LEGISLATIVE SUMMARY FOR:

February 28, 2000

NRCS, Office of Legislative Affairs Room 5121 South Agriculture Bldg. (202) 720-2771 For additional information contact: Tia G. Young Douglas J. McKalip Anita Holland-Spears

LAST WEEK:

SENATE APPROPRIATIONS BRIEFING - On Tuesday, February 22, 2000, an NRCS briefing group led by Deputy Chief for Programs, Tom Weber, and Acting Budget Director Dana York, provided a briefing for Senate Appropriations Committee staff about the NRCS Budget request for FY '2001. NRCS staff highlighted the major points in the budget, and went through explanatory documentation on the proposed budget increases. Senate staff asked questions regarding specific accounts, and about the status of agency activities.

SENATE TMDL HEARING - On Wednesday, February 23, the Senate Agriculture, Nutrition and Forestry Committee (Chairman Lugar, R-IN), held a hearing on Total Maximum Daily Load. Chairman Richard Lugar began the hearing with an opening statement followed by testimony from Senator Craig Thomas, R-WY. The Committee heard testimony from Dan Glickman, Secretary for Agriculture, Carol Browner, Administrator for the Environmental Protection Agency and a panel of non-federal witnesses including Paul Johnson, Director, Iowa Department of Natural Resources and Former Chief of the Natural Resources Conservation Service.

Chairman Lugar said in his opening statement that many in the agriculture and forestry community have concerns about how these proposed regulations will affect their businesses as well as their involvement in ongoing watershed restoration. He said that the states are concerned that the proposed regulations represent a major significant shift away from historic voluntary and collaborative efforts toward watershed-based approaches. He went on to say that collaborative watershed strategies are the basis for voluntary, incentive-based solutions to control nonpoint source pollution. Senator Lugar indicated that the Congressional Research Service, in a legal memo prepared for the Agriculture Committee, had stated that it does not appear that EPA has legal authority to regulate nonpoint sources under the Clean Water Act and EPA appeared to concede this point at a House hearing on February 15. He said that the 1996 Farm Bill was one of the most environmentally responsive and responsible farm bills in our Nation's history. He stated that it included the Environmental Quality Incentives Program (EQIP), (a program he authored along with Senator Leahy.) Chairman Lugar said that it is a highly

successful program that is targeted by states to environmentally sensitive areas and that EQIP provides producers with the flexibility needed to address nonpoint source problems.

Senator Craig Thomas, R-WY, testified that it was the responsibility of Congress to ensue that the Action Plan did not become a mechanism for agencies to overstep their statutory authority since the Clean Water Act leaves nonpoint sources largely unregulated. He said that EPA's actions seek to by pass Congress. Senator Thomas said he was disappointed to see the USDA abandoning its position on the proposed rule. He also stated that voluntary incentives activities, such as those provided by NRCS, must be emphasized rather than regulations. He also said the NRCS functions in a facilitatory role with producers by providing on the ground technical assistance. He commented that the agency (NRCS) had formed true partnerships with producers to resolve water impairment problems but the EPA believes improved water quality is best achieved through regulation.

Dan Glickman, Secretary of Agriculture, said in his testimony that USDA shares EPA's commitment to cleaning the waters of the United States and building on successes reducing water pollution over the past several decades. He said that by using many of the conservation tools that Congress and the Department wrote in the 1985, 1990 and 1996 Farm Bills, much had been accomplished. The Secretary pointed out how the Conservation Reserve Program has been effective in reducing erosion on highly erodible lands. He commented that the Wetlands Reserve Program (WRP) and the Environmental Quality Incentive Program (EQIP) have benefitted thousands of farmers and ranchers and helped them to improve the productivity of their operations through improved conservation. Mr. Glickman stated that the Conservation Reserve Enhancement Program (CREP) is playing an important role in protecting the waters of the Chesapeake Bay, salmon habitat in Oregon and Washington, and drinking water supplies for New York City. He said the President's FY 2001 budget request includes \$1.3 billion above currently authorized levels to bolster our agriculture conservation programs. The Secretary stated that a letter signed on October 22, 1999 did not receive proper review at the Department. He said that he felt it did not set the right tone, and inappropriately questioned EPA's legal authority. He did state, however, that USDA had concerns about the proposed TMDL program. Among several items, the Secretary said that the TMDL rule should recognize the best management practices of America's farmers and ranchers; second, the rule should be more clearly constructed and should minimize adverse effects on agriculture and silviculture operations; and third, it should allow for reasonable time frames for planning and implementation.

Carol Browner, Administrator for the Environmental Protection Agency, said in her testimony that the clean water programs that EPA and the States implement, ranging from financing assistance for sewage treatment facilities, to permits for dischargers, to technical assistance to control pollution from nonpoint sources, are all intended to reduce water pollution. She said in 1996, EPA determined that there was a need for a comprehensive evaluation of the TMDL program. Ms. Browner mentioned in August 1997, EPA issued two policy memoranda providing guidance for State lists and

requesting that States work to improve the pace of establishing TMDLs. She furthered stated that EPA asked that States develop 8-13 year schedules for developing TMDLs for all listed waterbodies, beginning with the lists due April 1, 1998. She added that the new approach focuses attention on pollution sources in proven problem areas, rather than all sources. Ms.Browner further stated these sources are managed by he States, rather than EPA and it is designed to attain the water quality goals that the States have set and to use measures that are tailored to fit each specific waterbody, than a nationally applicable requirement. Ms. Browner felt that EPA is on the right track to restoring the nation's polluted waters.

