

John Gilmore

Works I Want Exempted:

Any broadcast flag laws, the HD Radio Content Protection Act, and the Analog Content Security Preservation Act or any other act that does not uphold my Constitutional Right to Fair Use.

Summary of Argument:

I understand intellectual property rights but I do not want my fair use constitutional rights trampled on. If I purchase something i.e. a CD, LP, or DVD I should have the right to make an achievable copy. Also, if a program is coming over my tax paid airwaves I should be able to make a copy for my personal use. Please take my rights and every other American Tax Payer's Rights into consideration.
