprofit Humanitarian Initiative

This program is no longer active.

Please review the [Press Release](#) issued on October 21, 2005 for additional background information.

Nonprofit organizations have been notified of their approval under this Initiative and are currently reviewing the NDM allocations they received to be used for exchanges. The Organizations have until December 31, 2005 to submit all their orders to the Kansas City Commodity Office for review. Upon completion of the review, the Organizations will be notified they can place their order with the supplier(s) and schedule shipment(s). At the time of notification this Office will provide an order number that should be used for tracking purpose by both the Nonprofit and Supplier.

Please follow this link for the [Application forms](#) and [instructions](#).

Participating nonprofits will exchange USDA's nonfat dry milk for manufactured products such as ready-to-eat pudding, ready-to-eat milk-based soups, nutritional bars and ultra-high temperature shelf-stable milk for delivery within the 48 contiguous states.

The Sources Sought Notice for suppliers of the milk-based exchange products can be found at [FedBizOpps](#).

The original Sources Sought Notice established a December 31, 2005, deadline for delivery of exchange products to nonprofit organizations participating in the program. A clarification in the Sources Sought Notice is being published to extend the deadline for delivery of exchange products by participating suppliers to March 31, 2005.
