SUPPLEMENTARY INFORMATION:**Description**

The information collection submitted for OMB review contains the following:

1. *Collection of Information:* FERC Form 715 "Annual Transmission Planning and Evaluation Report."

2. *Sponsor:* Federal Energy Regulatory Commission

3. *Control No.:* 1902-0171.

The Commission is now requesting that OMB approve and reinstate with a three-year extension of the expiration date, with no changes to the information collection requirements. However, the Commission will conduct a pilot allowing as an option the electronic submission of maps in lieu of paper. The Commission believes this will create greater efficiency and clarity of data when complying with this section of the information collection requirements. The information filed with the Commission is mandatory.

4. *Necessity of the Collection of Information:* Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the statutory provisions of section 213 of the Federal Power Act. Section 213(b) requires the Commission to collect annually from transmitting utilities sufficient information about their transmission systems to inform transmission customers, State and Federal regulatory authorities of available capacity and constraints. Form 715 also supports the Commission's expanded responsibilities under sections 211, 212, 304, 307(a), 309 and 311 of the Federal Power Act as amended, for reviewing reliability issues, market structure relationships, for rate and other regulatory proceedings.

In response to the events of September 11, 2001, the Commission took several steps to identify and limit access to information concerning the nation's energy infrastructure. In Order No. 630 (68 FR 9857, March 2, 2003, FERC Statutes and Regulations ¶ 31,140, at p. 30,261.) the Commission established procedures for gaining access to critical energy infrastructure information, information it defined as "Information about proposed or existing critical infrastructure that: (i) Relates to the production, generation, transmission, or distribution of energy; (ii) could be useful to a person in

planning an attack on critical infrastructure; (iii) is exempt from mandatory disclosure under the Freedom of Information Act, 5 U.S.C.; (iv) does not simply give the location of the critical infrastructure." (67 FR 58000, FERC Statutes and Regulations ¶ 32,564, at p. 34,548.) The information contained in the FERC Form 715 was found to meet this definition and therefore classified as CEII with restricted access to the public. The Commission implements the filing requirements in the Code of Regulations (CFR) under 18 CFR parts 141.300.

5. *Respondent Description:* The respondent universe currently comprises 183 companies (on average per year) subject to the Commission's jurisdiction.

6. *Estimated Burden:* 29,280 total hours, 183 respondents (average per year), 1 response per respondent, and 160 hours per response (average).

7. *Estimated Cost Burden to respondents:* 29,280 hours/2080 hours per years × \$107,185 per year = \$1,508,835. The cost per respondent is equal to \$8,245.

Statutory Authority: Section 213(b), Federal Power Act (FPA), 16 U.S.C. 824l.

Linda Mitry,

Acting Secretary.
