

## Folic Acid Florida Campaign Materials

### Folic Acid Every Day

#### Preventing Neural Tube Defects Using Folic Acid:

Developed by Gail P. A. Kauwell, PhD, RD, LDN; Lynn B. Bailey, PhD; Gail Rampersaud, MS, RD, in association with the University of Florida, Institute of Food and Agricultural Science, Department of Food Science and Human Nutrition

This kit, available in English and soon in Spanish, contains components that provide information about the importance of folic acid in reducing the risk for birth defects. Included are:

- Training video tapes—one for health professionals only and one for both health professionals and clients
- Educator's guide with sections on:
  - Neural tube defects and folic acid
  - Strategies for working with diverse audiences
  - Strategies for working with diverse cultural/ethnic groups
  - Frequently asked questions
  - Resource list
- Lesson plans, presentation materials, handouts
  - Scripted interactive lesson plans with activities
  - Slides (sold separately), overhead masters, CD with PowerPoint presentations
  - Camera-ready handouts and recipes
- Folic acid flash cards activity—an interactive teaching tool

For more information about ordering this kit, call the University of Florida Institute of Food and Agricultural Science Extension bookstores at 1-800-226-1764 or visit <http://ifasbooks.ufl.edu/>. Look for product code SP 291.

Sorry, we can't give you medical advice. Please talk with your doctor for questions about yourself. For other information, please contact:
