| <b>Total</b>              | <b>1,026,200</b>                  | <b>1,743,100</b>                  |

**Notes applicable to this table:**

Data as of: 27-SEP-2004

1. The source for this table is ACF-801 data for FY 2002.
2. All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
3. All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY).
4. At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
5. Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
6. The reported results shown above have been rounded to the nearest 100. The national numbers are simply the sum of the State and Territory numbers.
7. On an ongoing basis, CA serves a significant number of families and children through State funds. Beginning in FY 2002, CA recognized and corrected their reporting to show that only 86% of families and children are being served through CCDF (as opposed to 100%). The other 14% are actually being served by non-CCDF funds. Prior to FY 2002, NY reported children based on a payments system which allowed for a child to be counted more than once. Beginning with FY 2002, NY revised their reporting system. This has had the effect of eliminating double-counting. These changes lowered the national child counts by nearly 100,000 for FY 2002 and FY 2003 as compared to what was reported for FY 2001.

**Notes applicable to this table:**

Data as of: 27-SEP-2004

1. The source for this table is ACF-800 data for FFY 2002. The ACF-800 is based on an annual unduplicated count of families and children; i.e. a family or child that receives one hour of service on one day is counted the same as a family or child that receives full-time care throughout the fiscal year.
2. All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
3. A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
4. New York Reports Monthly Averages rather than the disaggregated Annual total reported by all other states.

**Notes applicable to this table:**

Data as of: 27-SEP-2004

1. The source for this table is ACF-800 data for FFY 2002. The ACF-800 is based on an annual unduplicated count of families and children; i.e. a family or child that receives one hour of service on one day is counted the same as a family or child that receives full-time care throughout the fiscal year.
2. All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
3. A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
4. New Hampshire did not report number of children by setting type.
5. New York reports monthly averages rather than the disaggregated annual totals reported by all other states.

**Notes applicable to this table:**

Data as of: 27-SEP-2004

1. The source for this table is ACF-800 data for FFY 2002. The ACF-800 is based on an annual unduplicated count of families and children; i.e. a family or child that receives one hour of service on one day is counted the same as a family or child that receives full-time care throughout the fiscal year.
2. All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
3. A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
4. New Hampshire did not report the number of children by setting type.
5. New York Reports Monthly Averages rather than the disaggregated Annual total reported by all other states.

**Notes applicable to this table:**

Data as of: 27-SEP-2004

1. The source for this table is ACF-800 data for FFY 2002. The ACF-800 is based on an annual unduplicated count of families and children; i.e. a family or child that receives one hour of service on one day is counted the same as a family or child that receives full-time care throughout the fiscal year.

2. All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.

3. A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.

4. In some States there were no children served in Unregulated settings and thus the percent is "-" since division by zero is undefined.

5. New Hampshire did not report the number of children by setting type.

6. New York reports monthly averages rather than the disaggregated annual totals reported by all other states.

Notes applicable to this table:

Data as of: 27-SEP-2004

- The source for this table is ACF-800 data for FFY 2002. The ACF-800 is based on an annual unduplicated count of families and children; i.e. a family or child that receives one hour of service on one day is counted the same as a family or child that receives full-time care throughout the fiscal year.
- All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
- New Hampshire did not report number of children by setting type.
- New York Reports Monthly Averages rather than the disaggregated Annual total reported by all other states.

**Table 7**  
**Child Care and Development Fund and Additional State Efforts**  
**Number of Child Care Providers Receiving CCDF Funds (FFY 2002)**

| State                    | Child's Home   | Family Home    | Group Home    | Center         | Total          |

Notes applicable to this table:

Data as of: 27-SEP-2004

- The source for this table is ACF-800 data for FFY 2002, an unduplicated annual count.
- This data has not been adjusted by the pooling factor (unadjusted data) because ACF-800 Data Element 6a it is reported as a count of providers receiving CCDF funding.
- Note that this table reports the number of providers (not the number of children). A provider that serves one child is counted the same as a provider serving 200 children per day.
- New York Reports Monthly Averages rather than the disaggregated Annual total reported by all other states.
- New Hampshire and Virginia did not report the number of providers by setting type.

**Table 8  
Child Care and Development Fund  
Consumer Education Strategies Summary (FFY 2002)**

| State                | Grants / Contracts / Certificates Info | Resource and Referral | Provider List | Types/Quality of Care Materials | Health and Safety | Child Care Regulatory Info | Child Care Complaint Policy | Mass Media | Other | Estimated Number of Families Receiving Consumer Education |

Notes applicable to this table:

Data as of: 27-SEP-2004

1. The source for this table is ACF-800 data for FFY 2002, an unduplicated annual count.
2. This data has not been adjusted by the pooling factor (unadjusted data) because it is impossible to tell which families receiving consumer information also received CCDF funding.
3. NA=Not applicable, does not offer grants or contracts for subsidized child care slots.
4. A blank cell indicates that the State did not provide a response.
5. New York Reports Monthly Averages rather than the disaggregated Annual total reported by all other states.

