

Medicare Prescription Drug Plan Finder – IDs to Demo Tool

Because the personalized feature of the tool is so important, we have developed test cases to allow partners and stakeholders to see how the tools will work for people with Medicare. There are six scenarios listed below that represent different potential combinations of eligibility and coverage for Medicare beneficiaries. To follow the “personalized” comparison, simply enter the five data elements outlined for each scenario below to view the corresponding drug plan information. These numbers are not for real people; the results reflect what an actual person with Medicare in the same circumstances will see.
