Preface

The attached information was prepared in response to a request from the Federal Emergency Management Agency (FEMA). The agency contracted with the Federal Research Division (FRD) to provide cost estimates for the replacement of periodical holdings lost by the North Dakota State University Library in a flood in 2000.

In consultation with Library of Congress acquisitions experts, FRD developed a strategy for locating this information. A representative list of 375 periodical titles was developed and sent to potential suppliers, who were asked to provide replacement costs for in-stock items and for any other items they could obtain. Additional sources were contacted as they were identified. The estimates received from suppliers then were collated and provided to FEMA for use in computing replacement payments to the university. The project ran from January 1 to March 31, 2001.

The delivered product consisted of a series of spreadsheets containing the titles of the 375 periodicals and replacement cost estimates. Information about microfilm replacement procedures at the Library of Congress and the Princeton University Library was also included.

Current Journal Prices
