En Español:

Antes de saber que está embarazada usted debe tomar ácido fólico. Todos los días.

Después es demasiado tarde para prevenir graves defectos congénitos. Para más información sobre ácido fólico, llame a la Línea Nacional Prenatal Hispana al 1-800-504-7081 o escriba a los Centros para el Control y la Prevención de Enfermedades a [flo@cdc.gov](mailto:flo@cdc.gov)

English:

Before you know you’re pregnant, that’s when you need to take folic acid. Every day. After that, it’s too late to prevent some serious birth defects. For more information about folic acid, call the Centers for Disease Control and Prevention at 1-800-CDC-INFO or visit [www.cdc.gov/folicacid](http://www.cdc.gov/folicacid).

En Español:

Cuando usted se entera que está embarazada, su bebé lleva ya semanas creciendo y es muy tarde para prevenir enfermedades congénitas. Por eso es importante tomar ácido fólico todos los días a partir de hoy. Puede recibir 400 microgramos diarios si toma una multivitamina y consume alimentos con suplementos vitamínicos. Llame a la Línea Nacional Prenatal Hispana al 1-800-504-7081 o escriba a los Centros para el Control y la Prevención de Enfermedades a [flo@cdc.gov](mailto:flo@cdc.gov)

English:

When you first find out you’re pregnant, your baby’s been growing for weeks, and it’s too late to prevent some serious birth defects. That’s why it’s so important to take folic acid every day, starting today. You can get 400 micrograms a day by taking a multivitamin and eating enriched food such as cereals or breads. To learn more about folic acid and preventing birth defects call the Centers for Disease Control and Prevention at 1-800-CDC-INFO or visit [www.cdc.gov/folicacid](http://www.cdc.gov/folicacid).
