¹ Includes 8 wolves killed in control actions.² Collared wolves that became missing in 2001³ Additional losses listed as "probable" or "possible" described in text.⁴ Underlined packs are counted as breeding pairs toward recovery goals.⁵ Wolf numbers indicate collared lone wolves. Lone wolves killed 5 calves, 77 sheep (plus 19 probable kills) and 1 dog, and injured 2 dogs⁶ Eight members of the Gravelly Pack (2 adults and 6 pups) were translocated to the Yaak River valley in NWMT in December 2001.
