

education, also affect an individual's risk for Alzheimer's disease. The National Institutes of Health and the Department of Veterans Affairs continue to conduct research to better prevent, detect, and treat Alzheimer's disease and provide information and support to caretakers and families.

During National Alzheimer's Disease Awareness Month, we recognize the millions of Americans affected by this tragic disease and honor those who have lost their lives to Alzheimer's. Americans are grateful for the resolve and dedication of medical professionals, scientific researchers, family members, and caregivers who give their time and talents and help provide hope to many.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2007 as National Alzheimer's Disease Awareness Month. I call upon the people of the United States to observe this month with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand seven, and of the Independence of the United States of America the two hundred and thirty-second.

GEORGE W. BUSH

Proclamation 8201 of October 31, 2007

National Diabetes Month, 2007

*By the President of the United States of America
A Proclamation*

Diabetes is a debilitating disease that affects millions of Americans of all ages and all walks of life. National Diabetes Month is an opportunity to raise awareness about risk factors, prevention, and treatment of this serious disease.

Diabetes is a chronic illness that leaves the body unable to produce or properly use insulin to maintain healthy blood glucose levels. The two most common forms of the disease that affect our citizens are Type 1 and Type 2 diabetes. Type 1 diabetes, once known as juvenile diabetes, is usually diagnosed in children and young adults who are unable to produce insulin and require daily medication. Type 2 diabetes, the most common form of the disease, is often attributed to lifestyle risk factors and can be controlled by a modified diet, regular physical activity, and medication. Americans can take steps to control the disease and lower the risk of complications such as heart disease, stroke, and kidney disease by maintaining healthy eating and exercise habits, and consulting with a doctor about diabetes testing.

My Administration is committed to providing better care for people living with diabetes and furthering efforts to find a cure. We have supported research initiatives and education programs that encourage healthy living, and we have also modified Medicare coverage to include diabetes

screenings. This year, the National Institutes of Health estimates that more than \$1 billion will be spent on diabetes research. By working together, we can help identify problems early, manage them before they grow worse, and help ensure more Americans live longer, healthier lives.

Throughout National Diabetes Month, we recognize the medical professionals, scientists, researchers, and all those whose efforts have made a positive difference in the fight against diabetes. By raising public awareness, we can help combat the effects of diabetes in our society and bring hope to children and families living with this disease.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2007 as National Diabetes Month. I call upon all Americans to learn more about the risk factors and symptoms associated with diabetes and to observe this month with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand seven, and of the Independence of the United States of America the two hundred and thirty-second.

GEORGE W. BUSH

Proclamation 8202 of November 8, 2007

World Freedom Day, 2007

*By the President of the United States of America
A Proclamation*

On World Freedom Day, we commemorate the fall of the Berlin Wall and reaffirm our conviction that freedom is the inalienable right of every man, woman, and child.

On November 9, 1989, the Berlin Wall fell—a triumph of freedom over those who denied hope and opportunity to millions. The collapse of this barrier signaled the demise of the Soviet empire and ushered in a new era of liberty for much of Central and Eastern Europe. In the end, tyranny was overpowered by ordinary people who wanted to live their lives freely, worship God freely, and speak the truth to their children. With moral clarity and courage, brave individuals can change the course of history.

Our Nation remains committed to the advance of freedom and democracy as the great alternatives to repression and radicalism. America calls on every country that stifles dissent to end its repression, to trust its people, and to grant its citizens the liberty they deserve.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 9, 2007, as World Freedom Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities, reaffirming our dedication to freedom and democracy.
