

Clearance Officer: Mr. Neil McNamara, National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314-3428, Fax no. (703) 518-6669, e-mail: mcnamara@ncua.gov.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or a copy of the information collection request, should be directed to Tracy Sumpter at the National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314-3428, or at (703) 518-6444.

SUPPLEMENTARY INFORMATION: Proposal for the following collection of information:

Title: Forms and Instructions for Central Liquidity Facility Loans.

OMB Number: 3133-0064.

Form Number: NCUA-7000, 7001, 7002, 7003 and 7004.

Type of Review: Extension of a currently approved collection.

Description: Forms used by each borrower from the CLF.

Respondents: Credit unions that borrow from the CLF.

Estimated No. of Respondents/Record keepers: 25.

Estimated Burden Hours Per

Response: 1 hour.

Frequency of Response: Other. As the need for borrowing arises.

Estimated Total Annual Burden Hours: 25 hours.

Estimated Total Annual Cost: 0.

By the National Credit Union Administration Board on October 26, 2004.

Mary Rupp,

Secretary of the Board.

NATIONAL CREDIT UNION ADMINISTRATION

Agency Information Collection Activities: Submission to OMB for Extension of a Currently Approved Collection; Comment Request

AGENCY: National Credit Union Administration (NCUA).

ACTION: Request for comment.

SUMMARY: The NCUA is submitting the following information collection to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35). This information collection is published to obtain comments from the public.

DATES: Comments will be accepted until January 3, 2005.

ADDRESSES: Interested parties are invited to submit written comments to

the NCUA Clearance Officer listed below:

Clearance Officer: Mr. Neil McNamara, National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314-3428, Fax no. (703) 518-6669, e-mail: mcnamara@ncua.gov.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or a copy of the information collection request, should be directed to Tracy Sumpter at the National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314-3428, or at (703) 518-6444.

SUPPLEMENTARY INFORMATION: Proposal for the following collection of information:

Title: Central Liquidity Facility

Regular Member Membership

Application.

OMB Number: 3133-0063.

Form Number: CLF-8702.

Type of Review: Extension of a currently approved collection.

Description: This is a one-time form used to request membership in the CLF.

Respondents: Credit unions seeking membership in the CLF.

Estimated No. of Respondents/Record keepers: 25.

Estimated Burden Hours Per

Response: .5 hour.

Frequency of Response: Other. As credit unions request membership in the CLF.

Estimated Total Annual Burden

Hours: 12.5 hours.

Estimated Total Annual Cost: 0.

By the National Credit Union Administration Board on October 26, 2004.

Mary Rupp,

Secretary of the Board.

BILLING CODE 7535-01-P

OFFICE OF NATIONAL DRUG CONTROL POLICY

Leadership Conference on Medical Education in Substance Abuse to be held December 1-2, 2004

AGENCY: Office of National Drug Control Policy.

ACTION: Notice.

SUMMARY: A conference of leaders in the field of medical education in substance abuse will be held on Wednesday, December 1, 2004, and Thursday, December 2, 2004, in Washington, DC at the Washington Hilton Embassy Row, 2015 Massachusetts Avenue, NW., Washington, DC 20036.

The conference will begin at 6:30 p.m. on Wednesday, December 1, 2004, and

conclude at 5:30 p.m. on Thursday, December 2, 2004. The Leadership Conference will: (1) Develop ongoing working relationships among agencies and organizations to increase physician knowledge and skills to address drug and alcohol related disorders; (2) facilitate the sharing of information among agency leaders and organizations in order to foster improved medical education at the undergraduate, graduate and continuing education level so as to enhance physicians' awareness of drug and alcohol-related disorders and improved skills and practices to address them; and (3) identify gaps in medical education curricula regarding alcohol and other drug related disorders. Members of the public who wish to attend the conference should telephone ONDCP'S Leadership Conference on Medical Education RSVP telephone line at (202) 395-6750 to arrange building access.

FOR FURTHER INFORMATION CONTACT:

Martha M. Gagné at (202) 395-4622.

Dated: October 26, 2004.

Linda V. Priebe,

Assistant General Counsel.

