Frequency: Annually.

Affected Public: State, local or Tribal Gov't, SEAs or LEAs.

Reporting Burden and Recordkeeping: Responses: 57.

Abstract: The Public Libraries survey has been conducted annually since it first collected FY 1990 data. The Data collection provides a national census of public libraries and their public library

service outlets. It includes descriptive data for each state and for each individual public library. The data are collected entirely electronically and the survey is designed and coordinated by a federal/state cooperative system. Data collected allow analysis of such important variables as expenditures, staffing, size of collection and services comparing among libraries of similar size (as measured by population of legal service area). This information is used for policy decisions in the areas of legislation, funding and resource allocation. With this complete file of administrative entities, it is possible to select samples for specialized surveys for example on children's services or on access for persons with disabilities.