**Notes applicable to this report:**

Data as of: 27-SEP-2004

- The source for this table is ACF-801 data for FFY 2002.
- All percentages are based on "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY).
- A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- The Invalid/Not Reported category only includes children with an invalid year/month of birth or report date.
- All Florida's out of range date-of-birth children (0.1%) are special needs children.

Data as of: 27-SEP-2004

**Notes applicable to this report:**

- The source for this table is ACF-801 data for FFY 2002.
- All percentages are based on "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY). National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.
- A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- The Invalid/Not Reported only includes family records with an invalid or missing number for ACF-801 element 6, Reason for Receiving Subsidized Child Care.
- Several States only capture the primary reason for receiving services and therefore do not report any families in the Both Employment and Training/Education category. States reporting no families in this combination category of Both Employment and Training Education" include Arkansas, New Hampshire, North Carolina, South Carolina, Vermont, and Wyoming (confirmed by ACF-801 notes).
- Inconsistencies in income reporting appear in several States between ACF-801 element 6 (reason for receiving a subsidy, element 9 (total income for determining eligibility), and elements 10 through 15 (the sources of income). For example, element 6 may indicate that the reason is employment, element 10 may indicate employment as an income source, and element 9 may show a monthly income of \$0. All combinations of inconsistencies between these three types of data elements have been observed.

**Notes applicable to this report:**

Data as of: 27-SEP-2004

1. The source for this table is ACF-801 data for FFY 2002.

2. All counts are based on "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.

**Table 11**  
**Child Care and Development Fund**  
**Average Monthly Percentages of Children by Racial Group (FFY 2002)**

| <b>State</b> | <b>Native American / Alaskan Native</b> | <b>Asian</b> | <b>Black / African American</b> | <b>Native Hawaiian / Pacific</b> | <b>White</b> | <b>Multi-Racial</b> | <b>Invalid / Not Reported</b> | <b>Total</b> |
|--------------|---|--------------|---------------------------------|----------------------------------|--------------|---------------------|-------------------------------|--------------|
|--------------|---|--------------|---------------------------------|----------------------------------|--------------|---------------------|-------------------------------|--------------|

3. All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY). National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.

4. A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.

5. At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.

6. Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.

7. The multi-racial category includes any child where more than one race was answered Yes (1). Several States do not capture and report more than one race per child and thus do not provide multi-racial data.

8. The Invalid/Not Reported category includes children where one or more race fields had anything other than a No (0) or Yes (1), blank, null, or space.

9. Several States including Washington are still reporting ethnicity (Latino/Hispanic) as a race rather than as an ethnicity in accordance with the Pre-FFY 2000 Technical Bulletin 3 standard. In many of these instances if a child is designated as Latino, no race is designated. In many states including Texas, Illinois, Louisiana, and Wisconsin self-reporting of race is optional and no race will be reported other than self reporting. All Michigan race data have a known system generated error that makes 95% of the children appear to be multi-racial. Therefore, no MI race data were reported for FFY 2002. The MI data were not included in the calculation of the national averages shown.

**Notes applicable to this report:**

Data as of: 27-SEP-2004

- The source for this table is ACF-801 data for FFY 2002.
- All percentages are based on "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY). National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.
- A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding.
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- The Invalid/Not Reported category includes children where anything other than a No (0) or Yes (1) was in the Ethnicity field.
- Several States including Washington are still reporting ethnicity (Latino/Hispanic) as a race rather than as an ethnicity in accordance with the Pre-FFY 2000 Technical Bulletin 3 standard. In many of these instances if a child is designated as Latino, no race is designated.

- All percentages are based on the "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY). National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.
- A "0%" indication often means the value is less than 0.5% rather than actually zero. In a few instances, the sum of the categories may not appear to add up to exactly 100% because of rounding. The percentages shown are among valid data only. In other words invalid data were excluded before the percentages were calculated. Nationally 3.8% of the children were excluded from the above table because either their age was invalid/not reported or one more setting elements of the child's setting record(s) were invalid or not reported.
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- Some children are reported to have multiple settings for the same month. If a child was in more than one of the above setting categories within the same month, the child was counted in each setting and the denominator was the number of child-setting combination, which results in the total being exactly 100%.

