## District of Columbia, Grade 4

## For District of Columbia fourthgraders in 2007,

...the overall score was higher than in 2003 and 2005.

## Results for lower-income students showed

... a higher average score compared to 2003 but no significant change compared to 2005.
...a lower average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...higher average scores for Black and Hispanic students compared to 2003 but no significant change compared to 2005.
...no significant change in the average score for White students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 and 2005.
...an increase in the percentage at or above Proficient compared to 2003 and 2005.

Trend in fourth-grade NAEP mathematics achievementlevel performance in the District of Columbia

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

Trend in fourth-grade NAEP mathematics average scores in the District of Columbia

* Significantly different ( $p$ < .05 ) from 2007.

Trend in NAEP mathematics average scores for lower-income fourth-graders in the nation and the District of Columbia

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in fourth-grade NAEP mathematics average scores in the District of Columbia, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, and Hispanic includes Latino. Race categories exclude Hispanic origin.

## District of Columbia, Grade 8

Trend in eighth-grade NAEP mathematics average scores in the District of Columbia

* Significantly different ( $p<.05$ ) from 2007.

Trend in NAEP mathematics average scores for lower-income eighth-graders in the nation and the District of Columbia

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in eighth-grade NAEP mathematics average scores in the District of Columbia, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, and Hispanic includes Latino. Race categories exclude Hispanic origin.

## For District of Columbia eighthgraders in 2007,

...the overall score was higher than in 2003 and 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 but no significant change compared to 2005.
...a lower average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...a higher average score for Black students compared to 2003 and 2005.
...no significant change in the average score for Hispanic students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 but no significant change compared to 2005.
...an increase in the percentage at or above Proficient compared to 2003 but no significant change compared to 2005.

Trend in eighth-grade NAEP mathematics achievementlevel performance in the District of Columbia

[^0]
## Houston, Grade 4

## For Houston fourth-graders in 2007,

...the overall score was higher than in 2003 but not significantly different from 2005.

## The district-to-state comparison showed

...a lower overall score than for Texas.
...no significant change in the gap compared to 2003 and 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 but no significant change compared to 2005.
...a higher average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...higher average scores for White and Hispanic students compared to 2003 but no significant change compared to 2005.
...no significant change in the average score for Black students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 but no significant change compared to 2005.
...an increase in the percentage at or above Proficient compared to 2003 but no significant change compared to 2005.

Trend in fourth-grade NAEP mathematics achievementlevel performance in Houston

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

Trend in eighth-grade NAEP mathematics average scores in Texas and Houston

* Significantly different ( $p<.05$ ) from 2007.

Trend in NAEP mathematics average scores for lowerincome eighth-graders in the nation and Houston

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in eighth-grade NAEP mathematics average scores in Houston, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.
${ }^{1}$ Sample size was insufficient to permit a reliable estimate for Asian/Pacific Islander students in 2003.
NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

## For Houston eighth-graders in 2007,

...the overall score was higher than in 2003 and 2005.

## The district-to-state comparison showed

...a lower overall score than for Texas.
...no significant change in the gap compared to 2003 and 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 and 2005.
...a higher average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...higher average scores for White, Black, and Hispanic students compared to 2003 and 2005.
...no significant change in the average score for Asian/Pacific Islander students compared to 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 and 2005.
...an increase in the percentage at or above Proficient compared to 2003 and 2005.

Trend in eighth-grade NAEP mathematics achievementlevel performance in Houston

[^1]
## Los Angeles, Grade 4

## For Los Angeles fourth-graders in 2007,

...the overall score was higher than in 2003 but not significantly different from 2005.

## The district-to-state comparison showed

...a lower overall score than for California.
...no significant change in the gap compared to 2003 and 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 but no significant change compared to 2005.
...a lower average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...a higher average score for Hispanic students compared to 2003 but no significant change compared to 2005.
...no significant change in the average scores for White, Black, and Asian/Pacific Islander students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 but no significant change compared to 2005.
...an increase in the percentage at or above Proficient compared to 2003 but no significant change compared to 2005.

