

the No Action alternative plus changes in land use to expand testing and maneuver capabilities to include Future Combat Systems and supporting infrastructure. This alternative supports the Grow the Army decision to station an HBCT at WSMR that requires main cantonment expansion and additional supporting infrastructure. Training for the newly stationed units, to include the HBCT and the 2nd Engineer Battalion, will leverage the considerable range modernization that is taking place at Fort Bliss.

Alternative 2: This alternative includes those activities described in Alternative I and also includes the construction and operation of training ranges and the identification of maneuver areas for testing and training on WSMR.

The EIS will evaluate the environmental effects associated with the varying testing, training, maneuver and facility requirements of each alternative on the natural, cultural, and man-made environments at WSMR and in the southern New Mexico region.

Federal, State, and local agencies, affected federally recognized Indian tribes, and other interested persons are invited to participate in the scoping process for the preparation of this EIS. Public scoping meetings in the vicinity of the installation will be held to facilitate input to the EIS process from interested parties. Dates for the meetings will be announced in the local media and will be at times and locations convenient to the public. To ensure scoping comments are fully considered in the Draft EIS, comments and suggestions should be received within the 30-day scoping period or no later than 15 days following the last scoping meeting, whichever is later.
