G402 Incident Command System (ICS) Overview for Executives/Senior Officials Training

FEMA's Emergency Management Institute (EMI) recently released, *G402 Incident Command System (ICS) Overview for Executives/Senior Officials* training. This training has generated a significant amount of interest. This 2-hour course has become one of the most requested (non-required) courses developed in some time. EMI typically limits distribution of G courses to the FEMA Regional Training Managers and State Emergency Management Training Officers (STOs) and refers requests for the course to the STOs. The demand for this 2-hour course is such that we decided to place it on the EMI website as a downloadable file. This ensures the widest distribution without placing an undue burden on the STOs.

Please understand these course materials are intended to be delivered in an instructor-led classroom training. This is not a self-paced, self-study or computer based training course.

Please read and print these instructions before you download the course. To keep track of how many people download this course you will be asked to provide your State and Zip Code below before you are taken to the materials.

Certificates: The training provider is responsible for certificates. EMI does not offer certificates for G courses.

NIMS Compliance: This course is NIMS compliant, but is not a required course. It does NOT replace any of the existing FY 2006 NIMS requirements.

EMI developed this and all of its new ICS courses collaboratively with the National Wildfire Coordinating Group (NWCG), and the United States Fire Administration.

If you have any questions about this course please contact trainwebmaster@dhs.gov or the NIMS Integration Center at NIMS-Integration-Center@dhs.gov

G402 Instructions

Course Goal: Orient audience to the Incident Command System (ICS).

Course Outline:

Part 1: What Is ICS?

Part 2: ICS Organization & Features

Part 3: Unified & Area Command

Part 4: Coordination & Incident Management Assessment
Part 5: ICS Preparedness

Audience: Elected officials, city/county managers, executives, senior officials and agency administrators

Time Required: Approximately 2 hours

Delivering the course: Instructors should coordinate course delivery with local emergency management agencies.

Instructor recommendations: At a minimum, instructors should have completed ICS 100 and 200 and have experience working in an ICS environment.

The course can be accessed through the EMI website at <http://training.fema.gov/emiweb/pub/g402.asp>
