* The comparable number of other interstitial pulmonary diseases deaths in the entire United States for this same time period was 18,655.

† indicates that no industry (as defined by 3-digit Census Industry Code) within the specified sector was associated with a significantly elevated PMR based on at least five deaths with this condition in the specified time period.

§ indicates that, for decedents whose industry was within the specified sector, no occupation (as defined by 3-digit Census Occupation Code) was associated with a significantly elevated PMR based on at least 5 deaths with this condition in the specified time period.

NOTE: See appendices for source description, methods, ICD codes, industry and occupation codes, industrial sector groupings, and list of selected states and years.
