\* Transition Quarter

- NSF has recalculated its space expenditures since 1980, making them significantly higher than reported in previous years.
- Includes \$2.1 billion for replacement of Space Shuttle *Challenger*.
- "Other" column is the total of the non-NASA, non-DoD budget authority figures that appear in succeeding columns. The total is sometimes different from the sum of the individual figures because of rounding. The "Total Space" column does not include the "NASA Total" column because it includes budget authority for aeronautics as well as in space.
- EPA has recalculated its aeronautics and space expenditures since 1989, making them significantly higher than reported in previous years.
