

NRRS™ Reservation Services for Forest Service and Corps of Engineers Facilities will NOT be available from September 30, 2007 through October 17, 2007

Campgrounds and recreation facilities managed by the USDA Forest Service and US Army Corps of Engineers will be converted to a new reservation software system this fall. Due to this conversion, reservation services will not be available for USFS and USACE facilities **beginning MidnightEST September 30, 2007 through 10:00amEST October 17^h, 2007**. This means that reservations, changes or cancellations will **NOT** be available through the call center or internet (Recreation.gov) during this time. Reservations will resume at 10:00amEST on October 17 for both the call center and the NRRS website, Recreation.gov.

Please note, that NRRS™ Customer Service agents will NOT be able to create new reservations, make changes or cancel reservations from October 1st through October 16th. If you do have an emergency that will prevent you from arriving for your stay during the above timeframe, please contact the campground directly. It is advised that you make changes and/or new reservations prior to September 30, 2007 to limit any impact to your visit during this time.

New Advanced Reservation Window Effective October 17th, 2007 - the "advanced booking window" for all US Forest Service and US Army Corps of Engineers facilities in the NRRS™ will change to a 6-month rolling window for individual family sites and cabins; group facilities will be on a 12 month rolling window. Please make note of this important change in the advanced reservation booking window.

Remember! Reservations resume at 10:00amEST on October 17, 2007!

Additional Information: For information on the NRRS™ and the services it offers, please go to www.Recreation.gov
