

AFI² Program Management Tool

This section includes basic information about the AFI² Program Management Tool. Be sure to access the AFI² User Manual for more details. If you have not received a User Manual, please contact the AFI Resource Center, afiprogram@acf.hhs.gov.

OCS encourages grantees to use AFI² because the system captures most of the information grantees will need for their regular reports. In addition, project managers can use the data and standard reporting forms built into AFI² to track progress and plan project design improvements more easily.

This section of your HANDBOOK offers an overview of AFI², but please note that we are working constantly to improve its ease of use and to add features to help grantees administer their projects more easily.
