

[Proposed class or classes of copyrighted work(s) to be exempted]= fair use rights as the the right to make copies of content for our own personal usage.

[Brief summary of the argument(s) in support of the exemption proposed above]= we don't want our fair use rights trampled by laws like the DMCA. If I pay for and buy something, I own it and have the right to do with it as I wish, play/copy/backup for as long as I wish for my own needs.  
My personal property rights can not/should not be Given away.
