II. Background

A. What Action is the Agency Taking?

The Agency has issued a RED for the insect repellent MGK® Repellent 326. Under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is conducting an accelerated reregistration program to reevaluate existing pesticides to make sure they meet current scientific and regulatory standards. The data base to support the reregistration of MGK® Repellent 326 is substantially complete and the insect repellent's risks have been mitigated so that MGK® Repellent 326 will not pose unreasonable risks to people or the environment when used according to its approved labeling.

In addition, EPA is reevaluating existing pesticides and reassessing tolerances under the Food Quality

Protection Act (FQPA) of 1996. Therefore, the RED also presents the Agency's tolerance reassessment decision for MGK® Repellent 326, which included the consideration of risks to infants and children.

All registrants of pesticide products containing the active ingredient di-n-propyl isocinchomeronate will be sent a copy of the RED, and must respond to labeling requirements and product-specific data requirements (if applicable) within 8 months of receipt.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing this RED as a final document with a 30-day comment period. Although the 30-day public comment period does not affect the registrant's response due date, it is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. Unless adverse comments are received, at the end of the comment period, the Agency will consider this action a final decision. If any comment significantly affects a RED, EPA will amend the RED by publishing the amendment in the **Federal Register**.

B. What is the Agency's Authority for Taking this Action?

The legal authority for these REDs falls under FIFRA. Section 4(g)(2)(A) of FIFRA directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products, and either reregistering products or taking "other appropriate regulatory action."