NATIONAL TRANSPORTATION SAFETY BOARD

Sunshine Act Meeting

TIME AND DATE: 9:30 a.m., Tuesday, November 9, 2004.

PLACE: NTSB Conference Center, 429 L'Enfant Plaza SW., Washington, DC 20594.

STATUS: The two items are open to the public.

MATTERS TO BE CONSIDERED: 7673

Highway—Special Investigation Report—Medical Oversight of Noncommercial Drivers.

5299P Most Wanted Safety Recommendations Program—November 2003 Update on Federal Issues.

NEWS MEDIA CONTACT: Telephone: (202) 314-6100.

Individuals requesting specific accommodations should contact Ms. Carolyn Dargan at (202) 314-6305 by Friday, November 5, 2004.

The public may view the meeting via a live or archived webcast by accessing a link under "News & Events" on the NTSB home page at <http://www.nts.gov>.

FOR FURTHER INFORMATION CONTACT:

Vicky D'Onofrio, (202) 314-6410.

Dated: October 29, 2004.

Vicky D'Onofrio,

Federal Register Liaison Officer.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-443]

FPL Energy Seabrook, LLC, Seabrook Station, Unit No. 1; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-86 issued to FPL Energy Seabrook, LLC (the licensee), for operation of the Seabrook Station, Unit No. 1, located in Rockingham County, New Hampshire.

The proposed amendment would revise the allowed outage times of Technical Specification 3.3.3.6, "Accident Monitoring Instrumentation," to be consistent with the completion times in the related specification in NUREG-1431, Revision 3, "Standard Technical Specifications Westinghouse Plants."

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes revise the actions and allowed outage times (AOT) for

inoperable post-accident monitoring (PAM) instrumentation. The PAM instrumentation is not an initiator of any previously evaluated accident. Furthermore, the PAM instruments are passive devices; the instruments do not actuate or control any plant systems or components. As a result, the probability of any accident previously evaluated is not increased by these proposed changes. While this change extends the AOT for inoperable instruments, the Technical Specifications will continue to require the availability of operable PAM instrumentation for monitoring and assessing specific plant parameters during and following an accident. The PAM instruments have no impact on the ability of systems to perform the safety functions of shutting down the reactor, removing decay heat, controlling radioactive releases, or mitigating accident consequences. The length of time that a PAM instrument has been inoperable has no effect on the consequences of an accident should an accident occur. As a result, extending the AOT for these instruments will not significantly increase the consequences of accidents previously evaluated.

2. The proposed changes do not create the possibility of a new or different kind of accident from any [accident] previously evaluated.

The proposed changes neither install or remove any plant equipment, nor alter the design, physical configuration, or mode of operation of any plant structure, system, or component. The accident monitoring instrumentation consists of passive devices and is not an initiator of any accident. No physical changes are being made to the plant, so no new accident causal mechanisms are being introduced. Therefore, operation of the facility in accordance with the proposed amendments will not create the possibility of a new or different kind of accident from any previously evaluated.

3. The proposed changes do not involve a significant reduction in a margin of safety.

The proposed changes do not alter the design, configuration, operation, or function of any plant system, structure, or component. The ability of any operable structure, system, or component to perform its designated safety function is unaffected by this change. These proposed changes allow an appropriate time to restore inoperable PAM instruments to operable status when one or more channels of a required instrument function become inoperable. The additional time to restore an inoperable channel to operable status is appropriate based on the low probability of an event requiring the accident monitoring instrumentation during the interval, providing a reasonable time for repair of the instrumentation, and alternate means of obtaining the required information. Moreover, with the exception of the containment post-LOCA [loss-of-coolant accident] high range area monitor (as currently licensed) this change retains the requirement to shut down the plant if less than a minimum number of instrument channels of the required parameters are operable. Therefore, operation of the facility in accordance with the proposed amendment will not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period should circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. Should the Commission take action prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. Should the Commission make a final No Significant Hazards Consideration Determination, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

Within 60 days after the date of publication of this notice, the licensee may file a request for a hearing with respect to issuance of the amendment to
