“COUNTING ON YOU” (60-seconds)

(Music playing in background)

FEMALE VOICE:

The pre-teen years are a challenging time, but they're also a good time to think about your child's health.

Which is why, if you're the parent of an 11 or 12 year old, you need to know about pre-teen vaccines.

Vaccines that can help protect your pre-teen from serious diseases like meningitis, whooping cough, and for girls, the virus that causes cervical cancer.

So schedule a check up for your child today and ask specifically about pre-teen vaccines.

Because your pre-teen might think that they're all grown up, but they're counting on you to know better.

MALE ANNOUNCER:

For more information call: 800-CDC-INFO.

That's 800-232-4636.

Or visit our website at www.cdc.gov/vaccines .

Brought to you by the U.S. Department of Health and Human Services and the Centers for Disease Control and Prevention.