Trend in fourth-grade NAEP mathematics achievementlevel performance in Los Angeles

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

Trend in fourth-grade NAEP mathematics average scores in California and Los Angeles

* Significantly different ( $p<.05$ ) from 2007.

Trend in NAEP mathematics average scores for lowerincome fourth-graders in the nation and Los Angeles
Scale score

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in fourth-grade NAEP mathematics average scores in Los Angeles, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

## Los Angeles, Grade 8

Trend in eighth-grade NAEP mathematics average scores in California and Los Angeles

* Significantly different ( $p<.05$ ) from 2007.

Trend in NAEP mathematics average scores for lowerincome eighth-graders in the nation and Los Angeles

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in eighth-grade NAEP mathematics average scores in Los Angeles, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

## For Los Angeles eighth-graders in 2007,

...the overall score was higher than in 2003 and 2005.
The district-to-state comparison showed
...a lower overall score than for California.
...a narrowing of the gap compared to 2003 and 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 and 2005.
...a lower average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...a higher average score for Hispanic students compared to 2003 and 2005.
...higher average scores for Black and Asian/Pacific Islander students compared to 2003 but no significant change compared to 2005.
...no significant change in the average score for White students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 and 2005.
...an increase in the percentage at or above Proficient compared to 2003 and 2005.

Trend in eighth-grade NAEP mathematics achievementlevel performance in Los Angeles

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

## New York City, Grade 4

## For New York City fourth-graders in 2007,

...the overall score was higher than in 2003 and 2005.

## The district-to-state comparison showed

...a lower overall score than for New York.
...a narrowing of the gap compared to 2003 but no significant change compared to 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 and 2005.
...a higher average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...higher average scores for White, Black, Hispanic, and Asian/Pacific Islander students compared to 2003 but no significant change compared to 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 and 2005.
...an increase in the percentage at or above Proficient compared to 2003 and 2005.

Trend in fourth-grade NAEP mathematics achievementlevel performance in New York City

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

Trend in fourth-grade NAEP mathematics average scores in New York and New York City

Trend in NAEP mathematics average scores for lowerincome fourth-graders in the nation and New York City Scale score

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in fourth-grade NAEP mathematics average scores in New York City, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

## New York City, Grade 8

Trend in eighth-grade NAEP mathematics average scores in New York and New York City

Trend in NAEP mathematics average scores for lowerincome eighth-graders in the nation and New York City

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in eighth-grade NAEP mathematics average scores in New York City, by race/ethnicity

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

## For New York City eighth-graders in 2007,

...the overall score was not significantly different from 2003 and 2005.

## The district-to-state comparison showed

...a lower overall score than for New York.
...no significant change in the gap compared to 2003 and 2005.

## Results for lower-income students showed

...a higher average score compared to 2003 but no significant change compared to 2005.
...no significant difference in the average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...no significant change in the average scores for White, Black, Hispanic, and Asian/Pacific Islander students compared to 2003 and 2005.

## Achievement-level results showed

...no significant change in the percentage at or above Basic compared to 2003 and 2005.
...no significant change in the percentage at or above Proficient compared to 2003 and 2005.

Trend in eighth-grade NAEP mathematics achievementlevel performance in New York City

## San Diego, Grade 4

## For San Diego fourth-graders in 2007,

...the overall score was higher than in 2003 but not significantly different from 2005.

## The district-to-state comparison showed

...a higher overall score than for California.
... a change in the score gap between San Diego and California from -1 point in 2003 to +4 points in 2007.

## Results for lower-income students showed

...a higher average score compared to 2003 but no significant change compared to 2005.
...a lower average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...higher average scores for White, Hispanic, and Asian/Pacific Islander students compared to 2003 but no significant change compared to 2005.
...no significant change in the average score for Black students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 but no significant change compared to 2005.
...an increase in the percentage at or above Proficient compared to 2003 and 2005.

Trend in fourth-grade NAEP mathematics achievementlevel performance in San Diego

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

Trend in fourth-grade NAEP mathematics average scores in California and San Diego

Trend in NAEP mathematics average scores for lowerincome fourth-graders in the nation and San Diego

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in fourth-grade NAEP mathematics average scores in San Diego, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

Trend in eighth-grade NAEP mathematics average scores in California and San Diego

* Significantly different ( $p<.05$ ) from 2007.

