Type of Review: New.

Title: Teacher Quality in U.S. Public Schools in 2000.

Frequency: One time.

Affected Public: Individuals or households; State, local or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 7,300.

Burden Hours: 4,950.

Abstract: The survey, Teacher Quality in U.S. Public Schools in 2000, is

designed to provide NCES and the Office of the Secretary with timely data to monitor changes in key indicators of teacher quality. It is the second in a proposed series of biennial reports on the preparation and qualifications of public school teachers. In addition, the survey will provide some early estimates for data that will be provided in the Schools and Staffing Survey (SASS) to be conducted 1999–2000. The issues addressed in the proposed survey have been the focus of a growing concern over the condition of education, challenging U.S. teachers to adequately prepare students for competing in an increasingly complex international marketplace. Thus, the data will provide a national profile of teacher quality, representing an important device for tracking the nation's progress toward the goal of raising educational standards and ensuring high levels of student competence.
