

The National Assessment of Educational Progress (NAEP) assesses mathematics on a 0-500 point scale. In 2007, Austin Independent School District was one of eleven urban districts that voluntarily participated in the NAEP mathematics assessment on a trial basis.

Overall Mathematics Results for Austin

- In 2007, the average scale score for fourth-grade students in Austin was 241. This was not significantly different from their average score in 2005 (242).
- Austin's average score (241) in 2007 was higher than that of public schools in large central cities² (230).
- The percentage of students in Austin who performed at or above the NAEP *Proficient* level was 40 percent in 2007. This percentage was not significantly different from that in 2005 (40 percent).
- The percentage of students in Austin who performed at or above the NAEP *Basic* level was 83 percent in 2007. This percentage was not significantly different from that in 2005 (85 percent).

Percentages at NAEP Achievement Levels and Average Score

NOTE: The NAEP grade 4 mathematics achievement levels correspond to the following scale points: Below Basic, 213 or lower; Basic, 214–248; Proficient, 249–281; Advanced, 282 or above.

Performance of NAEP Reporting Groups in Austin: 2007

Reporting groups	Percent of students ³	Average score	Percent below Basic	Percent of students at or above Basic	Percent Proficient	Percent Advanced
Male	52	240	19	81	40	6
Female	48	241	16	84	39	7
White	26	263	2	98	76	18
Black	13	226	32	68	17	2
Hispanic	58	233	22	78	26	2
Asian/Pacific Islander	3	268	1	99	83	27
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for National School Lunch Program	61	229	26	74	22	1
Not eligible for National School Lunch Program	38	259	4	96	69	15

Average Score Gaps Between Selected Groups

- In 2007, male students in Austin had an average score that was not significantly different from that of female students. In 2005, there was no significant difference between the average score of male and female students.
- In 2007, Black students had an average score that was lower than that of White students by 38 points. In 2005, the average score for Black students was lower than that of White students by 34 points.
- In 2007, Hispanic students had an average score that was lower than that of White students by 31 points. In 2005, the average score for Hispanic students was lower than that of White students by 28 points.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 29 points. In 2005, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 28 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 40 points. In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 36 points.

Mathematics Scores at Selected Percentiles

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

Rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2007.

↑ Significantly higher than 2005. ↓ Significantly lower than 2005.

¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Austin were 4 percent and 2 percent in 2007, respectively. For more information on NAEP significance testing see <http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical>.

² "Large central city" includes public schools located in large central cities (population 250,000 or more) within metropolitan statistical areas as defined by the federal Office of Management and Budget. It is not synonymous with "inner city."

³ For comparison, non-White students comprised 80 percent of students in large central city public schools and 45 percent in public schools nationally at grade 4. Also, students eligible for free/reduced-price school lunch comprised 71 percent of students in large central city public schools and 46 percent in public schools nationally.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/mathematics/tuda.asp> for additional results and detailed information.
