*Background:* The Corporation has contracted with the Nelson A. Rockefeller Institute of Government to carry out a Field Network Pilot Study to learn how the Corporation's goals and requirements regarding capacity building and performance measurement are affecting the AmeriCorps program and the nonprofit organizations where AmeriCorps members serve. The Pilot Study will consider how grantee and subgrantee organizations are selected; how the Corporation communicates with grantees and subgrantees; how local contexts and available funding opportunities vary from state to state; and how the Corporation's goals and requirements fit into the context of the grantees' and subgrantees' own policies and the many diverse responsibilities they face.

The Field Network Pilot Study Report Form will be used to assess the impact of the Corporation's policies around capacity building and the performance measurement initiative. Independent, local field researchers will be employed in collecting the information. During the data-gathering phase of the Pilot Study, the researchers will refer to background information about the Corporation, its programs, and the Field Network method.

#### Comments

A 60-day public comment Notice was published in the **Federal Register** on July 29, 2004. This comment period ended September 27, 2004. No comments were received from this Notice.

*Description:* The Corporation for National and Community Service is strongly committed to evaluating the effectiveness of its programs. VISTA is our country's longest continually operating domestic service program, with over 130,000 participants enrolling since its inception in 1965. Since 1994 the program has been administered by the Corporation as part of AmeriCorps. VISTA participants work in communities to build local capacity to advance economic development in low-income neighborhoods across the United States. The study will examine the long-term impacts VISTA service has on participants' civic attitudes, life decisions, goals, values, and enduring habits of civic engagement.

The objective of this study is to explore the long-term impacts of VISTA participation from 1965–1994 on the lives of participants to a comparison group who enrolled in VISTA during the same time period and completed the VISTA orientation but who did not actually serve in the program (or served less than one month). To meet these objectives, a sample of VISTA participants and near-participants will be drawn from the roster of individuals enrolling in VISTA from 1965 to 1993. In addition to collecting information on the outcomes specified above, data on respondent demographics and pre-VISTA experiences will be collected. The inclusion of a comparison group of near-participants will provide insight

into the outcomes realized by VISTA participants who completed their term of service.

This study will gather data using phone surveys and in-person interviews. The phone surveys will provide largely quantitative information, while the in-person interviews will allow for the collection of highly detailed and more qualitative descriptions of the life courses charted by VISTA participants and near-participants.

*Type of Review:* New Information Collection.

*Agency:* Corporation for National and Community Service.

*Title:* Study of Volunteers' Experience in the VISTA Program.