Trend in NAEP mathematics average scores for lowerincome eighth-graders in the nation and San Diego

* Significantly different ( $p<.05$ ) from 2007.

NOTE: In NAEP, lower-income students are students identified as eligible for the National School Lunch Program.

Trend in eighth-grade NAEP mathematics average scores in San Diego, by race/ethnicity

* Significantly different ( $p<.05$ ) from 2007

NOTE: Results are not shown for all race/ethnicity categories because of insufficient sample sizes. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin.

## For San Diego eighth-graders in 2007,

...the overall score was higher than in 2003 but not significantly different from 2005.

## The district-to-state comparison showed

...no significant difference from the overall score for California.
... a change in the score gap between San Diego and California from -3 points in 2003 to +2 points in 2007.

## Results for lower-income students showed

...a higher average score compared to 2003 but no significant change compared to 2005.
...no significant difference in the average score compared to lower-income students in the nation.

## Results for racial/ethnic groups showed

...higher average scores for White, Hispanic, and Asian/Pacific Islander students compared to 2003 but no significant change compared to 2005.
...no significant change in the average score for Black students compared to 2003 and 2005.

## Achievement-level results showed

...an increase in the percentage at or above Basic compared to 2003 but no significant change compared to 2005.
...an increase in the percentage at or above Proficient compared to 2003 but no significant change compared to 2005.

Trend in eighth-grade NAEP mathematics achievementlevel performance in San Diego

* Significantly different ( $p<.05$ ) from 2007.

NOTE: Detail may not sum to totals because of rounding.

## Technical Notes

## District Participation

In addition to the District of Columbia, whose public school students' results were also included with other NAEP state results in mathematics, the other 10 participating public school districts (as listed in the NCES Common Core of Data) are

- Atlanta City School District
- Austin Independent School District
- Boston School District
- Charlotte-Mecklenburg Schools
- City of Chicago School District 299
- Cleveland Municipal School District
- Houston Independent School District
- Los Angeles Unified School District
- New York City Public Schools
- San Diego Unified School District

To ensure unbiased samples, NCES and the Governing Board established participation rate standards that states and jurisdictions were required to meet for their results to be reported. Participation rates for the original sample needed to be at least 85 percent for schools to meet reporting requirements. In the 2007 mathematics assessment, all states, jurisdictions, and participating urban districts met participation rate standards at both grades 4 and 8 (see appendix table A-1).

## Sampling and Weighting

The sample of students in the participating TUDA school districts is an augmentation of the sample of students who would usually be selected by NAEP as part of state and national samples. These augmented samples allow reliable reporting of student groups within these districts. Students in the TUDA samples are also included in state and national samples. For example, data from students tested in the Los Angeles sample were used to report results for Los Angeles, for California, and for the nation.

In the same way that schools and students participating in national NAEP assessments are chosen to be nationally representative, samples of schools and students in the urban districts were selected to be representative of their districts. The results from the assessed students are aggregated to provide accurate estimates of overall district performance. Results are weighted to take into account the fact that schools and students represent different proportions of the overall district population.

## Accommodations and Exclusions in NAEP

It is important to assess all selected students from the target population, including students with disabilities (SD) and English language learners (ELL). To accomplish this goal, students who receive accommodations in their state's assessments, such as extra testing time or individual rather than group administration, are offered most of the same accommodations in NAEP.

Some students identified as SD or ELL who are sampled for NAEP participation may be excluded from the assessment if NAEP does not offer the accommodations given on the student's state assessment. School personnel, guided by the student's Individualized Education Program (IEP) as well as by Section 504 eligibility, make decisions regarding inclusion in the assessment of students with disabilities. Based on NAEP's guidelines, they also make the decision whether to exclude students identified as ELL. The percentages of students excluded from NAEP may vary considerably across districts and over time. Comparisons of achievement results across districts should be interpreted with caution if the exclusion rates vary widely. See appendix tables A-2 and A-3 for the exclusion rates in the urban districts.

