

military services to redefine their roles and identify the types of weapons and platforms most effective to future success in regional conflicts.

Concurrent with the rise of regional conflicts has been a trend of significant reductions in national defense spending. The Patuxent River Complex has been affected by the 1991, 1993, and 1995 Base Realignment and Closure Act (BRAC) decisions to relocate Naval Aviation Research, Development, Test and Evaluation (RDT&E) facilities from Warminster, Pennsylvania and Trenton, New Jersey and Naval Air Systems headquarters from Arlington, Virginia to the Complex. (Environmental Impact Statements were prepared in 1993 and 1994 to assess this realignment of these functions; issues addressed in these NEPA documents will be incorporated by reference only in the EIS for the Patuxent River Complex Integrated Management Plan.) These realignments and consolidation of their assets will better position NAWCAD to carry out its mission as the Navy's principal RDT&E, engineering, and fleet support activity for Naval fixed and rotary wing aircraft and associated systems from acquisition through all life cycle phases.

In response to these changes, NAWCAD recognized the need to initiate a strategic planning initiative that included the preparation of an Integrated Management Plan for the NAWCAD-controlled assets in the Patuxent River Complex. The implementation of the plan will enable the Navy to meet its commitment to conserve and protect the unique natural and cultural resources of the Patuxent River Complex and Chesapeake Bay while protecting human health and welfare.

The Integrated Management Plan will provide a framework within which NAWCAD can efficiently and effectively utilize the assets under its control to meet its strategic planning initiatives while complying with applicable local, state, and Federal laws. However, prior to NAWCAD adoption of the Integrated Management Plan, compliance with NEPA is required. The preparation of an EIS will meet these NEPA requirements. The EIS will address a range of alternatives that focus on varying workload levels associated with both RDT&E and military training support activities: (1) Level I Workload Alternative will consist of RDT&E activities at recent levels and an increase in military training support activities for a combined total of approximately 22,000 flight hours per year; (2) Level II Workload Alternative will consist of increases in RDT&E activities and military training support

activities for a combined total of approximately 24,000 flight hours per year; and (3) Level III Workload Alternative will consist of increased RDT&E activities and military training support activities for a combined total of approximately 26,000 flight hours per year. As required by NEPA, the EIS will also consider the No Action Alternative. This alternative would consist of RDT&E activities and military training support activities at existing workload levels.

Topics to be addressed in the EIS will include, but are not limited to, noise, air quality, vegetation and wildlife, water quality, and socioeconomic impacts, including environmental justice. Federal, state, and local agencies, and interested individuals are encouraged to participate in a scoping process to determine the range of issues related to the proposed action.

Five public scoping meetings will be held to receive oral and written comments. Each scoping meeting will provide opportunities for clarification of the draft Integrated Management Plan and alternatives and solicit input from representatives of government agencies and interested individuals. The Navy will set up information stations at these scoping meetings that will describe the Patuxent River Complex, the scope of Integrated Management Plan, and the NEPA EIS process. Each information station will be attended by a Navy presenter who will be available to answer questions from meeting attendees. Comments will be entered into the official record in several ways: written comments sheets available at each meeting; tape recorders located throughout the meeting area; and via a stenographer who will be available to transcribe statements. Written comments will also be accepted via mail or fax. Regardless of the commenting method chosen, all comments will receive the same attention and consideration during EIS preparation.

The five public scoping meetings will be held at the following times and locations: (1) Prince Frederick, Maryland on May 6, 1997 at the Calvert High School from 3:30 pm-5:30pm and 6:30 pm-8:30 pm; (2) Leonardtown, Maryland on May 8, 1997 at the Leonardtown High School from 3:30 pm-5:30 pm and 6:30 pm-8:30 pm; (3) Burgess, Virginia on May 12, 1997 at the Fairfields Baptist Church from 3:00 pm-6:00 pm; Westover, Maryland on May 14, 1997 at the JM Tawes Technical Center from 3:00 pm-6:00 pm; and (5) Cambridge, Maryland on May 15, 1997 at the Christ Episcopal Church from 2:00 pm-5:00 pm and 6:30 pm-8:30 pm. The schedule for the public scoping

meetings will also be available by calling (888) 276-5201.
