

Name: Aaron Ackley

Class of works: Non-U.S. DVD's that won't play in a U.S. player

Summary:

I purchased this DVD from a small internet retailer (I don't remember which one at this point), and the page advertising the disc claimed it was "region free." When the DVD arrived, the packaging also indicated that the disk was region free, and it was packaged with all the ordinary security tapes and so forth, like any other commercial disk. However, the disk will not play in my US region 1 DVD player.