## Interpreting Statistical Significance

Comparisons over time or between groups are based on statistical tests that consider both the size of the differences and the standard errors of the statistics being compared. Standard errors are margins of error, and estimates based on smaller groups are likely to have larger margins of error. The size of the standard errors may also be influenced by other factors such as how representative the students assessed are of the entire population.

When an estimate has a large standard error, a numerical difference that seems large may not be statistically significant. Differences of the same magnitude may or may not be statistically significant depending upon the size of the standard errors of the estimates. For example, a 1-point difference between male and female students may be statistically significant, while a 1-point difference between White and Asian/Pacific Islander students may not be. Standard errors for the estimates presented in this report are available at http://nces.ed.gov/ nationsreportcard/nde/.

## Large Central Cities

Results for "large central city" in this report include public schools located in large central cities (population of 250,000 or more) throughout the United States within metropolitan statistical areas as defined by the federal Office of Management and Budget. It is not synonymous with "inner city." Some districts (Austin, Charlotte, Houston, and Los Angeles) encompass a small percentage of schools not classified as large central city. In these cases, data from the entire district were used in statistical comparisons to large central city schools.

Further comparisons of urban district student group data with large central city data are available from the online Data Explorer on the NAEP website (http:// nces.ed.gov/nationsreportcard/nde/). Selecting the variable "Large central city for urban district comparisons" when making statistical comparisons with selected urban districts will allow comparisons to the appropriate large central city data and will permit the user to replicate results in this report and to explore additional comparisons. The "Large central city for urban district comparisons" variable includes the data from the small number of schools within the participating TUDA districts in 2007 and prior years that fell outside of large central cities.

## Appendix Tables

Table A-1. Public school and student participation rates for Trial Urban District Assessment in mathematics, by grade and urban district: 2007

| Grade and district | School participation |  | Student participation |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Student-weighted percent | Number of schools participating | Student-weighted percent | Number of students assessed |
| Grade 4 |  |  |  |  |
| Atlanta | 100 | 50 | 95 | 1,500 |
| Austin | 100 | 60 | 95 | 1,900 |
| Boston | 100 | 60 | 93 | 1,300 |
| Charlotte | 100 | 50 | 95 | 1,700 |
| Chicago | 100 | 90 | 95 | 2,300 |
| Cleveland | 100 | 60 | 93 | 1,100 |
| District of Columbia | 100 | 120 | 94 | 1,900 |
| Houston | 100 | 80 | 97 | 2,800 |
| Los Angeles | 100 | 80 | 95 | 2,700 |
| New York City | 100 | 80 | 93 | 2,500 |
| San Diego | 100 | 60 | 95 | 1,700 |
| Grade 8 |  |  |  |  |
| Atlanta | 100 | 20 | 91 | 900 |
| Austin | 100 | 20 | 92 | 1,500 |
| Boston | 100 | 30 | 91 | 1,100 |
| Charlotte | 100 | 30 | 90 | 1,300 |
| Chicago | 100 | 100 | 94 | 1,700 |
| Cleveland | 100 | 80 | 89 | 1,100 |
| District of Columbia | 100 | 50 | 88 | 1,800 |
| Houston | 100 | 50 | 90 | 1,900 |
| Los Angeles | 100 | 70 | 91 | 2,000 |
| New York City | 100 | 80 | 89 | 2,000 |
| San Diego | 100 | 30 | 91 | 1,300 |

NOTE: The numbers of schools are rounded to the nearest ten, and the numbers of students are rounded to the nearest hundred.

## U.S. DEPARTMENT OF EDUCATION

The National Assessment of Educational Progress (NAEP) is a congressionally authorized project sponsored by the U.S. Department of Education. The National Center for Education Statistics, a department within the Institute of Education Sciences, administers NAEP. The Commissioner of Education Statistics is responsible by law for carrying out the NAEP project.

THE NATIONAL ASSESSMENT GOVERNING BOARD
In 1988, Congress created the National Assessment Governing Board to set policy for the National Assessment of Educational Progress, commonly known as The Nation's Report Card ${ }^{\text {тм }}$. The Governing Board is an independent, bipartisan group whose members include governors, state legislators, local and state school officials, educators, business representatives, and members of the general public.