Paul Johnson, Director of the Iowa Department of Natural Resources, and former Chief of the Natural Resources Conservation Service, testified that Iowa has had success curbing its most visible pollution problems, those caused by point source discharges. He said that Congress must revisit and redefine Section 303(d) of the Clean Water Act and that States' water quality standards, monitoring programs, and assessment techniques must be improved. He indicated that Congress needs to clarify responsibility for interstate waters and the complexity of nonpoint source pollution must be recognized. Mr. Johnson also said that the level of funding provided to states must be increased. He emphasized the need for field expertise so that water bodies are not evaluated in "driveby" site visits.

THIS WEEK:

DEPARTMENT OF AGRICULTURE SENATE BUDGET HEARING - The Agriculture, Rural Development and Related Agencies Subcommittee (Chairman Cochran, R-MS) of the Senate Appropriations Committee will hold hearings on fiscal 2001 appropriations for the Department of Agriculture. The agenda is assistance to

2001 appropriations for the Department of Agriculture. The agenda is assistance to Producers and the Farm Economy. The witnesses will be August Schumacher, Jr., Under Secretary for Farm and Foreign Agricultural Services, Department of Agriculture, Keith Collins, Chief Economist, Department of Agriculture.

Feb. 29 2:00 p.m. 138 Dirksen Bldg.

WATER QUALITY RESTORATION - The Water Resources and Environment Subcommittee (Chairman Boehlert, R-NY) of the House Transportation and Infrastructure Committee will hold a hearing on H.R. 3313, a bill to amend section 119 of the Federal Water Pollution Control Act to reauthorize the program for Long Island Sound. The Subcommittee will also focus on H.R. 2957, a bill to amend the Federal Water Pollution Control Act to authorize funding to carry out certain water quality restoration projects for Lake Pontchartrain Basin, Louisiana.

Feb. 29 1:30 p.m. 2167 Rayburn Bldg.

HEARING ON ENDANGERED SPECIES ACT – The House Resources Committee (Chairman Young, R-AK) will hold a hearing on H.R. 3160, a bill that would reauthorize and amend the Endangered Species Act.

Mar. 1 11:00 a.m. 1324 Longworth Bldg.

SENATE CROP INSURANCE MARKUP – The Senate Agriculture, Nutrition and Forestry (Chairman Lugar, R-Ind.) Committee will hold a markup of Crop Insurance legislation. In addition, the Committee will consider a resolution approving the Bexar, Medina, Atascosa, watershed project in south Texas.

Mar. 2 10:30 a.m. 328-A Russell Bldg.

NATURAL RESOURCES CONSERVATION SERVICE APPROPRIATIONS -

The Agriculture, Rural Development, Food and Drug Administration and Related Agencies Subcommittee (Chairman Skeen, R-N.M.) of the House Appropriations Committee will hold hearings on fiscal 2001 appropriations for the Natural Resources Conservation Service.

Mar. 2 10:00 a.m. 2362A Rayburn Bldg.

LOOKING AHEAD:

WATER CONTROL PROJECTS - The Water Resources and Environment Subcommittee (Chairman Boehlert, R-NY) of the House Transportation and Infrastructure Committee will hold a hearing on proposed Army Corps of Engineers waterway improvements and flood control projects.

Mar. 8 9:30 a.m. 2167 Rayburn Bldg.

FARM POLICY FIELD HEARINGS – House Agriculture Committee Chairman, Larry Combest (R-TX) and Ranking Member Charlie Stenholm (D-TX) have announced the schedule of farm policy hearings in 10 cities in regions from March through May, encouraging producers to submit detailed proposals for agriculture policy. Although each hearing may last for up to four hours, full discussion of producers' plans and Committee Members' questions will limit the number of witnesses who can testify at the hearings. Producers may be invited to offer testimony as a witness, or if not selected, producers may either submit specific views for the record, or e-mail informal comments to the Committee. To be considered as a potential witness at the hearing, producers should include information about their agricultural experience and their farming operations. The Committee will select witnesses who are qualified to provide specific testimony about federal farm policy, and answer questions posed by Agriculture Committee Members about policy alternatives.

The schedule of the Farm Policy Field Hearings are as follows:

Monday, March 6 Lubbock, Texas

Civic Center 9:00 a.m. Central Time

Monday, March 27 Raleigh, North Carolina

North Carolina State Univ. McKimmon Center Area 1 9:00 a.m. Eastern Time

Monday, May 1 Sacramento, California

Heidrick Ag History Center (Woodland, California) 8:30 a.m. Pacific Time Friday, March 17 Memphis, Tennessee

Agricenter International 10:00 a.m. Central Time

Saturday, April 1 West Chester, Ohio

Lakota East High School 10:00 a.m. Eastern Time

Tuesday, May 2 Sioux Falls, South Dakota

Augustana College 8:30 a.m. Central Time

Saturday, May 13 Peoria, Illinois

Peoria Civic Center 8:30 a.m. Central Time Saturday, March 18 Auburn, Alabama

Auburn Univ. Hotel & Conference Center 10:00 a.m. Central Time

Monday, April 3 Kutztown, Pennsylvania

Kutztown University 9:00 a.m. Eastern Time

Friday, May 12 Boise, Idaho

City Council Building 10:00 a.m. Mountain Time

Those who are interested in testifying at the field hearings in March for Lubbock, Memphis or Auburn, must send a letter addressed to the Chief Clerk, c/o House Committee on Agriculture at 1301 Longworth Building, Washington, D.C., 20515. If contacted to testify for the hearing, producers are required under the Rules of the House of Representatives to file an affidavit disclosing the amount and source of each federal contract or grant they receive (disclosure of farm payments or USDA loans is not required). A brief biography of the witness must also be included. Also, those witnesses will need to provide 100 copies of their testimony in advance. Producers who are unable to testify at a field hearing may instead submit written testimony for the official record by May 20, 2000, but must include their name, address, phone number and 10 copies of their testimony in their letter to the Agriculture Committee's Chief Clerk.