Data as of: 27-SEP-2004

**Notes applicable to this report:**

- The source for this table is ACF-801 data for FFY 2002.
- Average hours per month were based on sums of hours per month in categories divided by counts of children in categories as further defined below.
- All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY).
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- Nationally 3.8% of the children were excluded from the above table because either their age was invalid/not reported or one or more setting elements of a child's setting record was invalid or not reported.
- For children served by multiple providers, the child's count is proportioned based on the ratio of the monthly hours with each provider divided by the monthly total hours of service. The average hours and payments for each State-month combination are based on the sum of hours in each category divided by the sum of proportional counts in each category. The State's annual results are determined by calculating a weighted average of the monthly results where the weight was the "adjusted" number of children served in each month. The national results shown above represent a weighted average of the State's fiscal annual results where the weight for each State is the average monthly "adjusted" number of children served in each State for the fiscal year.
- Some States have been reporting the maximum number of hours authorized rather than the actual number of hours service provided.

Notes applicable to this report:

Data as of: 27-SEP-2004

- The source for this table is ACF-801 data for FFY 2002.
- Average cost per month were based on sums of costs per month in categories divided by counts of children in categories as further defined below.
- All counts are "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY).
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- Nationally 3.8% of the children were excluded from the above table because either their age was invalid/not reported or one or more setting elements of a child's setting record was invalid or not reported.
- For children served by multiple providers, the child's count is proportioned based on the ratio of the monthly hours with each provider divided by the monthly total hours of service. The average hours and payments for each State-month combination are based on the sum of hours in each category divided by the sum of proportional counts in each category. The State's annual results are determined by calculating a weighted average of the monthly results where the weight was the "adjusted" number of children served in each month. The national results shown above represent a weighted average of the State's fiscal annual results where the weight for each State is the average monthly "adjusted" number of children served in each State for the fiscal year.
- The current Technical Bulletin 3 indicates that a payment over \$1000 per month is considered above the Out of Range Standard and therefore is considered invalid. However, in some of the highest cost states there maybe some providers that actually charge more than \$1000 for a month of full-time care. The Child Care Bureau is currently planning on increasing this Out of Range Standard to \$2000 effective October 1, 2006.

**Notes applicable to this report:**

Data as of: 27-SEP-2004

- The source for this table is ACF-801 data for FFY 2002
- These percentages were based on the "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY). National percentages are based on the "adjusted" national numbers unless otherwise indicated. In other words, the national percentages are equivalent to a weighted average of the State percentages, where the weights are the "adjusted" number of families or children served as appropriate.
- A "0%" indication often means the value is less than 0.5% rather than actually
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- The percentage shown as "Yes" is the number reported as "Yes" divided by the families that answered "Yes" or "No", or an invalid/not reported response excluding families that were in protective services. States with few or no valid TANF data include Minnesota, New Hampshire and Wyoming. Wyoming's software had reversed the responses for TANF data. Based on a reversed result, it is estimated that 11% of the families in Wyoming that receive subsidized child care also received TANF. Minnesota estimates that 35% of families receiving subsidized child care also receive TANF. Minnesota and Wyoming data were included in the National Percentage calculation.

**Notes applicable to this report:**

Data as of: 27-SEP-2004

- The source for this table is ACF-801 data for FY 2002.
- Percentages were based on "adjusted" numbers of families and children unless otherwise indicated. These "adjusted" numbers represent the number funded through CCDF only. The "adjusted" number is the raw or "unadjusted" number reported by the State multiplied by the pooling factor as reported on the ACF-800. A few States have indicated that the pooling factor reported on the ACF-800 is not applicable to the ACF-801. This report takes all these factors into consideration in calculating the "adjusted" numbers or percentages.
- All states provide an actual unadjusted count of families served each month. For States reporting full population data, the number of child records reported each month were directly counted. However, for States that only submit samples, the ratio of children-to-families was determined each month from the samples and then multiplied by the reported number of families to obtain an estimate of the unadjusted number of children served each month. The unadjusted average number of families and children were obtained from the monthly numbers in the Federal Fiscal Year (FFY).
- A "0%" indication often means the value is less than 0.5% rather than actually zero.
- At the time of publication, the following States/Territories have not yet reported ACF-801 for FFY 2002: Puerto Rico and Virgin Islands. The data from American Samoa were not considered sufficiently reliable in these measures to report.
- Connecticut does not report ACF-801 data on all or nearly all children served by contracted centers. Wisconsin has been reporting some children that are authorized for care but do not receive care. Nebraska has been reporting child records for some children that do not receive a subsidy if other children in the same family are receiving a subsidy. Alaska's reported population does not accurately reflect the population served by CCDF due to sampling difficulties the State is trying to resolve. Furthermore Alaska does not report any children in foster care or families headed by a child.
- The "Mean CoPay/Income" columns exclude families with zero income because dividing by zero is undefined. Families headed by a child or in protective services were also excluded from this table.
- The National weighted values were determined by multiplying each State's average co-payment/income percentage by the adjusted number of families in each State, summing across the States and then dividing by the adjusted number of families served for the Nation.
