

reactor spent fuel, high-level waste, and other radioactive materials associated with spent fuel and high-level waste storage in an MRS.

5. *The Estimated Number of Annual Respondents:* 50.

6. *The Number of Hours Needed Annually to Complete the Requirement or Request:* 25,551 (22,781 hours for reporting [71 hours per response plus 2,770 hours for recordkeeping 55 hours per recordkeeper]).

7. *Abstract:* 10 CFR part 72 establishes mandatory requirements, procedures, and criteria for the issuance of licenses to receive, transfer, and possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials, in an MRS. The information in the applications, reports and records is used by NRC to make licensing and other regulatory determinations.

Submit, by February 22, 2005, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T-5 F52, Washington, DC 20555-0001, by telephone at 301-415-7233, or by Internet electronic mail to INFOCOLLECTS@NRC.GOV.

Dated at Rockville, Maryland, this 15th day of December 2004.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-219]

Amergen Energy Company, LLC; Oyster Creek Nuclear Generating Station Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from certain requirements of Title 10 of the Code of Federal Regulations (10 CFR), Subsection 2.109(b), for Facility Operating License No. DPR-16, which authorizes operation of the Oyster Creek Nuclear Generating Station (OCNGS), a boiling-water reactor facility, located in Ocean County, New Jersey. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

Subsection 109(b) of 10 CFR part 2 states, "If the licensee of a nuclear power plant licensed under 10 CFR 50.21(b) or 50.22 files a sufficient application for renewal of an operating license at least 5 years prior to the expiration of the existing license, the existing license will not be deemed to have expired until the application has been finally determined." This requirement for license renewal applications was established in December 1991 in conjunction with the publication of the final license renewal rule, 10 CFR part 54, "Requirements for Renewal of Operating Licenses for Nuclear Power Plants" (56 FR 64943).

AmerGen's application requested an exemption from the timing requirements of 10 CFR 2.109(b), for submittal of the OCNGS license renewal application. The exemption would allow the submittal of the renewal application with less than 5 years remaining prior to expiration of the operating license while maintaining the protection of the timely renewal provision in 10 CFR 2.109(b).

The proposed action is in accordance with the licensee's application for exemption dated August 10, 2004.

The Need for the Proposed Action

AmerGen stated that the OCGNS license renewal application would be

submitted in July 2005 and that application of the 5-year term in 10 CFR 2.109(b) for filing a license renewal application is not necessary in this situation to achieve the purpose of the regulation. The July 2005 filing date, which is approximately 44 months before expiration of the existing license in April 2009, according to AmerGen will provide the NRC staff with ample time in which to perform a full and adequate review.

The licensee proposed an exemption from the requirements of 10 CFR 2.109(b), to allow submittal of the license renewal application with less than 5 years remaining prior to expiration of the operating license, while maintaining the protection of the timely renewal provision in 10 CFR 2.109(b).

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the pursuant to 10 CFR 50.12(a), the proposed exemption is authorized by law, will not endanger life or property or common defense and security, and is, otherwise, in the public interest. In addition, special circumstances exist to justify the proposed exemption. The details of the staff's evaluation will be provided in the exemption that will be issued as part of the letter to the licensee approving the exemption to the regulation.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent release offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC staff concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (*i.e.*, the "no-

action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for OCNCS, dated December 1974, published by the Atomic Energy Commission.

Agencies and Persons Consulted

In accordance with its policy, on December 16, 2004, the NRC staff consulted with the New Jersey State official, Mr. Richard Pinney, of the New Jersey Department of Environmental Protection, Bureau of Nuclear Engineering, regarding the environmental impact of the proposed action. During the consultation, the NRC staff acknowledged a September 23, 2004, letter from Mr. Bradley Campbell, Commissioner of the State of New Jersey Department of Environmental Protection, which opposed the exemption. The NRC staff responded by letter dated November 2, 2004. No environmental concerns were raised by the September 23, 2004 letter. During the consultation, the State official had no additional comments regarding the environmental aspects of the exemption.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action. However, a site specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants (NUREG-1437)" will be required for the license renewal application submitted under this exemption.

For further details with respect to the proposed action, see the licensee's letter dated August 10, 2004. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to

ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or (301) 415-4737, or by e-mail to pdrc@nrc.gov.

Dated at Rockville, Maryland, this 16th day of December 2004.

For the Nuclear Regulatory Commission.

Peter S. Tam,

Senior Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission will convene a tele-conference meeting of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) on January 18, 2005. The topic of discussion will be "Update to Medical Event Criteria Definition." During this discussion, an ACMUI subcommittee will forward to the full ACMUI its recommendations regarding revision of the medical event criteria definition in Pt. 35. NRC staff is seeking the ACMUI's recommendations on this issue, as well as any recommendations on communicating associated risks to the public.

DATES: The tele-conference meeting will be held on Tuesday, January 18, 2005, from 1 p.m. to 3 p.m. Eastern Standard Time.

Public Participation: Any member of the public who wishes to participate in the tele-conference discussion may contact Angela R. McIntosh using the contact information below.

FOR FURTHER INFORMATION CONTACT: Angela R. McIntosh, telephone (301) 415-5030; e-mail arm@nrc.gov of the Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Conduct of the Meeting: Leon S. Malmud, M.D., will chair the meeting. Dr. Malmud will conduct the meeting in a manner that will facilitate the orderly conduct of business. The following procedures apply to public participation in the meeting:

1. Persons who wish to provide a written statement should submit a

reproducible copy to Angela McIntosh, U.S. Nuclear Regulatory Commission, Two White Flint North, Mail Stop T8F5, Washington, DC 20555-0001. Hard copy submittals must be postmarked by January 12, 2005, and electronic submittals must be submitted by January 14, 2005. Any submittal must pertain to the topic on the agenda for the meeting.

2. Questions from members of the public will be permitted during the meeting, at the discretion of the Chairman.

3. The transcript and written comments will be available for inspection on NRC's Web site (<http://www.nrc.gov>) and at the NRC Public Document Room, 11555 Rockville Pike, Rockville, MD 20852-2738, telephone (800) 397-4209, on or about March 18, 2005. Minutes of the meeting will be available on or about February 1, 2005.

This meeting will be held in accordance with the Atomic Energy Act of 1954, as amended (primarily Section 161a); the Federal Advisory Committee Act (5 U.S.C. App); and the Commission's regulations in Title 10, U.S. Code of Federal Regulations, part 7.

Dated: December 16, 2004.

Andrew L. Bates,

Advisory Committee Management Officer.

BILLING CODE 7590-01-P

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: [69 FR 75360, December 16, 2004].

STATUS: Open meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

ANNOUNCEMENT OF ADDITIONAL MEETING: Additional meeting.

An Open Meeting will be held on Wednesday, December 22, 2004 at 10 a.m. in Room 1C30, the William O. Douglas Room.

Commissioner Campos, as duty officer, determined that no earlier notice thereof was possible.

The subject matter of the Open Meeting scheduled for Wednesday, December 22, 2004 will be:

1. The Commission will consider a staff recommendation regarding the application of the Investment Advisers Act of 1940 to certain broker-dealers. (See Proposed Rule, IA-1845, and Reopening of Comment Period, IA-2278).
